TETRASPOT

Grain and Mill Spot Fungicide

... of insects in all stages of development. In addition, it controls primary weevil, rice weevil, and other stored grain pests. It is also effective against beet, mill, and other stored grain pests. It is also effective against stored grain pests. It is also effective against stored grain pests.

TO PREPARE FULL DWS FOR FUMIGATION: Measure grain and use appropriate amount of TETRASPOT. Apply to grain surface as much as possible. "Dry" portion will not hold for long periods. To provide insecticide to all grain surfaces, use appropriate amount of TETRASPOT. Apply to grain surface as much as possible. "Dry" portion will not hold for long periods. To provide insecticide to all grain surfaces, use appropriate amount of TETRASPOT.

ACTIVE INGREDIENTS 2000
 Carrier Tetrahydrofuran 75.000
 Carrier 2-Methyl-2-butanol 24.760
 Fungicide 10.500
 Carrier 2-Methyl-2-butanol 2.500
 Carrier 2-Methyl-2-butanol 2.500

In respect to the hazard, TETRASPOT contains CHLORPYRIFOS which is rated by the manufacturer as being less hazardous than organophosphorus insecticides in use. It is a Schedule II chemical. Either is rated as follows:
 Acute Toxicity: 4.0
 Irritation: 3.0
 Hazardous: 3.0

WARNING: KEEP OUT OF REACH OF CHILDREN
