**IF SWALLOWED:** Call a Physician or Poison Control Center immediately. If possible, induce vomiting under medical supervision or use gastric lavage with an endotracheal tube because of aspiration hazard. Otherwise, if victim is conscious, give a glass of water and induce vomiting by touching back of throat with finger. Do not give anything by mouth or induce vomiting if victim is unconscious. Have victim lie down and keep warm and quiet.

**NOTE TO PHYSICIAN:** This product contains a cholinesterase inhibitor. Atropine by injection is antidotal and should be administered only if signs of cholinesterase inhibition have appeared. 2-PAM is also antidotal and may be used in conjunction with atropine.
