Subject: Label Amendment
EPA Reg. No.: 961-348
Lebanon Lawn Fertilizer with Team Crabgrass Control

Dear Ms. Covert,

The Agency has received your application for an amendment to the subject labeling, dated December 28, 2009. The label described above, submitted under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable, provided you make the following modifications:

1. Remove the following marketing claims and logos: Nutri-Life, Green-Smart Technology, and Green-Smart Formula. The Agency considers these to be implied safety claims, and they are not acceptable.
2. On page 13, remove the following text: "Notice: Buyer assumes all responsibility for safety and use not in accordance with directions." This conflicts with the mandatory statement, "It is a violation of Federal Law to use this product in a manner inconsistent with its labeling."
3. While no additional data is being requested at this time, marketing claims made on the pesticide label must be substantiated by data maintained in your files. If data supporting marketing claims made on the product label is not available then those claims must be removed.

This labeling supersedes all previous accepted labeling for this product. Please submit one (1) copy of the final printed label before the product is released for shipment. If you have any questions, please contact Kathryn Montague (703-305-1243 or montague.kathryn@epa.gov).

Sincerely,

A handwritten signature in black ink that reads "Kathryn V. Montague".

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals.

Personal Protective Equipment (PPE)

All loaders, applicators and other handlers must wear:

- Long-sleeved shirt and long pants,
- Socks plus shoes, and
- Chemical-resistant gloves made of any waterproof material.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

- IF ON SKIN:** • Take off contaminated clothing.
- OR CLOTHING:** • Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
- IF SWALLOWED:** • Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.
- IF IN EYES:** • Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.
- IF INHALED:** • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For Emergency Medical Information call (888) 208-1368.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to freshwater, marine, and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply in a manner that will directly expose canals, lakes, streams, ponds, marshes or estuaries to aerial drift. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

Optional Headings [Quality Results]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all directions carefully before applying this product.

4/16

PRODUCT INFORMATION

This turf fertilizer product contains TEAM, a preemergence herbicide which is applied to established turfgrasses for the control of the winter annual grass: Annual Bluegrass (*Poa annua*); and summer annual grasses: Smooth and Hairy Crabgrass, Goosegrass (silver crabgrass or crowfootgrass), Barnyardgrass (watergrass) and Green and Yellow Foxtail. This product also provides partial control of Prostrate Spurge (*Euphorbia humistrata*), Spotted Spurge (*Euphorbia maculata*), Creeping Spurge (*Euphorbia serpens*), Creeping Woodsorrel (*Oxalis corniculata*) and Yellow Woodsorrel (*Oxalis stricta*).

This Product Is Recommended For Use On The Following Established Warm and Cool Season Perennial Turfgrass Species:

Established Cool Season Turfgrasses - Bentgrass Fairways, Kentucky Bluegrass, Perennial Ryegrass, Fescues

Established Warm Season Turfgrasses - Bahiagrass, Bermudagrass, Centipedegrass, St. Augustinegrass, Zoysiagrass.

This product should be applied one to two weeks prior to the anticipated germination of the target annual weeds. Apply using a properly calibrated granular fertilizer spreader which will uniformly distribute the product over the target area. Avoid skips and excessive overlaps as poor weed control or turfgrass injury may occur. Optimum weed control performance will be obtained if treated areas are irrigated soon after application. This product will not harm most nearby ornamentals.

In areas with extended growing seasons or where desired, a second application at the specified rate can be made 8 to 10 weeks following the initial application on cool season turfgrasses and 10 to 12 weeks following the initial application on warm season turfgrasses.

Cool Season Turf: Maximum of 1.5 lbs. a.i. per acre per application. Maximum of 2 applications per year. Maximum of 3 lbs. a.i. per acre per year.

Warm Season Turf: Maximum of 3 lbs. a.i. per acre per application. Maximum of 2 applications per year. Maximum of 6 lbs. a.i. per acre per year.

PRODUCT PRECAUTIONS AND RESTRICTIONS

NOT FOR USE ON PLANTS GROWN FOR SALE OR OTHER COMMERCIAL USE, OR FOR COMMERCIAL SEED PRODUCTION, OR FOR RESEARCH PURPOSES. FOR USE ON PLANTS INTENDED FOR AESTHETIC PURPOSES OR CLIMATIC MODIFICATION AND BEING GROWN IN ORNAMENTAL GARDENS OR PARKS, OR ON GOLF COURSES OR LAWNS AND GROUNDS.

Do Not Ship or Store with Food, Feeds, Drugs or Clothing.

Application Restrictions: Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during applications.

Entry Restrictions: This product must be watered in as soon as possible after application. Do not enter or allow people (or pets) to enter the treated area until dusts have settled. Except for those people involved in the watering-in - do not enter or allow other people (or pets) to enter the treated areas until the watering-in is complete and the surface is dry.

Reseeding: Chemicals that effectively control annual weed seeds may also affect new desirable turfgrass seedlings. Reseeding should be delayed for a least 8 weeks after application. When using at the highest specified rate, reseeding should be delayed 12 to 16 weeks after application.

Use caution to confine product to intended application area, as the active ingredients may stain concrete, plastic or other materials.

Do not apply this product to golf course putting greens, dichondra, or newly sprigged areas of Bermudagrass, St. Augustinegrass, Centipedegrass or Zoysiagrass.

All of the Summer annual grasses do not germinate at the same time. If application timing does not coincide with the normal germination period of any of the annual grass weeds listed on this label, weed control results may be erratic or poor.

Any cultural practices that disturb the soil, such as aerification or verticutting, should be done prior to application.

APPLICATION INSTRUCTIONS

For most effective annual weedgrass control, make application uniformly over your lawn area with no skips or misses; annual weedgrass will be uninhibited in untreated areas. Do not over-apply or under-apply. Early morning applications when the wind is calm and dew is on the ground are ideal. Wheel tracks are easy to follow and granules can be spread uniformly.

Broadcast Application Rates:

For Preemergence Weed Control of:	Product Application Rate	Specific Use Directions
Spring Germinating Annual Grasses - including Crabgrass, Foxtail, Barnyardgrass	Northern (Cool Season) Turfgrass 3 lbs. per 1,000 sq. ft.	Apply in Spring, 1 to 2 weeks prior to the onset of conditions favorable for annual weed grass seed germination.
	Southern (Warm Season) Turfgrass 3 to 4.5 lbs. per 1,000 sq. ft.	Apply in late Winter or early Spring 1 to 2 weeks prior to the onset of conditions favorable for annual weed grass seed germination.
Late Spring, Early Summer Germinating Annual Grasses - including Goosegrass	Northern (Cool Season) Turfgrass 3 lbs. per 1,000 sq. ft.	Goosegrass normally germinates 4 to 6 weeks later than crabgrass, foxtails, etc. Time applications accordingly, in late Spring or early Summer, 1 to 2 weeks prior to the expected germination of goosegrass.
	Southern (Warm Season) Turfgrass 3 to 4.5 lbs. per 1,000 sq. ft.	
Poa Annua (Annual Bluegrass)	Northern (Cool Season) Turfgrass 3 lbs. per 1,000 sq. ft.	Apply in late Summer or early Fall and again in late Winter or Spring, 1 to 2 weeks prior to the expected germination of annual bluegrass.
	Southern (Warm Season) Turfgrass 4.5 lbs. per 1,000 sq. ft.	Apply in late Summer or early Fall 1 to 2 weeks prior to the expected germination of annual bluegrass. A second application of 6 lbs. per 1,000 sq. ft. can be made 10 to 12 weeks after initial treatment for extended control.

SUGGESTED SPREADER SETTINGS

[Note: Registrant/Subregistrant may insert appropriate spreader setting information based on desired spreaders and specified use rates as listed above.]

These settings were calibrated and field tested. However, age and condition of spreader, speed of operation, and evenness of terrain may require slightly different settings for desired coverage.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store product in its original container in a cool, dry, locked place out of the reach of children and animals.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Completely empty container into application equipment. Then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration or, if allowed by State and local authorities, by burning. If burned stay out of smoke.

WARRANTY

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Lebanon Seaboard Corporation. All such risks shall be assumed by the user or buyer.

CLAIMER OF WARRANTIES: To the extent consistent with applicable law, LEBANON SEABOARD CORPORATION MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION

Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals.

Personal Protective Equipment (PPE)

All loaders, applicators and other handlers must wear:

- Long-sleeved shirt and long pants,
- Socks plus shoes, and
- Chemical-resistant gloves made of any waterproof material.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

- IF ON SKIN:** • Take off contaminated clothing.
- OR CLOTHING:** • Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.
- IF SWALLOWED:** • Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.
- IF IN EYES:** • Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.
- IF INHALED:** • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For Emergency Medical Information call (888) 208-1368.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to freshwater, marine, and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply directly to water. Do not apply in a manner that will directly expose canals, lakes, streams, ponds, marshes or estuaries to drift or runoff. Do not contaminate water when disposing of equipment washwaters.

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather will help to ensure that wind does not blow pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies and drainage systems.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Read all directions carefully before applying this product.

- For best results, use an Agway spreader.

XX% Nitrogen - Provides leaf growth and makes the grass green; [For dense green lawn]

XX% Phosphate - Promotes root development; [Improves root growth]

XX% Potassium - Vital for Growth & Drought Resistance

XX% Potash - Helps plant resist drought and disease

(Percentages dependent on fertilizer analysis used by manufacturer.)

Optional Spreader Directions:

Determining Your Lawn's Square Footage

To determine how much of this product to apply, you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn, figuring that one pace equals about 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.

Spreader Tips

For the best application results, use an AGWAY spreader. The two main types of spreaders are the Drop Spreader, which drops the material straight down the width of the spreader as you push, and the Broadcast Spreader (also know as a rotary), which throws the material from the spreader.

Drop Spreader: First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the long part of the lawn. For uniform coverage, it's a good idea to overlap wheel marks. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped.

Broadcast Spreader: To start or stop the spreader, slide the shut-off lever to the closed position. You can avoid misses by ensuring that there is some slight overlapping.

Optional Spreader Language:

The above spreader settings are approximate.

To check your spreader: 1 lb. of material should cover approximately 333 sq. ft. (3 lbs. of material per 1,000 sq. ft.)

Note: if your spreader model does not appear above please call 800-233-1067, 8am - 5pm EDT, Monday - Friday for additional model settings.

Additional Labeling Requirements:

If the fertilizer guarantee contains iron, the following statement must appear:

This product contains the secondary nutrient iron. Iron may stain concrete and should not be applied on dry or water dampened concrete and should be removed from these areas promptly after application by sweeping or blowing. Do not wash off with water.

If the recommended use rate applies less than 1 pound nitrogen per 1,000 sq. ft. per application, the following statement must appear:

Note: Supplemental applications of lawn fertilizer are needed to achieve a minimum 1 pound nitrogen per 1,000 sq. ft.

For products distributed in the State of Washington, the following statement must appear:

Information regarding the contents and levels of metals in this product is available on the Internet at <http://www.regulatory-info-lebsea.com>

Optional Marketing Claims

12/16

1. Grow healthier plants faster
2. Promotes root growth for a thicker, greener lawn
3. Promotes root growth and increases root mass for a thicker, greener lawn
4. Zero phosphate helps protect our waterways
5. Zero Phosphate formulation
6. No phosphate helps protect our waterways
7. Easier on the gardener & increases the likelihood of success
8. Gets more nutrients into the plant, not just the soil
9. Promotes root growth & stronger, deeper roots – enhancing nutrient absorption by grass roots
10. Improved Nitrogen Efficiency – Reduces Leaching
11. Provides your soil with nutrients
12. Restores nutrients to your soil
13. The fertilizer that improves efficiency and lowers application rates providing high quality turf at a reduced cost
14. Enhances seedling establishment
15. Increases root mass
16. Enhances nutrient absorption
17. Enhances nutrient absorption for stronger, deeper roots
18. Easier on the gardener for a greener, thicker lawn
19. Easier way to a greener, thicker lawn
20. Easy way to a greener, thicker lawn
21. Easy way to a thick, green lawn
22. The Easy Way To A Greener, Thicker Lawn
23. Feeds, greens and thickens lawns while preventing crabgrass and other grassy weeds.
24. Feeds up to 8 weeks
25. Feeds your Lawn for 8 weeks
26. Feeds lawn with a slow release fertilizer
27. Feeds, Greens and Thickens Lawns
28. Increases nutrient uptake thereby increasing root mass
29. Larger and stronger root system results in a more robust plant [lawn] and reduces the negative effects of stress such as drought on the turf [lawn]
30. Formulated to release nutrients [fertilizer] to the plants for easy absorption [uptake]
31. Allows the use of less Nitrogen
32. Increase nutrient uptake in grass up to 20%
33. Enhances nutrient absorption by grass roots, promoting root growth & stronger, deeper roots
34. Puts more nutrients into the plant, with less leaching from the soil
35. 20% less nutrients required for the same great lawn results
36. Improved nutrient release and absorption into the lawn allows 20% less nutrients to be applied while still providing quality lawn
37. Lowers your cost of fertilizing for the same great lawn results
38. 20% lower rates of applied nutrients results in lower costs while still getting more of the applied nutrients absorbed into the plant so less can be applied at a lower cost
39. Reduces stress on lawns, protecting them from drought & heat

- 40. Requires less watering by growing deeper, stronger roots
- 41. Requires less watering
- 42. Less water needed
- 43. Less watering needed
- 44. Less watering needed, drought resistant
- 45. Reduces plant [lawn] stress related to drought
- 46. Reduces plant [lawn] stress related to drought, more nutrient absorption
- 47. Reduces Stress On Lawns, Protects From Drought & Heat
- 48. Reduces plant stress related to drought, poor nutrient response
- 49. Utilizes less fertilizer
- 50. Faster establishment
- 51. Enhances nutrient absorption by grass roots, promoting root growth & stronger, deeper roots
- 52. More robust plants [lawn] with more nutrients and deeper roots are more colorful and grow to a thicker lawn
- 53. Allows for easier nutrient uptake into the plant [lawn] thus promoting stronger and deeper rooting
- 54. Improved nutrient release and absorption results in more nutrients in the plant [lawn] [turf] for healthy strong roots
- 55. Improved nutrient release makes it easy on plants [lawns] [turf] to absorb nutrients, making it easy for plants [lawns] [turf] to grow more colorful
- 56. Gets more nutrients into the plant by restoring nutrients in the soil
- 57. Gets more nutrients into the plant by revitalizing the soil
- 58. Gets more nutrients into the lawn by making it easier for lawns to absorb
- 59. Gets more nutrients into the lawn by making it easier for lawns to absorb nutrients
- 60. Gets More Nutrients Into Lawns, Easier For Lawns To Absorb
- 61. Gets More Nutrients Into Lawns
- 62. Gets More Nutrients Into The Lawn, Not Just The Soil
- 63. Easier For Lawns To Absorb
- 64. Enhances soil/nutrient availability & balance
- 65. Greater gardener satisfaction by increasing the likelihood of lawn success
- 66. Greater satisfaction by increasing the likelihood of lawn success
- 67. More nutrient absorption leads to stronger and deeper root systems that can take in water deeper from the soil resulting in a more robust lawn that is more drought resistant and requires less additional watering
- 68. Unlocks the nutrients in soil, enhancing nutrient absorption, reducing stress on lawns, protecting them from drought & heat
- 69. Unlocks the nutrients in soil, enhancing nutrient absorption, so you can grow a thicker, greener lawn with less water
- 70. Unlocks the nutrients in your soil
- 71. Prevents crabgrass before it grows
- 72. Controls crabgrass before it germinates.
- 73. Prevents Crabgrass and other Grassy Weeds
- 74. Controls Crabgrass before it grows [pictogram of crabgrass]
- 75. Lowers your cost of fertilizing
- 76. Spring Crabgrass Control
- 77. For Use in Spring
- 78. A Selective Preemergence Herbicide for the Control of Crabgrass and Most Other Annual Weed Grasses on Lawns and Golf Courses.
- 79. In case of emergency endangering health or the environment involving this product, call 1-800-992-5994.
- 80. Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.
- 81. Refer to back panel for additional Precautionary Information and Directions for Use including Storage and Disposal.
