**GENERAL INFORMATION**

**HOW TO APPLY**

On garden areas being prepared for subsequent planting, first loosen soil thoroughly, remove all visible weeds and smooth surface. Apply this product at the recommended rate over the surface uniformly, and rake or spade the product into the soil to a depth of 2 to 3 inches. Subsurface incorporation should be done in two directions, at right angles to each other, to insure uniform distribution of particles. Shallow cultivation during the growing season will not reduce effectiveness.

On established plantings, remove all visible weeds, and then apply this product at the recommended rate uniformly over the soil surface. Rake the product into the soil, being careful not to disturb the established plants or roots.

Allow untreated area for planting of corn, squash and other vegetables not specified for treatment.
