CLEARMOL

ACTIVE INGREDIENTS:

| | |
|--|----------------|
| Pyrethrins | 2.50% |
| *Piperonyl butoxide, technical | 5.00% |
| 1-N-octyl bicycloheptene dicarboximide | 8.31% |
| Petroleum distillate | 11.93% |
| | <u>27.77%</u> |
| | 72.23% |
| | <u>100.00%</u> |

INERT INGREDIENTS:

Total

*Consists of 4.00% (butylcarbityl)(6-propylpiperonyl)ether and 1.00% related compounds.
1MGK 264 Insecticide Synergist, U.S. Pat. No. 2,476,512.

DIRECTIONS FOR USE

For a Space Spray to Kill Flies, Mosquitoes, Gnats and Flying Moths: Dilute three parts of CLEARMOL with 97 parts of water (in case of dilution for packaging ready-to-use products use distilled or deionized water only). Mix thoroughly until a uniform, clear emulsion forms. Mist all parts of the room or area at a dosage of one fluid ounce of dilute spray per 1000 cubic feet of space. Repeat as needed.

For a Contact Spray to Kill Roaches, Waterbugs, Crickets and the Exposed Forms of Crawling Grain Pests: Dilute four parts of CLEARMOL with 96 parts of water (in case of dilution for packaging ready-to-use products use distilled or deionized water only). Mix thoroughly until a uniform, clear emulsion forms. For roaches, waterbugs and crickets apply as a coarse spray to all cracks and crevices in woodwork, underneath sinks, dark places behind pipes and in all places where these insects rest, contacting as many insects as possible with the spray. Repeat applications as often as necessary. For grain weevils, cadelles, grain moths, flour beetles and grain mites apply as a coarse spray to all infested surfaces, insect hiding places and insect runways at the rate of one gallon of dilute spray on 750 square feet of area. Repeat when necessary.

CAUTION (18 pt. type)

KEEP CLEARMOL AND DILUTE SPRAY OUT OF REACH OF CHILDREN (12 pt. type). Harmful if swallowed. Cover or remove exposed food and feedstuffs during spraying. After spraying in meat packing plants wash with potable water all equipment, benches, shelving, etc. where exposed food will be handled. Do not store, pour or spill CLEARMOL near heat or open flame. Keep container closed. Remove birds and fishbowls from room being sprayed.

Do not pack diluted product in cans - brown glass bottles are preferred. This concentrate does not emulsify spontaneously; it must be agitated thoroughly.
