GIBBONS
PELLETED RAT BAIT
KILLS RATS AND MICE

DIRECTIONS

FOR RATS: Gibbons Rat Bait is packed in convenient cartons and can readily be used as a bait station by breaking out the feeding hole on the side of the package. Place the one pound carton in locations frequented by rats and mice.

If preferred, an effective bait station can be any shallow container, box lid or even a piece of cardboard. Place 1/4 pound to one pound (113 grams to 454 grams) of Gibbons Rat Bait in each station.

Bait stations should be examined regularly and the bait supply replenished as needed until all signs of feeding have stopped. Assure an uninterrupted supply of bait for a period of at least ten days. Replace mouldy baits.

Baits should be placed in areas not accessible to children, pets, wildlife and domestic animals or in tamper-proof boxes.

Birds feeding on treated areas may be killed. Do not contaminate water by cleaning of equipment or disposing of wastes. Do not reuse container. Destroy when empty.

FOR MICE: Follow same general directions as for rats except that more bait stations are required 8 to 10 feet apart with smaller amounts of about 1 tablespoonful of Gibbons Rat Bait. Maintain bait stations.

PREVENT REINFESTATION: After all rats and mice have been killed, keep Gibbons Rat Bait stations in place. Stray rats or mice will feed and die before they can multiply and become a problem. Replace bait occasionally to assure freshness.

ACTIVE INGREDIENT

Diphacinone(2-Diphenylacetyl-1, 3-indandione) 0.005%

INERT INGREDIENTS: 99.995%

TOTAL 100.000%

GUARANTEE

- Gibbons Rat Bait is GUARANTEED to give complete satisfaction when used as directed.
- Gibbons Rat Bait is GUARANTEED to kill rats and mice.

CAUTION

Protection children, pets and domestic animals from bait. If swallowed by human beings, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In such case, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin.
