#### GENERAL INFORMATION

SPOTRETE 75 WDG prevents the infestation of common turf diseases such as Dollar Spot and Brown Patch if sprayed at regular weekly intervals throughout the summer season. This product will control Dollar Spot and Brown Patch when applied at a higher dosage to turf already infested with these diseases.

SPOTRETE 75 WDG will control Snow Mold (*Fusarium nivale* and *Typhula* spp.) when 2 applications are made during the fall and spring seasons.

SPOTRETE 75 WDG can also be used to protect nursery stock, shrubs and ornamentals from rabbit, deer and rodent depredation. One application will protect treated parts from 1-3 months, depending upon weather conditions. This product can also be used as a repellent in deterring deer from moving into unwanted areas as a result of local feeding and browsing. The addition of a latex sticker, such as CLEARSPRAY, prolongs the residual effectiveness of the treatment. Repellency is a result of rendering the treated plant parts distasteful. Some feeding may occur. As always Read and Follow label directions for best use results.

#### TURF APPLICATIONS

##### DOLLAR SPOT and BROWN PATCH.

PREVENTATIVE DOSAGE: 2 1/2 oz. per 1,000 square feet at 7-10 day intervals throughout the growing season.

CURATIVE DOSAGE: 5 oz. per 1,000 square feet. Begin when disease first appears. Repeat at 7-10 day intervals, as necessary.

##### TURF GRASSES, for SNOW MOLD (*Fusarium Nivale* and *Typhula* spp.)

PREVENTATIVE DOSAGE: 8 oz. per 1,000 square feet late in the fall prior to snowfall. A spring application of 3 oz. per 1,000 square feet during spring thaw may be necessary.

AMOUNT OF WATER: For uniform coverage use 5-10 gallons per 1,000 square feet.

## DEER, RABBIT AND RODENT REPELLENCY

**SPRAY APPLICATION, GROWING SEASON:** Add 1 quart SPOTRETE F to 7 quarts of water and apply as a full coverage spray to all portions of the plant to be protected. Spray to runoff. For greater retention and residual efficacy add 1 pint of latex based sticker, such as Cleary's CLEARSPRAY T/O, to the spray solution. Do not use wetting agents or surfactants as foliar damage may result. For best results spray when temperatures are greater than 40° F and relative humidity is less than 70 percent. Coverage depends on plant density.

**SPRAY APPLICATION, TREE TRUNKS AND DORMANT PLANTS:** Add 1 quart of SPOTRETE F to 3 quarts of water and apply as a spray to all portions of the plant to be protected. Spray to runoff. For greater retention and residual efficacy add 1 pint of latex based sticker, such as Cleary's CLEARSPRAY T/O, to the spray solution.

**BRUSH ON APPLICATION:** Add SPOTRETE F undiluted with a paint brush to stem parts and trunks to be protected. For greater retention and residual efficacy blend 4 fluid ounces of latex based sticker, such as Cleary's CLEARSPRAY T/O, into 1 gallon of SPOTRETE F prior to brushing.
