JUL 17 2012

Subject

Label Amendment

Product Name Lebanon Lawn Fertilizer with Team Crabgrass Control

EPA Reg No 961 348

Submission Dated April 2 2012

Dear Ms Covert

The labeling referred to above submitted in connection with registration under the Federal Insecticide Fungicide and Rodenticide Act (FIFRA) as amended is acceptable

Please note the following correction that should be made to the label

1 Please add the bracketed qualifier [on products containing no phosphorus] after marketing claims 4 5 and 6 on page 11 This will make it clear that these claims will only be made on labels for formulas with 0 00% phosphorus

A stamped copy of your label is enclosed for your records. This label supersedes all previously accepted labels. You must submit one (1) copy of the final printed label before you release the product for shipment. Products shipped after eighteen (18) months from the date of this letter or the next printing of the label, whichever occurs first must bear the new revised label. If these conditions are not complied with the registration will be subject to cancellation in accordance with FIFRA §6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Should you wish to add/retain a reference to the company's website on your label then please be aware that the website becomes labeling under the FIFRA and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA§12(a)(1)(E). 40CFR§156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your products label claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you have any questions please contact Emily Hartman of my staff at (703) 347 0189 or hartman emily@epa gov

Optional Headings [Care & Handling]

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS CAUTION

Harmful if absorbed through skin. Avoid contact with skin leyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reaction in some individuals.

Personal Protective Equipment (PPE)

All loaders applicators and other handlers must wear

Long sleeved shirt and long pants

Socks plus shoes and

Chemical resistant gloves made of any waterproof material

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Wash hands before eating drinking chewing gum using tobacco or using the toilet

Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing

Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

FIRST AID

IF ON SKIN

Take off contaminated clothing

OR CLOTHING

Rinse skin immediately with plenty of water for 15 20 minutes

Call a poison control center or doctor for treatment advice

IF SWALLOWED

Call a poison control center or doctor immediately for treatment advice

Have person sip a glass of water if able to swallow

Do not induce vomiting unless told to do so by a poison control center or doctor

Do not give anything by mouth to an unconscious person

IF IN EYES

Hold eye open and rinse slowly and gently with water for 15 20 minutes

Remove contact lenses if present after the first 5 minutes then continue rinsing eye

Call a poison control center or doctor for treatment advice

IF INHALED

Move person to fresh air

If person is not breathing call 911 or an ambulance then give artificial respiration preferably by mouth to mouth if possible

Call a poison control center or doctor for further treatment advice

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For Emergency Medical Information call (888) 208 1368

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to freshwater marine and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply in a manner that will directly expose canals lakes streams ponds marshes or estuaries to aerial drift. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Duff and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

Optional Headings [Quality Results]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling Read all directions carefully before applying this product

5/20

PRODUCT INFORMATION

This turf fertilizer product contains TEAM a preemergence herbicide which is applied to established turfgrasses for the control of the winter annual grass Annual Bluegrass (*Poa annua*) and summer annual grasses Smooth and Hairy Crabgrass Goosegrass (silver crabgrass or crowfootgrass) Barnyardgrass (watergrass) and Green and Yellow Foxtail This product also provides partial control of Prostrate Spurge (*Euphorbia humistrata*) Spotted Spurge (*Euphorbia maculata*) Creeping Spurge (*Euphorbia serpens*) Creeping Woodsorrel (*Oxalis corniculata*) and Yellow Woodsorrel (*Oxalis stricta*)

This Product Is Suggested For Use On The Following Established Warm and Cool Season Perennial Turfgrass Species

Established Cool Season Turfgrasses Bentgrass Fairways Kentucky Bluegrass Perennial Ryegrass Fescues **Established Warm Season Turfgrasses** Bahiagrass Bermudagrass Centipedegrass St Augustinegrass Zoysiagrass

This product should be applied one to two weeks prior to the anticipated germination of the target annual weeds. Apply using a properly calibrated granular fertilizer spreader which will uniformly distribute the product over the target area. Avoid skips and excessive overlaps as poor weed control or turfgrass injury may occur. Optimum weed control performance will be obtained if treated areas are irrigated soon after application. This product will not harm most nearby ornamentals.

In areas with extended growing seasons or where desired a second application at the specified rate can be made 8 to 10 weeks following the initial application on cool season turfgrasses and 10 to 12 weeks following the initial application on warm season turfgrasses

Cool Season Turf Maximum of 1 5 lbs a i per acre per application Maximum of 2 applications per year Maximum of 3 lbs a i per acre per year Warm Season Turf Maximum of 3 lbs a i per acre per application Maximum of 2 applications per year Maximum of 6 lbs a i per acre per year

PRODUCT PRECAUTIONS AND RESTRICTIONS

NOT FOR USE ON PLANTS GROWN FOR SALE OR OTHER COMMERCIAL USE OR FOR COMMERCIAL SEED PRODUCTION OR FOR RESEARCH PURPOSES FOR USE ON PLANTS INTENDED FOR AESTHETIC PURPOSES OR CLIMATIC MODIFICATION AND BEING GROWN IN ORNAMENTAL GARDENS OR PARKS OR ON GOLF COURSES OR LAWNS AND GROUNDS

Do Not Ship or Store with Food Feeds Drugs or Clothing

Application Restrictions Do not apply this product in a way that will contact workers or other persons either directly or through drift. Only protected han diers may be in the area during applications

Entry Restrictions This product must be watered in as soon as possible after application. Do not enter or allow people (or pets) to enter the treated area until dusts have settled. Except for those people involved in the watering in do not enter or allow other people (or pets) to enter the treated areas until the watering in is complete and the surface is dry

Reseeding Chemicals that effectively control annual weed seeds may also affect new desirable turfgrass seedlings. Reseeding should be delayed for a least 8 weeks after application. When using at the highest specified rate, reseeding should be delayed 12 to 16 weeks after application.

Use caution to confine product to intended application area as the active ingredients may stain concrete plastic or other materials

Do not apply this product to golf course putting greens dichondra or newly sprigged areas of Bermudagrass St Augustinegrass Centipedegrass or Zovsiagrass

All of the Summer annual grasses do not germinate at the same time. If application timing does not coincide with the normal germination period of any of the annual grass weeds listed on this label, weed control results may be erratic or poor.

Any cultural practices that disturb the soil such as aerification or verticutting should be done prior to application

APPLICATION INSTRUCTIONS

For most effective annual weedgrass control make application uniformly over your lawn area with no skips or misses annual weedgrass will be uninhibited in untreated areas. Do not over apply or under apply Early morning applications when the wind is calm and dew is on the ground are ideal. Wheel tracks are easy to follow and granules can be spread uniformly

For Preemergence Weed Control of	Product Application Rate	Specific Use Directions	
Spring Germinating Annual Grasses including Crabgrass Foxtail Barnyardgrass	Northern (Cool Season) Turfgrass 3 lbs per 1 000 sq ft	Apply in Spring 1 to 2 weeks prior to the onset of conditions favorable for annual weed grass seed germination	
	Southern (Warm Season) Turfgrass 3 to 4 5 lbs per 1,000 sq ft	Apply in late Winter or early Spring 1 to 2 weeks prior to the onset of conditions favorable for annual weed grass seed germination	
Late Spring Early Summer Germinating Annual Grasses including Goosegrass	Northern (Cool Season) Turfgrass 3 lbs. per 1,000 sq. ft	Goosegrass normally germinates 4 to 6 weeks later than crabgrass foxtails etc Time applications accordingly in late Spring or early Summer 1 to 2 weeks prior to the expected germination of goosegrass	
	Southern (Warm Season) Turfgrass 3 to 4 5 lbs per 1 000 sq ft		
	Northern (Cool Season) Turfgrass 3 lbs per 1 000 sq ft	Apply in late Summer or early Fall and again in late Winter or Spring 1 to 2 weeks prior to the expected germination of annual bluegrass	
Poa Annua (Annual Bluegrass)	Southern (Warm Season) Turfgrass 4 5 lbs per 1 000 sq ft	Apply in late Summer or early Fall 1 to 2 weeks prior to the expected germination of annual bluegrass. A second application of 6 lbs per 1 000 sq. ft. can be made 10 to 12 weeks after initial treatment for extended control.	

SUGGESTED SPREADER SETTINGS

[Note Registrant/Subregistrant may insert appropriate spreader setting information based on desired spreaders and specified use rates as listed above]

These settings were calibrated and field tested However age and condition of spreader speed of operation and evenness of terrain may require slightly different settings for desired coverage

STORAGE AND DISPOSAL

Do not contaminate water food or feed by storage or disposal

Pesticide Storage Store product in its original container in a cool dry locked place out of the reach of children and animals Pesticide Disposal Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility Container Handling Nonrefillable container. Do not reuse or refill this container. Completely empty container into application equipment, then offer for recycling if avilable or dispose of empty bag in a sanitary landfill or by incineration or if allowed by State and local authorities by burning if burned stay out of smoke

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to freshwater marine and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply directly to water. Do not apply in a manner that will directly expose canals lakes streams ponds marshes or estuaries to drift or runoff. Do not contanimate water when disposing of equipment washwaters.

To protect the environment do not allow pesticide to enter or run off into storm drains drainage ditches gutters or surface waters. Applying this product in calm weather will help to ensure that wind does not blow pesticide off the treatment area. Sweeping any product that lands on a driveway sidewalk or street back onto the treated area of the lawn will help to prevent run off to water bodies and drainage systems.

(Percentages dependent on fertilizer analysis used by manufacturer)

Optional Spreader Directions [Note to the reviewer that the pictograms and text is all options in this section]

[Determining Your Lawn's Square Footage

To determine how much of this product to apply you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn figuring that one pace equals about 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.]

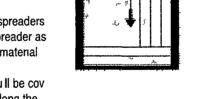

[Spreader Tips

For the best application results use an AGWAY spreader The two main types of spreaders are the Drop Spreader which drops the material straight down the width of the spreader as you push and the Broadcast Spreader (also know as a rotary) which throws the material from the spreader?

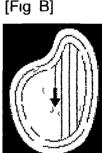

[Drop Spreader (See Fig A)First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the

long part of the lawn. For uniform coverage, it is a good idea to overlap wheel marks. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader it is also important to shut off the spreader when you are stopped.]

[Broadcast Spreader (See Fig B) Apply in a single pass by starting on the outside border and apply in a circular path working toward the center]

[Fig A]

Optional Spreader Language

The above spreader settings are approximate

To check your spreader 1 lb of material should cover approximately 333 sq ft (3 lbs of material per 1 000 sq ft)

Note if your spreader model does not appear above please call 800 233 1067 8am 5pm EDT Monday Friday for additional model se ings

Additional Labeling Requirements

1 If the fertilizer guarantee contains iron the following statement must appear

This product contains the secondary nutrient iron. Iron may stain concrete and should not be applied on dry or water dampened concrete and should be removed from these areas promptly after application by sweeping or blowing. Do not wash off with water

2 f the recommended use rate applies less than ρound nitrogen per 1 000 sq ft per application the following statement must appear Note Supplemental applications of lawn fertilizer are needed to achieve a minimum 1 pound nitrogen per 1 000 sq ft

3 For products distributed in the State of Washington the following statement must appear

Information regarding the contents and levels of metals in this product is available on the Internet at http://www.regulatory.info.lebsea.com

Optional Marketing Claims

- 1 Grow healthier plants faster
- 2 Promotes root growth for a thicker greener lawn
- 3 Promotes root growth and increases root mass for a thicker greener lawn
- 4 Zero phosphate helps protect our waterways
- 5 Zero Phosphate formulation
- 6 No phosphate helps protect our waterways
- 7 Easier on the gardener & increases the likelihood of success
- 8 Gets more nutrients into the plant not just the soil
- 9 Promotes root growth & stronger deeper roots enhancing nutrient absorption by grass roots
- 10 Improved Nitrogen Efficiency Reduces Leaching
- 11 Provides your soil with nutrients
- 12 Restores nutrients to your soil
- The fertilizer that improves efficiency and lowers application rates providing high quality turf at a reduced cost
- 14 Enhances seedling establishment
- 15 Increases root mass
- 16 Enhances nutrient absorption
- 17 Enhances nutrient absorption for stronger deeper roots
- 18 Easier on the gardener for a greener thicker lawn
- 19 Easier way to a greener thicker lawn
- 20 Easy way to a greener thicker lawn
- 21 Easy way to a thick green lawn
- The Easy Way To A Greener Thicker Lawn
- 23 Feeds greens and thickens lawns while preventing crabgrass and other grassy weeds
- 24 Feeds up to 8 weeks
- 25 Feeds your Lawn for 8 weeks
- 26 Feeds lawn with a slow release fertilizer
- 27 Feeds Greens and Thickens Lawns
- 28 Increases nutrient uptake thereby increasing root mass
- Larger and stronger root system results in a more robust plant [lawn] and reduces the negative effects of stress such as drought on the turf [lawn]
- Formulated to release nutrients [fertilizer] to the plants for easy absorption [uptake]
- 31 Allows the use of less Nitrogen
- 32 Increase nutrient uptake in grass up to 20%
- 33 Enhances nutrient absorption by grass roots promoting root growth & stronger deeper roots
- Puts more nutrients into the plant with less leaching from the soil
- 35 20% less nutrients required for the same great lawn results
- Improved nutrient release and absorption into the lawn allows 20% less nutrients to be applied while still on iding quality lawn
- 37 Lowers your cost of fertilizing for the same great lawn results
- 38 20% lower rates of applied nutrients results in lower costs while still getting more of the applied nutrients applied into the plant so less can be applied at a lower cost
- 39 Reduces stress on lawns protecting them from drought & heat

- 40 Requires less watering by growing deeper stronger roots
- 41 Requires less watering
- 42 Less water needed
- 43 Less watering needed
- 44 Less watering needed drought resistant
- 45 Reduces plant [lawn] stress related to drought
- 46 Reduces plant [lawn] stress related to drought more nutrient absorption
- 47 Reduces Stress On Lawns Protects From Drought & Heat
- 48 Reduces plant stress related to drought poor nutrient response
- 49 Utilizes less fertilizer
- 50 Faster establishment
- 51 Enhances nutrient absorption by grass roots promoting root growth & stronger deeper roots
- More robust plants [lawn] with more nutrients and deeper roots are more colorful and grow to a thicker lawn
- Allows for easier nutrient uptake into the plant [lawn] thus promoting stronger and deeper rooting
- Improved nutrient release and absorption results in more nutrients in the plant [lawn] [turf] for healthy strong roots
- Improved nutrient release makes it easy on plants [lawns] [turf] to absorb nutrients making it easy for plants [lawns] [turf] to grow more colorful
- Gets more nutrients into the plant by restoring nutrients in the soil
- 57 Gets more nutrients into the plant by revitalizing the soil
- Gets more nutrients into the lawn by making it easier for lawns to absorb
- Gets more nutrients into the lawn by making it easier for lawns to absorb nutrients
- 60 Gets More Nutrients Into Lawns Easier For Lawns To Absorb
- 61 Gets More Nutrients Into Lawns
- 62 Gets More Nutrients Into The Lawn Not Just The Soil
- 63 Easier For Lawns To Absorb
- 64 Enhances soil/nutrient availability & balance
- Greater gardener satisfaction by increasing the likelihood of lawn success
- 66 Greater satisfaction by increasing the likelihood of lawn success
- More nutrient absorption leads to stronger and deeper root systems that can take in water deeper from the soil resulting in a more robust lawn that is more drought resistant and requires less additional watering
- 68 Unlocks the nutrients in soil enhancing nutrient absorption reducing stress on lawns protecting them from drought & heat
- 69 Unlocks the nutrients in soil enhancing nutrient absorption so you can grow a thicker greener lawn with less water
- 70 Unlocks the nutrients in your soil
- 71 Prevents crabgrass before it grows
- 72 Controls crabgrass before it germinates
- 73 Prevents Crabgrass and other Grassy Weeds
- 74 Controls Crabgrass before it grows [pictogram of crabgrass]
