ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOT FOR USE ON TURF BEING GROWN FOR SALE OR OTHER COMMERCIAL USE AS SOD, OR FOR COMMERCIAL SEED PRODUCTION OR FOR RESEARCH PURPOSES.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Controls these grassy weeds: Crabgrass, Foxtail, Barnyardgrass - by effectively killing the sprouting seeds. Apply after Spring seeding of new lawns or re-seeding of bare spots in established lawns.

For use on newly-seeded or established plantings of the following grasses:

- Bluegrass
- Fescue
- Redtop
- Smooth Brome
- Perennial Ryegrass
- Orchardgrass
- Zoysiagrass

Bentgrass Strains as follows:

- Penncross
- Seaside
- Highland
- Astoric
- Nivalia
- C-1, C-7 and C-15

DO NOT USE ON OTHER BENTGRASS STRAINS OR BERMUDAGRASS

APPLICATION INSTRUCTIONS

1. Rake the lawn to remove leaves and other debris.
2. **On Established Lawns:** Apply at the rate of 3.5 lbs. per 1,000 sq. ft. (17 1/2 lb. bag covers 5,000 sq. ft.). Apply after the 1st or 2nd mowing (usually at the time forsythia blossoms start to fall) in the Spring before crabgrass and other annual grass weeds emerge.
3. **On Newly-Seeded Areas:** Apply at the rate of 3.5 lbs. per 1,000 sq. ft. (17 1/2 lb. bag covers 5,000 sq. ft.). Apply immediately after seeding in early Spring before crabgrass and other annual weeds emerge.
4. Apply with a fertilizer spreader (see How To Apply and settings below) to insure even coverage.
5. If it does not rain for three days after application, water the treated area thoroughly to get desired results. Timing application just ahead of a predicted rain is ideal.

HOW TO APPLY

For best crabgrass control, this product must be applied evenly over your lawn without skips or misses. Determine the correct amount for your lawn area. Do not over-apply or under-apply. Apply the contents of one bag to every 5,000 sq. ft. of lawn area (for example, 50 ft. x 100 ft. - 5,000 sq. ft.). If your lawn measures 100 ft. x 100 ft. (or 10,000 sq. ft.) two bags are sufficient.

1. Using the Recommended Setting below (calculated to apply one-half rate), spread one-half of the required amount of this product for your lawn, moving at a steady rate in one direction.
2. Spread the other half of the required amount over the same area, moving across or at right angles to the first application. This minimizes skips and overlaps, insuring good coverage. When turning or stopping spreader, close spreader gate.
3. Where this two-step procedure is not practical, apply in one trip over the lawn using the One-Step Settings listed below. Be careful to cover lawn completely, since crabgrass can grow in spots which are missed.
