

# INSTRUCTIONS FOR USE:

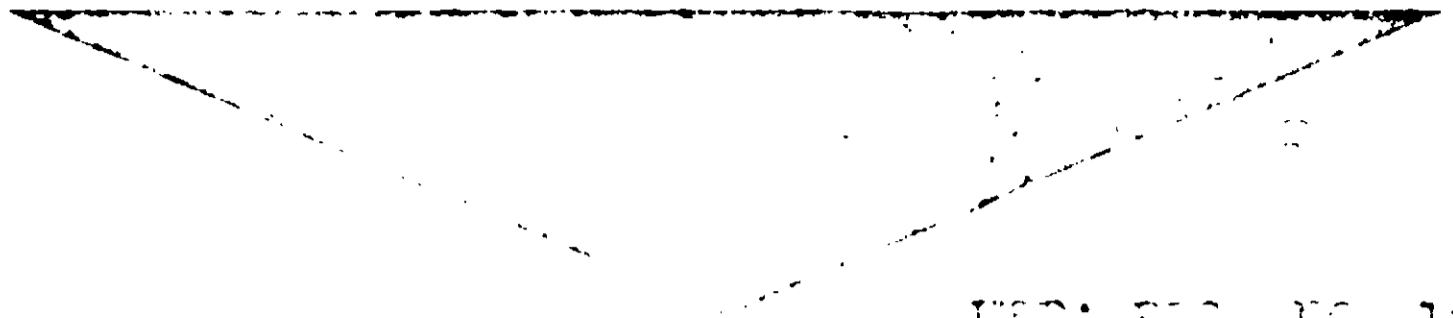

PROTECKOTE can be applied to all grain to protect the grain from infesting insects. It should be thoroughly sprayed with Douglas SPECIAL FARM FINE SPRAY filled with treated grain. It should be done long enough of time to allow all surfaces to dry thoroughly. Apply PROTECKOTE directly to the grain being put into storage or when being turned. As many insects should be contacted with PROTECKOTE at the time of application as possible.

## APPLICATION:

It should be applied at 1.5 gallons per 1000 bushels. Application should be made at the final storage site or at the amount of PROTECKOTE to the grain is very important. Protection from insect infestation is obtained if application is low and the tolerance of the crop may be exceeded if the rate is too high. Accurate application can be made with the IN-FILTER #100 or #200.

**ACCEPTED**  
FEB 14 1953  
UNDER THE FEDERAL INSECTICIDE AND ROENTGENIC ACT FOR ECONOMIC POISON REGISTRATION UNDER NO. 1015-92  
AS LISTED IN THE ATTACHED DOCUMENT

# PROTECKOTE

USDA REG. NO. 1015-92

## Liquid Grain Protectant for

### WHEAT, CORN, OATS, RYE, BARLEY, GRAIN SORGHUMS

ACTIVE INGREDIENTS:	
Carbon Tetrachloride	93.00%
Malathion*	1.00%
Diethyl Dithiophosphate**	1.00%
Paraffin	1.00%
Petroleum Distillate	1.00%
INERT INGREDIENTS	
	9.00%
Total by weight	100.00%

\*\*DIMETHYL DITHIOPHOSPHATE OF DIETHYL MERCAPTOSUCCINATE  
\*\*EQUIVALENT TO .58% OF (BUTYL CARBITYL) ISOPROPYL (PHTERONYL) ETHER AND TO .13% OF RELATED COMPOUNDS  
CONTAINS PREMIUM GRADE MALATHION

## WARNING

HARMFUL VAPOR AND LIQUID. OBSERVE WARNING PRECAUTIONS ON SIDE PANEL.  
ANTIDOTE: CALL PHYSICIAN. SEE SIDE PANEL.

KEEP OUT OF REACH OF CHILDREN.

KEEP IN COOL DRY PLACE

# Douglas Chemical Company

To insure against surface infestation the grain surface should be sprayed with Douglas SPECIAL MILL SPRAY or TOPKOTE "77" every 4 to 6 weeks through the active insect season.

If the facility is not equipped with aeration, grain that has been treated may be turned in the normal manner for cooling purposes.

**WARNING - HARMFUL VAPOR and LIQUID**  
HARMFUL IF SWALLOWED. DO NOT BREATHE VAPOR. AVOID PROLONGED REPEATED CONTACT WITH SKIN. USE GAS MASK SUITABLE FOR ORGANIC VAPORS.

If treated areas must be entered before vapors have dissipated, wear an airline respirator or a full face gas mask equipped with an organic vapor filter.

In case of contact, wash with soap and water. Remove and wash clothes before reuse. Do not wear shoes until free of all chemical odor.

**ANTIDOTE:** If illness results from remove to fresh air, keep warm and CALL PHYSICIAN. Apply artificial respiration only if breathing stops. If swallowed CALL PHYSICIAN. Induce vomiting immediately giving emetic such as 2 tablespoon in a glass of warm water.

**NOTE TO PHYSICIANS:** Malathion upon repeated, prolonged careless use, may cause cholinesterase inhibition. Atropine is antidotal.
