GENERAL INFORMATION

This turf fertilizer product contains TEAM, a preemergence herbicide which is applied to established turfgrasses for the control of the winter annual grass: Annual Bluegrass (*Poa annua*); and summer annual grasses: Smooth and Hairy Crabgrass, Goosegrass (silver crabgrass or crowfootgrass), Barnyardgrass (watergrass) and Green and Yellow Foxtail. This product also provides partial control of prostrate spurge (*Euphorbia humistrata*), spotted spurge (*Euphorbia maculata*), creeping spurge (*Euphorbia serpens*), creeping woodsorrel (*Oxalis corniculata*) and yellow woodsorrel (*Oxalis stricta*).

This Product Is Recommended For Use On The Following Established Warm and Cool Season Perennial Turfgrass Species:

Established Cool Season Turfgrasses - Bentgrass Fairways, Kentucky Bluegrass, Perennial Ryegrass, Fescues

Established Warm Season Turfgrasses - Bahiagrass, Bermudagrass, Centipedegrass, St. Augustinegrass, Zoysiagrass.

This product should be applied one to two weeks prior to the anticipated germination of the target annual weeds. Apply using a properly calibrated granular fertilizer spreader which will uniformly distribute the product over the target area. Avoid skips and excessive overlaps as poor weed control or turfgrass injury may occur. Optimum weed control performance will be obtained if treated areas are irrigated soon after application. This product will not harm most nearby ornamentals.

In areas with extended growing seasons or where desired, a second application at the recommended rate can be made 8 to 10 weeks following the initial application on cool season turfgrasses and 10 to 12 weeks following the initial application on warm season turfgrasses.

GENERAL PRECAUTIONS AND RESTRICTIONS

Do Not Ship or Store with Food, Feeds, Drugs or Clothing.

Reseeding: Chemicals that effectively control annual weed seeds may also affect new desirable turfgrass seedlings. Do not reseed treated areas for a minimum of 8 weeks after a single application of 4 lbs. per 1,000 sq. ft. (174 lbs. per acre) or 12 to 16 weeks after a single application of 6 lbs. per 1,000 sq. ft. (260 lbs. per acre). For split applications, do not reseed treated areas for 8 to 10 weeks after the last 3 lbs. per 1,000 sq. ft. rate (130 lbs. per acre) or 10 to 12 weeks after the last 4 lbs. per 1,000 sq. ft. rate (174 lbs. per acre).

Use caution to confine product to intended application area, as the active ingredients may stain concrete, plastic or other materials.

Do not apply this product to golf course putting greens, dichondra, or newly sprigged areas of Bermudagrass, St. Augustinegrass, Centipedegrass, or Zoysiagrass.

Any cultural practices that disturb the soil, such as aerification or verticutting, should be done prior to application.
