Subject: Notification per PRN 98-10 – Improve label text and graphic legibility (no new edits)
Product Name: Turf Broadleaf Weed Control
EPA Registration Number: 961-418
Application Date: May 1, 2020
Decision Number: 564366

Dear Mr. Wright:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, please contact Endia Blunt at 703-347-0788 or by email at Blunt.Endia@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Mindy Ondish".

Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.
- This product is intended for residential use.

**[Optional Heading:] [INSTRUCTIONS:] [Use Instructions:] [Application Directions]
[Application Instructions]**

[TURF Broadleaf Weed Control or This product] controls a wide range of listed lawn weeds which includes dandelion, chickweed, knotweed, plantain, henbit, spurge and many others commonly found in home lawns. Retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. If necessary make a second application after 30 days.

For use on established warm season turfgrasses - includes bermudagrass, centipedegrass, and zoysiagrass.

For use on established cool season turfgrasses - includes Kentucky bluegrass, perennial ryegrass, tall fescue, and turf-type tall fescues.

USE RESTRICTIONS:

Do not apply this product on carpetgrass, dichondra, St. Augustinegrass, or established turf containing desirable clovers.

Do not apply this product to newly seeded grasses until well-established or after the second or third mowing.

Reseeding or overseeding areas may occur three (3) weeks after the application of this product.

Do not use this product on or in close proximity to desirable plants and do not spread granules onto exposed root systems or adventitious shoots (rhizomes) within the drip line of the roots of desirable trees and shrubs, since injury may result.

Do not use this product on flowers, vegetables, groundcovers, gardens or landscape plantings which includes shrubs and trees. Do not exceed specified dosage for any area and do not apply this product within the dripline of or over surface roots of trees, shrubs, and other ornamentals.

Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street back onto the treated area. To prevent product run-off, do not over water the treated area(s) to the point of runoff or apply when raining or when rain is expected that day.

[HOW MUCH TO APPLY:]

The maximum broadcast application rate is 2.0 pounds of product per 1,000 sq.ft. per application [(1.2 lb 2,4-D ae, 0.27 lb MCP-p ae and 0.12 lb dicamba ae per acre per application)]. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 4.0 pounds of product per 1,000 sq.ft. [(2.4 lb 2,4-D ae, 0.54 lb MCP-p ae and 0.24 lb dicamba ae per acre)].

[WHEN TO APPLY:] [Note to reviewer one of the following statements will be on the label.]

Apply when listed broadleaf weeds are [actively] growing in spring or early fall.

[Apply when listed weeds are [actively] growing in spring]

[Apply when listed weeds are [actively] growing in fall]

[Apply when listed weeds are [actively] growing]

[Can be applied anytime listed weeds are growing]

Apply when the air is calm to ensure uniform coverage and do not spread granules onto flowers, vegetables, and ornamental shrubbery.

[WHAT TO EXPECT:] [APPLICATION INSTRUCTIONS:]

(Steps 1-5) – OPTION A:

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least 1 day before application to sustain moisture until the next watering (see step 5).
3. Apply when listed weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to allow the granules to adhere and to remain on the leaf surface of the weeds.
4. Do not apply when temperatures are consistently above 90°F.
5. Do not wash [this product] from weed leaves for 1 to 2 days after application. After 1 to 2 days, thoroughly water the lawn.

(Steps 1-5) – OPTION B:

1. Mow lawn to normal height, 1 to 2 days before application.
2. For best results lawn must be MOIST and the air calm, when product is applied. When the lawn is moist, the product granules stick better to the leafy parts of the weeds, ensuring that the weed-killing ingredients are absorbed by the weed plant.
TIP: Apply after a heavy dew or rain, or on a thoroughly watered lawn.
TIP: DO NOT apply to a moist lawn **IF** rain is expected within 24 hours of application.
TIP: DO NOT water in immediately after application as the granules need to stick to the weed plant leaf for 1-2 days to be most effective.
3. Apply when weeds are young and actively growing.
4. Avoid applying when temperatures are consistently above 90°F.

5. After a 1-2 day period after application, if it has not rained – the lawn should be thoroughly watered.

[Optional Heading:] [Spreader Settings]

[Note: Registrant/Subregistrant will insert appropriate spreader setting information based on spreader models and use rate.]

Optional [Application Equipment and Instructions] [Spreader Directions]:

[Determining Your Lawn’s Square Footage

To determine how much of this product to apply, you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn, figuring that one pace equals approximately 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.]

[Insert icon representing footprint of house, driveway and lawn]

[above pictogram is optional]

Optional

[Determining the SIZE of Your Lawn]

[Simply multiply the length of the yard in feet, by the width in feet, to get the total size of the yard in square feet. Remember to subtract the square footage of the home and driveway and any additional large areas such as pools and flower beds, when calculating total square footage of the lawn so you don’t buy more product than actually needed.]

[Check the package for details on how many square feet it covers]

[Lot Size / Acre to Sq. Ft. Conversion:]

LOT SIZE / ACRE :	SQ. FT:
1/10	4,356
1/8	5,445
1/4	10,890
1/3	14,520
1/2	21,780
3/4	32,670
1 Acre	43,560

[Spreader Tips

The two main types of spreaders are the Drop Spreader, which drops the material straight down the width of the spreader as you push, and the Broadcast Spreader (also known as a rotary), which throws the material from the spreader.]

[Drop Spreader: [(See Fig. A.)]First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the long part of the lawn. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped.]

[Insert drop spreader icon]

[Insert icon showing spreader path]

[] [above pictogram is optional] [Fig. A.]

[Broadcast Spreader: [(See Fig. B.)] Apply in a single pass by starting on the outside border and apply in a circular path working toward the center.]

[Insert broadcast spreader icon]

[Insert icon showing spreader path]

[] [above pictogram is optional][Fig. B.]

[Optional Spreader Language:]

[The above spreader settings are approximate. To check your spreader - 1.0 lb. of material covers approximately 500 sq.ft. (2.0 lbs. of material per 1,000 sq. ft.).

Note: if spreader model does not appear above please call [toll free] XXX-XXX-XXXX, X am – X pm [ET] [CT] [MT] [PT], [Monday – Friday] [Monday – Sunday] [Anytime] [24/7] for additional model settings.]

[SPREADER SETTINGS:]

[This container, with the Ready2Go Spreader attachment, is pre-calibrated for the contents enclosed. No additional settings are required.]

[Consult basic rate of application information, in the HOW MUCH TO APPLY section of instructions.]

[Altering speed of operation from target rate of application is NOT allowed and may provide varying results.]

For use on:
