 May be fatal or harmful if swallowed.  
 See other warnings on back panel.

NET WEIGHT – 8 OZ.

Place in areas inaccessible to children, pets,  
 wildlife and domestic animals.

WHITMOYER  
**DLP-787**

**DIRECTIONS FOR USE:** This is a ready-to-use tracking powder; no mixing is required. Determine the areas of highest mouse activity. Next, apply the tracking powder in areas of concentrated traffic in dry places such as cardboard mouse houses, wall voids, burrows, or runways by sprinkling powder (1 to 2 level teaspoonfuls) to lightly cover an area approximately 6" by 12". DLP-787 is a single-dose, quick kill rodenticide; however, dry tracking powder should be maintained for 20 days for effective control. If mouse activity persists, repeat treatment as specified above. After completion of control program, collect and bury all dead animals and remaining powder.

**WARNING:** Keep Out of Reach of Children, Pets and Livestock. May be fatal or harmful if swallowed or inhaled. Avoid skin contact. Do not breathe dust. For non-crop use only. Avoid contamination of feed and foodstuffs.

In case of contact, flush skin and/or eyes with plenty of water. If swallowed, induce vomiting and call a physician. Wash hands, arms, and face with soap and water after handling and before eating or smoking.

**Note to Physician:** No human data available. If ingested, immediate therapeutic doses of nicotinamide are recommended as a precaution.

Do not reuse container. Destroy when empty.
