ALGAE CONTROL
 Algae in swimming pools, hot tubs, and spas can be controlled with Lacco Calcium Hypochlorite Tablets. The tablets are added to the water and dissolve, releasing active chlorine which kills algae and prevents its return.

AMENITY CONTROL
 Lacco Calcium Hypochlorite Tablets are used to control odors and tastes in swimming pools, hot tubs, and spas. The tablets are added to the water and dissolve, releasing active chlorine which kills bacteria and other organisms that cause odors and tastes.

BLEACHING PROBLEMS
 Lacco Calcium Hypochlorite Tablets are used to bleach stains on pool surfaces. The tablets are added to the water and dissolve, releasing active chlorine which bleaches the stains.

DISINFECTANT
 Lacco Calcium Hypochlorite Tablets are used as a disinfectant for swimming pools, hot tubs, and spas. The tablets are added to the water and dissolve, releasing active chlorine which kills bacteria and other organisms.

WASTES TREATMENT
 Lacco Calcium Hypochlorite Tablets are used to treat wastewater. The tablets are added to the water and dissolve, releasing active chlorine which kills bacteria and other organisms.

LAUNDRIES
 Lacco Calcium Hypochlorite Tablets are used for laundry. The tablets are added to the water and dissolve, releasing active chlorine which kills bacteria and other organisms.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER - Irritant. Causes severe eye irritation. May cause skin irritation. May cause respiratory irritation. May cause allergic reactions. May cause asthma. May cause dermatitis. May cause conjunctivitis. May cause rhinitis. May cause sinusitis. May cause laryngitis. May cause bronchitis. May cause pneumonia. May cause emphysema. May cause chronic obstructive pulmonary disease. May cause cancer. May cause reproductive toxicity. May cause developmental toxicity. May cause neurotoxicity. May cause immunotoxicity. May cause endocrine disruption. May cause organ toxicity. May cause organophosphate toxicity. May cause organochlorine toxicity. May cause organotin toxicity. May cause organosulfur toxicity. May cause organophosphorus toxicity. May cause organotin toxicity. May cause organosulfur toxicity. May cause organophosphorus toxicity.

ENVIRONMENTAL HAZARDS - This product is highly toxic to aquatic life. It is also toxic to birds and mammals. It is also toxic to plants and animals. It is also toxic to humans and domestic animals. It is also toxic to the environment. It is also toxic to the soil. It is also toxic to the water. It is also toxic to the air. It is also toxic to the land. It is also toxic to the sea. It is also toxic to the sky. It is also toxic to the earth. It is also toxic to the sun. It is also toxic to the moon. It is also toxic to the stars. It is also toxic to the planets. It is also toxic to the galaxies. It is also toxic to the universe.

PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT - This product is a strong oxidizing agent. It may cause fire or explosion. It may cause severe eye irritation. It may cause severe skin irritation. It may cause severe respiratory irritation. It may cause severe allergic reactions. It may cause severe asthma. It may cause severe dermatitis. It may cause severe conjunctivitis. It may cause severe rhinitis. It may cause severe sinusitis. It may cause severe laryngitis. It may cause severe bronchitis. It may cause severe pneumonia. It may cause severe emphysema. It may cause severe chronic obstructive pulmonary disease. It may cause severe cancer. It may cause severe reproductive toxicity. It may cause severe developmental toxicity. It may cause severe neurotoxicity. It may cause severe immunotoxicity. It may cause severe endocrine disruption. It may cause severe organ toxicity. It may cause severe organophosphate toxicity. It may cause severe organochlorine toxicity. It may cause severe organotin toxicity. It may cause severe organosulfur toxicity. It may cause severe organophosphorus toxicity.

DIRECTION FOR USE

DIRECTION FOR SWIMMING POOLS

1. Measure the volume of the pool in gallons. 2. Add 1 lb of Lacco Calcium Hypochlorite Tablets per 10,000 gallons of water. 3. Wait 15 minutes for the tablets to dissolve. 4. Test the water for chlorine. 5. Repeat steps 1-4 until the water has a chlorine level of 1.0 ppm.

DIRECTIONS FOR PREPARING STOCK LACCO CALCIUM HYPOCHLORITE TABLETS

PRODUCT	COLDWATER	WARMWATER
1 lb	1000	1000
2 lb	2000	2000
3 lb	3000	3000
4 lb	4000	4000
5 lb	5000	5000

1. Measure the volume of the pool in gallons. 2. Add the appropriate amount of Lacco Calcium Hypochlorite Tablets to the water. 3. Wait 15 minutes for the tablets to dissolve. 4. Test the water for chlorine. 5. Repeat steps 1-4 until the water has a chlorine level of 1.0 ppm.
