HERBICIDE (2,4-D and SILVEX) WITH 12-4-8 FERTILIZER

FOR PROFESSIONAL USE

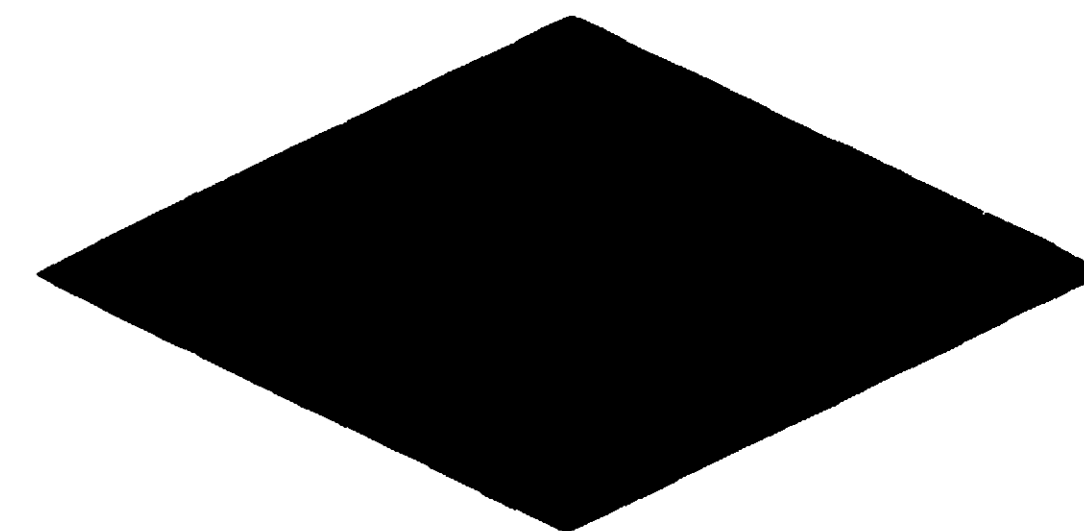

A combination product that contains 12-4-8 fertilizer and two herbicide chemicals (2,4-D and Silvex) for the control of turf weeds such as: Dandelion, Plantain, Buckhorn, Shepherds Purse, Chickweed, Stitchwort, Knotweed, Clover, Sheep Sorrel, Henbit, Wild Onion, Ground Ivy, Mallow and other similar broadleaf weeds in golf course fairways, aprons, tees, roughs and other turf (not pasture) areas.

HOW TO USE

1. Apply uniformly at the rate of 375 lbs. per acre or 8.6 lbs. per 1000 sq. ft. with a fertilizer spreader. This rate gives the recommended herbicide treatment.
2. For best results, apply when the weeds are growing actively during the spring and fall seasons. Do not apply to newly seeded areas.
Increased effectiveness is obtained by applying when the grass is moist such as early in the morning after a dew or following a shower. Avoid, if possible, applying ahead of a heavy rain.
3. Do not apply under the dripline of trees or shrubs especially dogwood, willow and sycamore. Avoid drift of dust to susceptible plants. Be careful that herbicide does not come in contact with the trunk of trees or shrubs.
Do not apply to Centaurea, Centaurea, St. August, and other susceptible plants in the immediate vicinity.

1. Apply uniformly at the rate of 375 lbs. per acre or 8.6 lbs. per 1000 sq. ft. with a fertilizer spreader. This rate gives the recommended herbicide treatment.
2. For best results, apply when the weeds are growing actively during the spring and fall seasons. Do not apply to newly seeded areas.
3. Increased effectiveness is obtained by applying when the grass is moist such as early in the morning after a dew or following a shower. Avoid, if possible, applying ahead of a heavy rain.
4. Do not apply under the dripline of trees or shrubs especially dogwood, willow and locust trees. Avoid drift of dust to susceptible plants. Be careful that water from treated areas does not accumulate around trees or shrubs.
5. Do not apply on Dichondra, Centipede, St. Augustine, or Carpet grasses. Temporary injury may be experienced on Bentgrass. Vapors from this product may injure susceptible plants in the immediate vicinity.

CAUTION

May cause irritation of eyes, nose, throat, and skin. In case of contact with skin or eyes, flush with plenty of water; for eyes get medical attention.

If grass clippings from the first mowing after use of this product are removed, do not feed to livestock or use to mulch ornamental shrubs.

Do not contaminate water used for domestic or irrigation purposes.

Do not store near fertilizers, seeds, insecticides or fungicides.

This product is toxic to fish. Keep out of lakes, streams or ponds.

Do not reuse container. Destroy when empty.

SUGGESTED SPREADER SETTINGS

Spreader	Speed		Width of Coverage	Settings	
	Ground MPH	PTO RPM		Regular (1#N.)	Half (½#N.)
Jet Spred	3		8 ft.	6	4½
Cyclone	3		8 ft.	6	4½
Ezee Flow (109)	5	540	30 ft.	A5	C3
Lely (HR)	3	425	39 ft.	7II	5II
Lely (W)	3	425	39 ft.	7II	5II
Scotts (Drop Type)	3			6	4½
Scotts (Rotary)	3		6 ft.	M	H

These settings were calibrated and field tested. However, age and condition of spreader, speed of operation, and evenness of terrain may require slightly different settings for desired coverage.

WARRANTY

The Bishop Company makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. The buyer assumes all risks; including injury or damage, arising out of the storage, handling and/or use of the product when not in strict accordance with directions given herewith.
