Manufactured by

PYROCIDE EMULSIFIABLE 60-6
insecticide

ACTIVE INGREDIENTS:	
Pyrethrins	0.0%
*Piperonyl butoxide, technical	60.0%
Petroleum distillate	10.0%
INERT INGREDIENTS:	10.0%
Total	100.0%

*Consists of 48.0% (butylcarbityl)(6-propylpiperonyl) ether and 12.0% other related compounds.

1715 S.E. Fifth Street / Minneapolis, Minnesota

Directions for Use

Use PYROCIDE EMULSIFIABLE 60-6 alone as a clean-up spray or a pre-harvest spray where other materials cannot be used because of residue restrictions. PYROCIDE EMULSIFIABLE 60-6 may also be used in combination with other insecticides where resistant insects are a problem, or to flush or excite insects out of hiding and into contact with spray residues - when applied according to accepted use cautions and directions.

See Spray Chart below for amount to apply per acre and repeat as required to maintain effective control. Use in sufficient water for thorough coverage, (usually 100 gallons) unless otherwise noted. Cover upper and lower leaf surfaces for good control.

PYROCIDE EMULSIFIABLE 60-6 may be used up to and including day of harvest when used alone.

SPRAY CHART

- APPLES: Asparagus beetle - 2 to 6 oz.
- ORCHARD: Aphids, Leafhoppers, Apple Fly, 12-Spotted Cucumber Beetle, Mexican Bean Beetle - 2 to 6 oz.
- BROCCOLI, CABBAGE, BRUSSELS SPROUTS, CAULIFLOWERS: Aphids, Cabbage Looper, Diamondback Moth Larvae, Cross-Striped Cabbageworm, Flea beetle, Harlequin Bug, Imported Cabbageworm, Stink Bug - 2 to 6 oz.
- CORN: Green Peach Aphid, Leaf Tier, Cabbage Looper - 2 to 6 oz.
- CUCUMBERS: Fireworms, Leafhopper - 2 to 6 oz.
- POTATOES: Green Peach Aphid, Blister beetle, Colorado Potato beetle, Flea beetle - 2 to 6 oz.
- PEACHES: Orange Leafhopper, Green Peach Aphid, Diamondback Moth larvae, Imported Cabbageworm - 2 to 6 oz.
- PEARS: Green Peach Aphid - 2 to 6 oz.
- PLUMS: Aphids, Colorado Potato beetle, Flea beetle, Leafhopper - 2 to 6 oz.
- RAISINS: Aphids, Flea beetle - 2 to 6 oz.
- SPINACH: Aphids, Cabbage Looper, Webworm - 2 to 6 oz.
- TOMATOES: Green Peach Aphid, Colorado Potato beetle, Stink bug, Flea beetle - 2 to 6 oz.

SEE BACK PANEL FOR MORE DIRECTIONS FOR USE

CAUTION

KEEP OUT OF REACH OF CHILDREN! HARMFUL IF SWALLOWED. Do not use in undiluted form

This product is toxic to fish. Keep out of lakes, streams or ponds. Apply this product only as specified on this label. See other General Precautions and Instructions on back panel before using. Do not use empty containers. Destroy by perforating or crushing and bury in a safe place.

Pyrocide Emulsifiable 60-6 is a contact insecticide. It is effective against a wide range of insects including: Aphids, Beetles, Caterpillars, Fleas, Flies, Grubs, Leafhoppers, Lice, Moths, and Weevils. It is also effective against ticks and mites. It is not effective against mosquitoes.

1. Thoroughly mix the concentrate with water in a clean container. The dilution rate is as follows:
 - 1) Apply liberally to the upper and lower leaf surfaces, on trunks and on plants. Use approximately 100 gallons of water per acre at the rate of 1 part of concentrate of diluted spray to a 100-ton load of fruiting. Direct the spray for maximum coverage of the bases of trunks. It not only kills the flies, but the emulsion fastens dry base flies so they are readily washed from the fruit.
 - 2) Spray the base of trunk of deciduous trees.
 - 3) Dip buckets in the diluted spray after cutting the fruit to kill sprouting larvae and pupae.
2. The entire inside surface of the canopy should be sprayed, after washing and cleaning up and just before bringing fruit into it, with PYROCIDE EMULSIFIABLE 60-6 diluted 1 part plus 50 parts of water (1 part plus 7 quarts 3 parts water or 2 tablespoons with 3 1/2 pints water). Use 1 gallon of the dilute spray per 750 square feet, directing it on walls, ceilings and floors paying special attention to forcing the spray into all cracks and crevices for the control of ants, roaches, silverfish, crickets, spiders and grease mites. This same dilution used as a space spray, will give excellent control of fruit flies, house flies, hornets, grain gnats, gnats, mosquitoes and skipper flies. Use one-half ounce dilute spray per 1000 cubic feet of space.

SPACE SPRAY: To kill flying insects such as fruit flies, house flies, hornets, wasps, grain gnats, gnats, mosquitoes and skipper flies, dilute PYROCIDE EMULSIFIABLE 60-6 at the rate of 1 part with 50 parts water (2 tablespoonsful 60-6 with 3 1/2 pints water). Use at the rate of one half ounce of dilute spray per 1000 cubic feet of space. Direct the space treatment upward and wherever practical, keep doors and windows closed for at least 10 minutes after application.

WATER-BASED: Where oil residues are not undesirable PYROCIDE EMULSIFIABLE 60-6 can be diluted at the rate of 1 part plus 50 parts in deodorized base oil instead of water and applied as a space spray with any oil vaporizer or fogger.

When this product is used in food processing plants foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray in these areas, apply only when plant is not in operation. When this product is used as a space spray in an enclosed area do not remain in the treated area and ventilate the area when treatment is complete.

NOTICE

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label at the time in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
