US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS-767) WASHINGTON, DC 20460	EPA REGISTRATION NO.	DATE OF ISSUANCE
	1020-4	JUL 31 1996
	TERM OF ISSUANCE	
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>	NAME OF PESTICIDE PRODUCT	
Oakite Chlor-Tergent		
NAME AND ADDRESS OF REGISTRANT (Include ZIP code)		
Oakite Products, Inc. 50 Valley Road Berkeley Heights, N.J. 07944		
NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.		
On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.		
A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.		
Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.		
Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.		
Make the following labeling changes before you release the product for shipment:		
1. The Precautionary Statements should read:		
"Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles, or face shield. Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse".		
<input type="checkbox"/> ATTACHMENT IS APPLICABLE		
SIGNATURE OF APPROVING OFFICIAL		DATE

2. The Statements of Practical Treat should read:

If Swallowed: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Call a physician or get medical attention.

If in Eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

If on Skin: Wash with plenty of soap and water. Get medical attention.

Note to Physician: Probably mucosal damage may contraindicate the use of gastric lavage.

3. Revise the Environmental Hazards to read as follows:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA".

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

For our records, submit a revised Confidential Statement of Formula. The CSF dated September 18, 1995 is in error. The source product for the active ingredient EPA Reg. No. 1258-984 is not "Trichloro-s-triazinetriene" and it may not be used in this product, it is "Sodium dichloro isocyanurate dihydrate". Consult your supplier Olin Corporation and use correct product in your formula.

CODE NO.

3480

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND
DOMESTIC ANIMALS**

DANGER!

Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters unless in accordance with an NPDES permit. For guidance contact your regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire explosion. In case of contamination or decomposition do not reseal container. If possible isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

STORAGE AND DISPOSAL

Keep product dry in tightly closed containers when not in use. Store in a cool dry, well-ventilated area away from heat or open flame. In case of a decomposition isolate container if possible and flood with large amounts of water to dissolve all material before discarding.

Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

OAKITE®

CHLOR-TERGA

EPA REG. NO. 1020-4 EPA I M. No. 1020-CA-1

**THE MODERN CHLORINATED DETERGENT
CLEANS • SANITIZES • DEODORIZES... IN ONE**

Active Ingredient: Trichloro-s-triazinetrioxane (Available Chlorine 4.25%)	5.0%
Inert Ingredients	95.0%
		100.0%

NET: 227 KG / 500 lbs

KEEP OUT OF REACH OF CHILDREN

DANGER!

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Amount to Use for Cleaning and Sanitizing:

A 1 oz. per gallon solution provides 300 ppm of available chlorine. This is adequate for most operations where bulk of soil has been removed by flushing with water. When the available chlorine drops to 150 ppm or less, the solution should be discarded and a fresh one prepared to obtain maximum sanitizing effect. It is not advisable to add upkeep to spent solution. For stubborn soils, use a stronger solution followed by potable water rinse before using equipment.

Application for In-Place Cleaning and Sanitizing:

Apply 1 oz./gallon solution by circulation for cleaning in place, by brushing and swabbing or by soaking. Following washing, rinse with potable water.

Where sanitizing after cleaning is required, or it is necessary to sanitize clean equipment before it is used again, employ solution of 1/3 oz./gallon followed by adequate draining before using equipment.

Where Oakite Chlor-Tergent may be Used:

- Breweries
- Bottlers
- Canneries
- Bakeries
- Food Processors
- Dairies
- Milk Producers
- Restaurants
- Meat Plants
- Poultry Plants
- For use wherever sanitizing and deodorizing are required for food, beverage and dairy processing equipment.

Authorized by USDA for use in federally inspected meat and poultry plants.

Shell Egg Destaining and Shell Egg Washing

Use Oakite Chlor-Tergent at 1 to 2 ounces per gallon of water and a maximum temperature of 120°F (49°C) to destain shell eggs and/or shell egg washing. Following use of this product, eggs must be thoroughly rinsed with potable water.

Shell Egg Sanitizing

Use Oakite Chlor-Tergent at 1/3 ounce per gallon of water (100 ppm available chlorine) and maximum solution temperature of 120°F (49°C) to sanitize shell eggs. When used at recommended levels, eggs need not be followed by potable water rinse.
