

#### DIRECTIONS

**LACCO CHLORO SPRAY 2** is prepared for use against certain pests of dwellings and of other occupied buildings as listed below. This product is designed for use without further dilution. Apply as a coarse, wet spray or with a paint brush to the areas mentioned below for the control of the following pests. Repeat as necessary to maintain effective control.

**ANTS:** Ant trails and areas around door sills and window frames where the ants might enter; also treat openings around water pipes, heat ducts, electrical outlets and baseboards where ants might enter the room from wall spaces or partitions.

**ROACHES, WATERBUGS:** Infested cracks and other hiding places; also treat adjacent exposed surfaces where the pests might crawl when they come out of hiding.

**CENTIPEDES, SPIDERS:** Infested baseboards, corners, pipes, storage facilities and other infested areas in basements.

**CARPET BEETLES:** Infested areas of carpets and localized areas of floors, baseboards, and closet shelves; also into cracks and under carpets where these pests might be found.

**HOUSEFLIES, WASPS, MOSQUITOES:** Doors, around windows and other areas frequented by these pests. To prevent entry into dwellings, apply as directed to screens, window frames, doorsills and areas of porches where these pests tend to rest or congregate. To control wasps, thoroughly apply a heavy spray to the nests after dark when most of the wasps have returned to the nest.

#### DIRECTIONS

**CRICKETS:** Baseboards, doors behind screens, window frames, and other areas where these insects might enter the premises.

**CLOTHES MOTHS:** Thoroughly clean and dry woolens, furs, and other woolens. Treated articles should be dried and hung in a well-ventilated area. All articles should be dry cleaned before wearing. Do not use on bedding.

**SILVERFISH:** Baseboards, doors behind screens, window frames, and other areas.

**SCORPIONS:** Doorsills, window frames, and other areas where these insects might enter the premises. In building, other than human dwellings, floor applications may be made to surfaces over which these insects may crawl.

**BOX ELDER BUGS:** Doorsills, window frames, and other areas where these insects might enter the home; areas where these insects crawl or congregate. In human dwellings, applications of houses will aid in preventing annoyance from these insects. Do not use on bedding. Also apply directly to any congregation of these insects on any surface.

**BROWN DOG TICKS:** Infested areas of floors, window frames, wall cracks, sleeping quarters of humans and animals, and other areas, and floor coverings. Frequency and extent of application will depend on the season and in intensity of infestation. Fresh bedding should be changed frequently following treatment. Do not apply this product to animals.

FOR SPOT APPLICATION ONLY

### CAUTION

Harmful if swallowed. Use only with care. Do not use in or near food preparation areas, or in areas where food is exposed. Avoid contact with skin, eyes, nose, and mouth. Do not use in or near food preparation areas, or in areas where food is exposed. Do not use in or near food preparation areas, or in areas where food is exposed. Do not use in or near food preparation areas, or in areas where food is exposed.

#### ANTIDOTE:

**EXTERNAL:** In case of spillage on the skin, wash with soap and water.

**INTERNAL:** Emetic of one full spoonful of 1% solution of potassium permanganate or physician.

**NOTICE:** Recommendation for the use of this product is based on information believed to be reliable at the time of publication. The Los Angeles Chemical Company, Los Angeles, California, is not responsible for the results of any application made as to the effects of one or more of its products. The user must assume all responsibility, including any liability, for the use of this product, or in combination with other products.
