FERTILIZER

16-8-8 WITH HERBICIDE

HOW TO USE

1. Apply uniformly at the rate of 275 lbs. per acre with a fertilizer spreader. This rate gives the recommended herbicide treatment.
2. For best results, apply when the weeds are growing actively during the spring and fall seasons.
3. Increased effectiveness is obtained by applying when the grass is moist such as early in the morning after a dew or following a shower. Avoid, if possible, applying ahead of a heavy rain.
4. Do not apply under the dripline of trees or shrubs especially dogwood, willow, and locust trees. Avoid drift of dust to susceptible plants. Be careful that water from treated areas does not accumulate around trees or shrubs.
5. Do not apply on Dichondra, Centipede, St. Augustine, or Carpet grasses. Temporary injury may be experienced on Bentgrass.

CAUTION

May cause irritation of eyes, nose, throat and skin. In case of contact with skin, or eyes, flush with plenty of water; for eyes get medical attention.

If grass clippings from the first mowing after use of this product are removed, do not feed to livestock or use to mulch ornamental shrubs.

Do not store near fertilizers, seeds, insecticides, or fungicides.

Do not reuse container. Destroy when empty.

WARRANTY

Agri-Chemical Division, Continental Oil Company makes no warranty, expressed or implied, except that this product conforms to the chemical description on the label. Agri-Chemical Company shall not be held responsible in any manner for any personal injury or property damage or other type of loss resulting from the handling, storage, or use of this product. The buyer assumes all risk and liability therefrom and hereby uses this product on these conditions.
