*NOTE: 1 fluid ounce = 2 Tablespoons = 6 Teaspoons

FOR OUTDOOR PESTS:

Mix this concentrate in a compressed air sprayer or watering can at the rate of four (4) fluid ounces per one (1) gallon of water to control on contact cockroaches (including German and Asian cockroaches), palmetto bug, ants, crickets, sowbugs, spiders, and ticks. Use at the rate of one (1) gallon (diluted spray) per 1,000 square feet to outside surfaces of buildings, porches, patios, garages and other areas where these pests have been seen or are found. Do not spray in or near fish ponds or other bodies of water. Do not allow spray to contact ornamental plants or shrubs because of possible injury.

Building Perimeter Treatment: To help prevent infestations of buildings by ants, crickets, spiders, centipedes, and sowbugs (pillbugs), treat a 12-18 inch band of soil or other substrate adjacent to buildings and the building foundation to a height of 2 to 3 feet where these pests are active and may find entrance. Use four (4) fluid ounces of concentrate per gallon of water and apply as a coarse wet spray at the rate of one (1) gallon per 1,000 square feet.

To prevent reoccurrence of fleas, a total management program is recommended. You should treat the areas where fleas live with the Holiday 4-Step Program which consists of: Step 1-Shampoo/Dip the pet; Step 2-Treat the home and yard; Step 3-Flea and Tick collars on the pet; Step 4-Maintenance Sprays and Powders. Ask your pet care professional for specific recommendations on how to best control fleas for the comfort and well being of your pet and family.
