**NOTICE:** Recommendations for the use of this product are based upon information believed to be reliable at time of printing. The use of this product being beyond the control of LOS ANGELES CHEMICAL COMPANY, no guarantee, expressed or implied is made as to the effects of such or the results to be obtained if not used in accordance with directions or established safe and sound practice. The BUYER must assume all responsibility including injury and or damage, resulting from its misuse as such or in combination with other products.

The Food and Drug Administration have established tolerances on most pesticides. Directions should be followed carefully to avoid excessive residue at time of harvest

**DIRECTIONS**

**SUBTERRANEAN TERMITE:** 1 gallon in 100 gallons water, applying this concentration as follows. The treatment suggested complies with FHA standards.

**1 - SLAB-TYPE CONSTRUCTION**

- a. Apply 1 gallon per 10 square feet as an overall pre-construction treatment under the slab and along attached porches or entrance platforms.
- b. Apply 2 gallons per 5 lineal feet to critical areas under the slab as pre-construction treatment, such as along the inside of the foundation walls and around utility entrances and interior partition foundation walls.

**2 - BUILDING WITH CRAWL SPACES**

- a. Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the foundation is not more than 15-18 inches deep. If over 15-18 inches deep but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.
- b. Apply 2 gallons per 5 lineal feet as a trenching application to critical areas under the house, such as along the inside of foundation walls and around piers and utility entrances. If trench is deeper than 15-18 inches but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.
- c. Apply 1 gallon per 10 square feet of soil surface as a pre-construction treatment where the attached porches, entrance platforms, utility entrances have covered slab on fill of ground.
- d. Apply 1 gallon per 5 lineal feet of wall to voids in hollow masonry units of the foundation.

**3 - BUILDINGS WITH BASEMENTS**

- a. Apply 1 gallon per 10 square feet as an overall pre-construction treatment under the basement flooring, attached porches, entrance platforms, utility entrances and similar situations where slab fill is at ground level.
- b. Apply 2 gallons per 5 lineal feet in a trench along the outside of foundation walls, including entrance platforms and porches where the foundation is not more than 15-18 inches deep. If over 15-18 inches deep but not over 30 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.
- c. Apply 2 gallons per 5 lineal feet as a trenching application to critical areas under the house such as along the inside of foundation walls.

(Continued on opposite panel)

**CONTAINS 8 POUNDS CHLORDANE PER GALLON**

**ACTIVE INGREDIENTS:**

- \*Technical Chlordane ..... 73.0%
- Petroleum Hydrocarbons ..... 21.8%

**INERT INGREDIENTS: ..... 5.2%**

\*Equivalent to 43.8% of Octachloro-4, 7-methanotetrahydroindane and 29.2% related compounds or 8.0 lbs technical chlordane per gallon this product.

**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed, inhaled or absorbed through skin or eyes. Do not swallow, inhale or allow contact with skin, eyes or clothing. Wash thoroughly after handling and before eating or smoking. Do not contaminate food or feed. This product is toxic to bees and should not be applied when bees are actively visiting the area. Toxic to fish and wildlife, do not contaminate streams, lakes or ponds with this product. Birds feeding on treated areas may be killed. Apply this product only as specified on this label.

**ANTIDOTE**

**EXTERNAL:** In case of spillage on skin, wash promptly with soap and water.

**INTERNAL:** Emetic of 1 Tablespoon of mustard in 1 tumbler of water. Call a physician.

**Keep container closed.**

**Destroy this container when empty.**

porches, entrances and porches, if trench is deeper than 15-18 inches, apply 4 gallons per 5 lineal feet. Do not go deeper than the top of the footing.

1. Treat all voids in hollow masonry units of the foundation. Do not go deeper than the top of the footing.

**NOTE:** For buildings with deep porches, trench 30 inches deep. Do not dig trench below level of footing. Premises treated with 10% Chloro-Mulsion will give residual control for a minimum of five years.

**DIRECTIONS**

**LACCO CHLORO MULSION 8** is prepared for use against certain crop, household and structural pests as listed below. Unless otherwise stated, dosages are given in terms of fluid pints of this product in 40-100 gallons water per acre to permit uniform coverage. Adequate and constant agitation is necessary. Use as directed only when the pests appear.

**CABBAGE, CAULIFLOWER, BROCCOLI, BRUSSELS SPROUTS:** Cabbage Maggot, 5 pints per acre. Applied as a seed bed treatment before planting. Mix well into the upper 2 inches of soil. Preplanting soil application.

**STRAWBERRY:** Hoplia Beetle, Brachymeria Weevil, Fullers' Rose Beetle, Wireworm, 10 pints per acre. Applied preplant up to planting. Disc into the soil to a depth of 4 to 6 inches. Preplant soil treatment, or, when no fruit is present.

**TURNIP:** Cabbage Maggot, 1 to 1 1/2 gallons per acre. Applied as a soil treatment before planting. Disc into the soil to a depth of 2 to 4 inches. Pre-planting soil application.

**CITRUS (All Varieties):** Argentine Ant, 2 pints per 100 gallons of water. Applied as a coarse spray to the trunk and outer branches and to the outer foliage only at the drip line. Do not apply within 14 days of harvest nor exceed 10 pints of this product per acre per application.

**LAWN TURF:** Sod Webworm (Lawn Moth), Wireworm, Chinchbug, 2 1/2 to 3 pints per acre. Applied throughout the growing season as needed. Water the area to be treated, then do not irrigate for 24 hours after treatment. This treatment also controls: Moth Cricket, Mosquitoes, Chiggers, Earwig, Ticks, Ants, Armyworm, Crickets, Grasshoppers and Sliders. Keep children and animals off treated areas.

**HOUSEHOLD USE:** Mix 2-3-4 fl. oz. per quart of water and apply as a coarse wet spray, or with a paint brush to the areas mentioned below for the control of the following pests. Repeat as necessary to maintain effective control. May cause staining in some cases.

**ANTS:** Ant trails and the areas around door sills and window frames where the ants might enter, also treat openings around water pipes, heat ducts, electrical outlets and baseboards where ants may enter the rooms from wall spaces or partitions.

**ROACHES, WATERBUGS:** Infested cracks and other hiding places, also, treat adjacent exposed surfaces where the pests may crawl when they come out of hiding.

**CENTIPEDES, SPIDERS:** Infested baseboards, corners, pipes, storage localities and other infested areas in basements.

**CARPET BEETLES:** Infested areas of carpets and localized areas of floor, baseboards, and closet shelves.
