

[962-380]

LACCO DRI-DIE kills insects on contact through a physico-chemical action. It is odorless, non-staining — may be used anywhere in the home, factory, or other site without damaging materials of any kind. It kills roaches on contact, protects against entrance of dry wood termites into buildings.

**DIRECTIONS FOR USE**

Dry Wood Termites — Use an electric or hand-operated rotary duster to distribute LACCO DRI-DIE through an entry, e.g., crawl space of the building. Rate of application is recommended at one (1) pound per 1,000 square feet of floor area. All wood surfaces must be covered. All vents and louvers on the windward side to be closed.

Roaches (German, Brown-Banded, Oriental) distribute LACCO DRI-DIE at the rate of 2 ounces per 100 square feet of floor area in visible concentration beneath and behind appliances, e.g., refrigerators, stoves. Apply a continuous visible film on and behind all mouldings, shelving edges, around pipe openings, in cracks and crevices where the insects may hide. On severe infestations apply LACCO DRI-DIE in crawl spaces, attics, behind walls, cabinets, at the rate of 16 ounces per 1000 square feet of floor area. Repeat as necessary.

New Construction — To help prevent infestations, apply between studding in lower part of all outer walls. Make sure all spaces between studs are treated. In plaster walls, holes may be made with a drill. After treatments, holes are closed by plasterers when taping.

INSECTICIDE

**ACTIVE INGREDIENTS:**

Amorphous Silica Gel*	95.3%
Ammonium Fluosilicate	4.7%
	<hr/> 100.0%

\*SIC 90% T.M. W. R. Grace Co.

**CAUTION**

**KEEP OUT OF REACH OF CHILDREN**

**Avoid Inhalation**

**DISPOSE OF WASTES** by burying in non-crop lands away from water supplies. Container should be disposed of by burying with wastes or by burning. Keep out of smoke.
