LONG LASTING - NON SELECTIVE WEED KILLER

ACTIVE INGREDIENTS

Monuron [3-(p-chlorophenyl)-1,1-dimethylurea]
trichloroacetate

12.47%

INERT INGREDIENTS

87.53%

Contains 1.03 lbs active ingredient per gallon

A-RID may be used for the control of most annual and perennial grasses, broad leafed weeds, and general weed control on non-crop land such as: right of ways, industrial plants, lumber yards, schools, storage and parking areas etc.

Best results will be attained if A-RID is applied shortly before or at the time plant growth begins. Water thoroughly after applying to move chemical to the root zone and speed up action. The effectiveness and length of time chemical will last, depends on type of soil, amount of rain, and other conditions.

CAUTION: Keep out of reach of children

DO NOT USE OR STORE NEAR HEAT OR OPEN FLAME. Harmful if swallowed. Irritating to skin and eyes. Do not get on skin, eyes or clothing. In case of contact, immediately wash with plenty of water; for eyes, flush with water for at least 15 minutes and get medical attention.

DIRECTIONS: For one acre (43,560 sq. ft.) mix 20 gals A-RID with 80 gals water and apply evenly throughout area. For very heavy vegetation, a second application should be made 10 days later. For smaller areas, use 6 oz. A-RID to one qt. water to treat 100 square feet.

Best results will be had if area is mowed and free of debris before applying A-RID. Apply in a coarse, wet spray to avoid drift.

NOTE: Do not apply, allow to drift, drain or flush onto or near croplands, lawns, trees or desirable plants, or to areas where their roots might extend. Do not contaminate water or irrigation ditches. Do not allow contact with seeds, fertilizers, insecticides or fungicides. Clean equipment with detergent and water after use to avoid corrosion. Do not use application equipment for insecticides, fertilizers or other agricultural chemicals, as any residue might injure plants.

Destroy container when empty.

DIRECTIONS FOR USE

Use this product only on St. Augustine, Centipede and Zoysia lawns.

1. To control weeds and fertilize the grass, apply anytime the weeds are growing actively at the rate of 5.2 lbs. per 1000 sq. ft.

Apply to the lawn with a broadcast fertilizer spreader. Do not apply to wet lawns. Do not apply to lawns that have been recently fertilized with phosphorus. Do not apply to lawns that have been recently treated with herbicides.

A second application may be needed, however, not about 2 weeks after the first.
