JUL 30 2009

SUBJECT: Application for Pesticide Notification – Label Change per PR Notice 2007-4
Douglas Special Mill Spray
EPA Reg. No. 1015-16
Application Dated April 21, 2009

Dear Mr. Kellogg:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 2007-4 and finds that the action requested falls within the scope of PRN 2007-4. The label submitted with the application has been stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself. In addition, the RD, in conjunction with our Office of General Counsel, recommends that you revise the Warranty Statement for compliance with the October 16, 2006 Agency guidelines.

If you have any questions, please call me directly at 703-305-6249, or Terri Stowe of my staff at 703-305-6117.

Sincerely,

Linda Arrington

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed. Avoid breathing vapors or spray mix. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. When this product is used in food processing establishments, confine time of application to period when plant is not in operation. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Keep out of lakes, streams, ponds, tidal marshes and estuaries. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Shrimp and crab may be killed at application rates recommended on this label. Do not apply when these are important resources.

PHYSICAL OR CHEMICAL HAZARDS

Combustible. Do not use or store near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Does the Job Easily

Kills the Accessible Stages on Contact

Granary weevil, cadelle, rice weevil, confused flour beetle, saw-toothed grain beetle, Angoumois grain moth, Indian meal moth, and certain other common grain insects.

READY-TO-USE INSECTICIDE

Mills-Elevators- Terminals- Farm Storage- Flat Storage- Box Cars- Warehouses- Feed Stores- Seed Stores

- Easy to Apply
- Ready-to-Use
- Over 13 years constant acceptance by grain trade
- 100% active
- Approved by Mill Mutual Fire Prevention Bureau
- Can be used in food warehouses, bakeries, canneries, markets, restaurants, hotels and homes.

Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment. Remove pets, birds and fish bowls and aquaria before spraying rooms. Follow directions for surface and space spraying.

7098

EASY-TO-USE ON GRAIN SURFACE

Special Mill Spray is formulated for killing grain moths and exposed stages of other insects that attack stored grain. This contact spray can be applied directly on the surface of the grain. Will not stain bags or sacks.

AS A SURFACE SPRAY

Clean out interiors and exteriors of all conveying, processing and handling equipment with vacuum cleaner, then spray all surfaces until thoroughly wet, or at rate of one (1) gallon per 750 square feet. This dosage is adequate for nonabsorbent surfaces. Spray entire area of walls, ceilings, beams, pipes, and all other exposed interior surfaces until thoroughly wet. The recommended dosage is one (1) gallon of Special Mill Spray per 750 square feet. Repeat as infestation reappears. It should be borne in mind that to get adequate insect kills with surface sprays, results depend entirely on the amount of insecticide deposited on areas with which insects will come in contact-consequently spray legs, boots, tunnels, pits and all possible insect breeding places, including ceilings and walls with sufficient material to wet all areas thoroughly.

AS A SPRAY OR MIST

Use a good steam, compressed air, or electric sprayer designed to deliver a fine mist. Operate sprayer until one (1) gallon of spray has been discharged for each 32,000 cubic feet. Move sprayer about room during operation to assure good distribution of mist. The success from the use of space spray for control of flying insects depends on proper atomization of the spray. Treat all infested spaces thoroughly with a heavy fog, keep rooms closed for thirty minutes, then if possible sweep up fallen insects and burn them.

AS A GRAIN SURFACE SPRAY

Level the grain surface and spray with Special Mill Spray at the rate of one (1) gallon per 750 square feet. Apply before and after fumigation to prevent moths and other insects from webbing over and infesting the grain. Repeat every 4 to 6 weeks or as infestation reappears. Use a hand or electric sprayer for uniform distribution.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Do not reuse empty container. Do not store under conditions which might adversely affect the container or its ability to function properly.

PESTICIDE STORAGE: If exposed to prolonged cold, place in warm storage (50 to 80 degrees F) for several hours and agitate before using. Store in a safe manner. Store in original container only. Store in cool, dry place. Keep container tightly closed when not in use. Reduce stacking height where local conditions can affect package strength. Personnel should use clothing and equipment consistent with good pesticide handling.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying.

(Nonrefillable container ≤ 5 gallons): Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

(Nonrefillable > 5 gallons): Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the
