PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if swallowed. May cause irritation of eyes, nose, throat and skin. Avoid contact with skin, eyes and clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling.

FIRST AID

- IF SWALLOWED:**
 - Call a poison control center or doctor immediately for treatment advice.
 - Have person sip a glass of water if able to swallow.
 - Do not induce vomiting unless told to do so by a poison control center or doctor.
 - Do not give anything by mouth to an unconscious person.
- IF IN EYES:**
 - Hold eye open and rinse slowly and gently with water for 15-20 minutes.
 - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
 - Call a poison control center or doctor for treatment advice.
- IF ON SKIN:**
 - Take off contaminated clothing.
- OR CLOTHING:**
 - Rinse skin immediately with plenty of water for 15-20 minutes.
 - Call a poison control center or doctor for treatment advice.
- IF INHALED:**
 - Move person to fresh air.
 - If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
 - Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For Emergency Medical Information call (888) 208-1368.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather will help to ensure that wind does not blow pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies or drainage systems.

Optional Heading [Quality Results]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOT FOR USE ON TURF BEING GROWN FOR SALE OR OTHER COMMERCIAL USE AS SOD, OR FOR COMMERCIAL SEED PRODUCTION OR FOR RESEARCH PURPOSES.

Do not allow people or pets to enter the treated area until dusts have settled.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application.

Controls these grassy weeds: Crabgrass, Foxtail, Barnyardgrass - by effectively killing the sprouting seeds. Apply after Spring seeding of new lawns or re-seeding of bare spots in established lawns.

For use on newly-seeded or established plantings of the following grasses:

- Bluegrass
- Fescue
- Redtop
- Smooth Brome
- Perennial Ryegrass
- Orchardgrass
- Zoysiagrass

Bentgrass Strains as follows:

- Penncross
- Seaside
- Highland
- Astoria
- Nimisila
- C-1, C-7 and C-19

DO NOT USE ON OTHER BENTGRASS STRAINS OR BERMUDAGRASS

APPLICATION INSTRUCTIONS

1. Rake the lawn to remove leaves and other debris.
2. **On Established Lawns:** Apply at the rate of 3.5 lbs. per 1,000 sq. ft. (17.5 lb. bag covers 5,000 sq. ft.). Apply after the 1st or 2nd mowing (usually at the time forsythia blossoms start to fall) in the Spring before crabgrass and other annual grass weeds emerge.

- 3. **On Newly-Seeded Areas:** Apply at the rate of 3.5 lbs. per 1,000 sq. ft. (17.5 lb. bag covers 5,000 sq. ft.). Apply immediately after seeding in early Spring before crabgrass and other annual weeds emerge.
- 4. Apply with a fertilizer spreader (see How To Apply and settings below) to ensure even coverage.
- 5. If it does not rain for three days after application, water the treated area thoroughly to get desired results. Timing application just ahead of a predicted rain is ideal.

HOW TO APPLY

For best crabgrass control, this product must be applied evenly over your lawn without skips or misses. Determine the correct amount for your lawn area. Do not over-apply or under-apply. Apply the contents of one bag to every 5,000 sq. ft. of lawn area (for example, 50 ft. x 100 ft. = 5,000 sq. ft.). If your lawn measures 100 ft. x 100 ft. (or 10,000 sq. ft.) two bags are sufficient.

- 1. Using the Recommended Setting below (calculated to apply one-half rate), spread one-half of the required amount of this product for your lawn, moving at a steady rate in one direction.
- 2. Spread the other half of the required amount over the same area, moving across or at right angles to the first application. This minimizes skips and overlaps, ensuring good coverage. When turning or stopping spreader, close spreader gate.
- 3. Where this two-step procedure is not practical, apply in one trip over the lawn using the One-Step Settings listed below. Be careful to cover lawn completely, since crabgrass can grow in spots which are missed.

[Note: Registrant/Subregistrant may insert appropriate spreader setting information based on desired spreaders and recommended use rates.]

NOTE: Above spreader settings are approximate. Check your spreader on 100 sq. ft. and adjust to apply 2.8 oz. at 1.75 lb. (Two-Step) setting, 5.6 oz. at 3.5 lb. (One-Step) setting. Rate of walk, moisture and spreader condition can vary the spreader setting necessary to apply the correct amount.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store product in its original container in a cool, dry, locked place out of the reach of children and animals.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container.

IF EMPTY: Place in trash or offer for recycling if available. **IF PARTLY FILLED:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY IMPORTANT: READ BEFORE USE

Optional Spreader Directions:

Determining Your Lawn's Square Footage

To determine how much of this product to apply, you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn, figuring that one pace equals about 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.

Spreader Tips

For the best application results, use an AGWAY spreader. The two main types of spreaders are the Drop Spreader, which drops the material straight down the width of the spreader as you push, and the Broadcast Spreader (also know as a rotary), which throws the material from the spreader.

Drop Spreader: First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the long part of the lawn. For uniform coverage, it's a good idea to overlap wheel marks. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped.

Broadcast Spreader: To start or stop the spreader, slide the shut-off lever to the closed position. You can avoid misses by ensuring that there is some slight overlapping.
