ł

Dimension[®] is a selective herbicide that provides control of listed annual grasses and broadleaf weeds in established lawns and ornamental turfs, including golf course fairways, roughs, and tee boxes.

ACTIVE INGREDIENTS:		
*Dithiopyr		0.19%
OTHER INGREDIENTS		
TOTAL		100.00%
*This product contains 0.095 lb. of the active ingredient, dithiopyr, per 50 lb. bag.	Cast	No. 97886-45-8
Product protected by U.S. Patent No. 4.692 184. Other patents pending		

Product protected by U.S. Patent No. 4,692,184. Utner pater

EPA Reg. No. 961-361

*Dimension is a registered trademark of Dow AgroSciences LLC.

READ THE ENTIRE LABEL BEFORE USING THIS PRODUCT.

USE ONLY ACCORDING TO LABEL INSTRUCTIONS.

Before buying this product, read the Warranty Section elsewhere on this label. If terms are not acceptable, return the unopened container to the place of purchase at once.

In New York State, this product may only be used by Professional Applicators at no more than 6.1 lbs. per 1000 sq. ft. (0.5 lb. active ingredient per acre) per year; and is prohibited for use in Nassau and Suffolk Counties.

KEEP OUT OF REACH OF CHILDREN CAUTION

See back panel for additional Precautionary Statements.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes eye irritation. Harmful if inhaled. Avoid contact with eyes or clothing. Avoid breathing dust. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Prolonged or frequently repeated skin contact while handling this material may cause allergic reaction in some individuals

FIRST AID

IF IN EYES: • Hold eye open and runse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.

IF INHALED: . Move person to fresh air.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
 Call a poison control center or doctor for further treatment advice.

• Casi a poison consol center of bootor for funner peaament advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For Emergency Medical Information call (888) 208-1368. For any other emergency involving this product, call day or night (800) 424-9300.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including cysters and shmmp. Use with care when applying to turf areas adjacent to any body of water. Drift and nunoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply directly to water, or to areas where surface water is present, or to interhal areas below the mean high water mark. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

NOT FOR USE ON TURF BEING GROWN FOR SALE OR OTHER COMMERCIAL USE AS SOD, OR FOR COMMERCIAL SEED PRODUCTION, OR FOR RESEARCH PURPOSES.

STORAGE AND DISPOSAL

STORAGE: Store this product only in its original container in a dry, cool, secured storage area. Do not contaminate water, foodstuffs, feed or seed by storage or disposal. PRODUCT DISPOSAL: Wastes resulting from the use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal, State or local procedures

EMPTY CONTAINER DISPOSAL: Do not reuse bag. Completely empty bag into application equipment. Dispose of emptied bag(s) in a santary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

SPILL: In case of spiil, sweep up material and dispose of material according to disposal directions listed above

GENERAL INFORMATION

This product is a selective herbicide that provides control of crabinass and other annual grasses and broadleaf weeds in established lawns and ornamental turts, including golf course farways, roughs, and tee boxes. This product will not harm nearby established ornamentals when used according to label directions.

USE PRECAUTIONS

This product may be used on seeuec, sodded, or sprigged lawns and ornamental turis that are well-established. The grass must have developed a good root system and a uniform stand, and have received at least two movings following its seecong, sodding, or sprigging before it can received at least have been weakened by weather, pest-, disease-, chemical-, or mechanical-related stress, may increase the chances for turf injury.

This product should only be applied to lawns and ornamental turbs that are composed of the following turbgrass species that have been determined to be tolerant to applications of this product. When applied as directed under the conditions described, the following established turbgrasses are tolerant to this product;

Cool-Season Grasses

Turlgrass Safety

ſ

Bentgrass, creeping" (Agrostis palustins) Bluegrass, Kentucky (Poa pratensis) Fescue, fine" (Festuca rubra) Fescue, tali (Festuca arunainacea) Rivegrass, perennial (Lolium perennei

<u>₩</u>	arm	I-Season	Gra	<u>sses</u>	
-		-			

Bahagrass (*Paspalum notatum*) Bermudagrass (*Cynodon dactylon*) Buffalograss^{***} (*Buchloe dactyloides*) Carpetgrass (*Axonopus affinis*) Centipedegrass (Eremochloa ophiuroides) Kikuyugrass (Pennisetum clandestinum) St. Augustinegrass (Stenotaphrum secundatum) Zoysiagrass (Zoysia japonica)

* Use of this product on certain varieties of creeping bentgrass, such as 'Cohansey', 'Carmen', 'Seaside', and 'Washington' may result in undestrable turfgrass injury. Not all varieties of creeping bentgrass have been tested. DO NOT apply this product to Colonial bentgrass (Agrostis tenus) varieties.

** Use of this production certain varieties of fine feacule may result in undesitable full injury. The following fine feacule varieties have been found to be sensitive to this product 'Atlanta', 'Banner', 'Begart', 'CF-2', 'Enjoy', 'HF-93', 'Highlight', 'Ivao', Jamestown, 'Koket', 'Majenta', 'Mary', 'Penniawn', 'Tatjana', 'Waldorf', and 'Waldina'. Not all varieties of fine feacule have been tested.

*** DO NOT use this product on secting buffalograss in the spring of the first year of establishment until the lurigrass is fully green and has established new roots.

NOTE: It is not possible to evaluate all turforass varieties for tolerance to Dimension. It is suggested that the user evaluate the response of turforass varieties to this product on a limited area, at recommended use rates, prior to instaling large-scale use

RESEEDING, OVERSEEDING, OR SPRIGGING

Reseading, overseeding, or sprigging of treated areas with this product should be delayed until 12 weeks from the time of application. Reseading, overseeding or sprigging before 12 weeks after application may prevent establishment of desirable turigrasses. When researing or overseeding, proper cultural practices such as soil cultivation, irrigation and fertilization should be followed. If overseeding with perennial ryegrass in the fall, overseed 8 weeks or later a tingle application. For best results, use mechanical or power seeding equipment (slit seeders) designed to give good seed to soil contact.

OTHER USE PRECAUTIONS

The early postemergence crabgrass control described below is limited. Postemergence applications are only effective on crabgrass if applied before crabgrass has displayed its fifth leaf or first tiller. For best results, cultural practices that disturb the soil, such as core-, spike-, or hydro-aerification, and verticutting, should be done before application of this product. DO NOT apply this product until the grass has recovered from these cultural practices

· DO NOT use clippings from treated turf for mulching around vegetables or fruit trees.

. Keep people and pets off treated areas until dust has settled.

APPLICATION DIRECTIONS

Control of Craborass

Preemargance and Early Postemargance Control

This product provides "preemergence" control of crabgrass (including the large, smooth, and southern species) when applied prior to the emergence of crabgrass from the ground in established lawns and ornamental turifs. It can also provide 'early postemergence' control of crabgrass, Postemergence crabgrass control will be obtained only when this product is applied prior to the tillering of crabgrass, which generally corresponds to the time when you can first see the crabgrass plants in the lawn or turt. The practical benefit of this product's early postemergence activity is that it can give the user a 2-4 week longer period of time to make applications to control crabgrass

Application Frequency and Timing

This product may be applied as a single application or as a split application for crabgrass control in the spring, summer, or fall.

Spring Applications

, w. •

For single applications made in the spring or early summer, this product should be applied at the appropriate rate corresponding to one of the control programs listed in Table 1 below, depending on the user's location, the turigrass moving height, and whether the use is preemergence or early postemergence at the time of the application. The duration of residual weed control provided by this product is directly related to the total rate applied, but will vary somewhat depending on weather, weed pressure, turigrass competitiveness, and the user's location within a region.

- Use Program 1 (given in Table 1, below) for preemergence control at sites where the turfgrass is cut high (e.g., homeowner lawns). This program provides 3-5 months of preemergence crabgrass control. This program should not be used for early postemergence crabgrass control.
- Use Program 2 for preemergence control at sites where (a) turfgrass is cut low (e.g., golf fairways), and (b) turfgrass maintenance or weed control has not been conducted during the previous year. This program provide 4-6 months of preemergence crabgrass control. This program may also be used for early posternergence control of crabgrass.
- · Where sofit fertilizer applications are recommended, a rate in Table 1 may be applied in two applications made 6-10 weeks apart and prior to crabgrass ernergence.

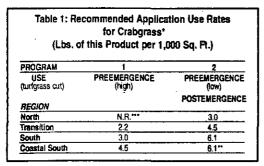

Table 2: Recommended Application Use Rates For Fail Applications (Lbs. of Product per 1,000 Sq. Pl.)			
REGION	Preemergance		
North	4.5		
Transition	6.1*		
South	6.1*		
Coastal South	6.1*		

FECIMEN

Fall Applications

This product can also be applied in the late summer or early fait (late August through November) at the use rates listed in Table 2 to provide control of crabgrass through the summer.

The fall application should be followed by an appropriate spring application to provide season-long control.

- *DO NOT apply more than 6.1 lbs. of this product per 1000 sq. ft. per application, and no more than 18.2 lbs. of this product per 1000 sq. ft. per year.
- In New York State, this product may only be used by Professional Applicators at no more than 6.1 lbs. per 1000 sq. ft. (0.5 b. active ingredient per acre) per year; and is prohibited for use in Nassau and Suffok Countier Postemergence control is limited; see "Crabgrass Control" and "Precautions" sections above, Regions include areas listed below.

North: Al other areas

Transition: DE, KS, KY, MD, MO, NJ, VA, southeastern PA, southern areas of IL, IN, OH, and coastal areas of CT, NY, and RI.

South: AL, AR, AZ, CA, GA, LA, MS, NC, NM, NY, OK, SC, TN, and TX. Coastal South: HI, FL, and southerm coastal areas of AL, GA, LA, MS, NC, SC, and TX.

** May require split or sequential applications for full control. *** N.R. - This formulation is not recommended.

Tips for Improved Control

For best results, apply this product within a few days after mowing and delay mowing again for a few days after the application.

When treated lawn or ornamental turh areas are watered or receive significant rainfall within a few days after application of this product, improved weed control may result.

Use of split (half-rate) applications spaced 6-8 weeks apart may provide improved weed control.

Control of Other Grass and Broadleaf Weeds

Spring Applications Used as directed for grabarass control in the spring (Table 1), this product will also control or suppress the following weeds when applied prior to their emergence: Barnvardorass Goosegrass Oxalis (buttercup, creeping & yellow woodsorrel) Smutgrass Bluegrass (annual, roughstalk) Kikuyugrass Pursiane (common) Speedwell (com) Source (prostrate & spotted) Crowtootorass Lespedeza (common) Riveorass (annual & perennial) Foxtail (yellow & green) * Also controlled at the Program 2 rates.

Fall Applications

Used as directed for late summer or early fail use, for crabgrass control through the early part of the next spring (Table 2), this product will also control or suppress the following weeds when applied prior to their emergence:

Bittercress Geranium (Carolina) Henbit Pineappleweed Shepherdspurse Bluegrass (annual, roughstalk) Chickweed Parsley-piert

APPLICATION EQUIPMENT INSTRUCTIONS

Apply this product with drop or rotary-type spreaders designed to apply granular herbroides. Avoid the use of spreaders that would apply this product in narrow rows or concentrated bands. Before each application, calibrate the spreader according to the equipment manufacturer's directions for adjusting the spreader settings such that the spreader delivers the appropriate application rate recommended above. Apply this product uniformly over the lawn or omamental furf area A more uniform application can be made by spreading half of the required amount over the area and then applying the remaining half at a right angle to the previous direction. Avoid streaking, skips, or overlaps during application. Check equipment frequently to ensure equipment is functioning properly and applying uniform distribution of granules.

NOTE: Supplemental applications of lawn fertilizer may be needed to achieve a minimum 1 pound nitrogen per 1,000 sq. ft.

CONDITIONS OF SALE AND WARRANTY

The Manufacturer warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label on the lab
