BELLEVILLE, ONT., CANADA NEW BRUNSWICK, N. J.

## SELECTIVITY OF METHAR

METHAR is a selective crabgrass killer at recommended rates of application in the presence of Kentucky, Merion Blue, Bermudas, and Zoysia Grasses. Under ideal weather and turf conditions, such as cool days and moist turf it is also selective in the presence of sensitive grasses, such as Fescues and Bents. Discoloration may occur in Fescues and Bentgrass areas, hence the lighter dosage is recommended.

Do not use on St. Augustine or Centipede Grasses.

Do not reuse empty drum. Return to drum reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies.

NET WEIGHT.....LBS.
