To reduce annoyance from these pests, treat open porches and patio in a similar manner. Spray only when the air is still. Allow spray to dissipate before occupying the treated area.

**TO KILL FLEAS AND TICKS IN PET BEDDING AND PET AREAS:** Remove and destroy pet's old bedding. To reduce infestation, thoroughly spray the animal's bedding, sleeping quarters, around baseboards, window and door frames, wall cracks, local areas of floors, and other resting places until the surface is slightly moist. Treat these areas at the rate of 2 seconds per linear foot at a distance of 12 – 18 inches. Also, spray the entire inside surface of doghouses. Put fresh bedding in pet's quarters after spray is dry. DO NOT SPRAY ANIMALS. Also treat dogs and cats [pets] with a registered flea and tick control product before allowing them to reenter treated area.
