PYROCIDE Stabilized Growers Spray 7682

Kills Gypsy Moth Larvae, Aphids (Lice), Mexican Bean Beetles, Imported Cabbage Worm, Cabbage Looper, and Other Sucking and Chewing Insects. Shown on SPRAY CHART on Back of Drum

1715 S.E. Fifth Street Minneapolis, Minnesota 55414

ACTIVE INGREDIENTS:

Pyrethrins 1.40%
 Petroleum distillate 5.60%
 Aromatic petroleum distillate 48.00%

INERT INGREDIENTS:

Total 45.00%
 100.00%

DIRECTION FOR USE

Simply dilute with water as directed and spray. Spray thoroughly, hitting as many insects as possible with the spray. Measure carefully and mix well. Recommended dilutions are adequate; do not make stronger solutions. Mix only enough for immediate use. Use a nozzle giving a coarse, driving spray, rather than a fine mist. PYROCIDE STABILIZED GROWERS SPRAY cannot be used with alkaline insecticides and fungicides. Do not use PYROCIDE STABILIZED GROWERS SPRAY with arsenic sprays or on plants having arsenical residue as the soap reacts chemically with arsenates and burns the foliage. Spraying should begin when the first insects appear. Do not wait until the plants are heavily infested. PYROCIDE STABILIZED GROWERS SPRAY can be sprayed at any season of the year.

FOR ADDITIONAL DIRECTIONS AND DILUTION RATE SEE SPRAY CHART ON REVERSE OF DRUM.

REPEAT TREATMENTS AS OFTEN AS NECESSARY.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid contamination of food and feedstuffs.

This product is toxic to fish. Do not contaminate any body of water by cleaning of equipment or disposal of wastes.

Do not re-use empty drum. Return to drum reconditioner or destroy by crushing and burying in a safe place.

Do not use, pour, spill or store near heat or open flame. Mix well in drum before use. Keep container closed when not in use. Store in a cool, dry place.
