FACTORIES  
SCHOOLS

### CAMICIDE

INDUSTRIAL FORMULA  
POWER PACKED BUG  
KILLER

#### PROFESSIONAL STRENGTH INSECT KILLER

ACTIVE INGREDIENTS	
Pyrethrins	.50%
Piperonyl butoxide, technical	1.00%
N-Octyl bicycloheptene dicarboximid	1.67%
Petroleum distillate	11.83%
INERT INGREDIENTS	85.00%
Total	100.00%

\*Equivalent to .80% (Butylcarbityl) (6-propylpiperonyl) ether and .20% related compounds.

#### DIRECTIONS FOR USE

To Kill Flies, Mosquitos, Small Flying Moths, Webbing Clothes Moths and Gnats: Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5 to 10 seconds for average room. Keep room closed for 15 minutes after spraying. Do not remain in treated areas. Ventilate room thoroughly before re-entry. Sweep up and destroy falling insects. Before spraying, cover exposed food and utensils.

To Kill Cockroaches, Spiders, Silverfish, Ants and Crickets: Contact as many insects as possible directly with the spray in addition to thorough spraying of all parts of the room suspected of harbouring these pests. Special attention should be paid to cracks, hidden surfaces under sinks, behind stoves and refrigerators, food storage areas and wherever these pests are suspected of hiding. For control of ants, treat doors, window frames, ant vats and other areas of entry. Repeat as necessary for control.

To Kill Carpet Beetles: Directly spray as many insects as possible. Spray both interior and exterior of upholstered furniture. Both top and bottom of rugs and carpets should be sprayed thoroughly. Also treat shelves, closets, areas under furniture and wherever these insects are seen or suspected. Repeat as necessary.

To Kill Exposed Forms of Confused Flour Beetles, Saw Toothed Grain Beetles, Lesser Grain Borer and Rice Weevils: Find and destroy infested package goods. Remove all other items from pantry. Spray the shelves to kill any of the named insects present. Place clean paper on the shelves and return packages after shelves have dried. Repeat as necessary.

To Kill Wasps: Spray nests in the early morning or late evening when insects are at rest. Spray liberally into hiding and breeding places, contacting as many as possible. Repeat as necessary.

To Kill Fleas: Remove and destroy animal's bedding and spray sleeping quarters freely. Direct spray into cracks and crevices. Allow spray to dry and replace clean bedding. Do not spray animals directly. Repeat as necessary.

If used in food processing or preparation areas, foods should be removed or covered during treatment. Food processing surfaces should be covered during treatment or thoroughly cleaned before re-use. Do not treat while food processing is underway.

Remove pets, birds and cover fish aquarium before spraying.

**WARNING:** Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 120° F may cause bursting. Never throw container into fire or incinerator.
