## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

### WARNING

Causes skin irritation. Harmful if absorbed through skin. Do not get on skin or on clothing. Avoid contact with eyes. Wear coveralls over short-sleeved shirt and short pants; socks; chemical-resistant footwear; and chemical-resistant gloves such as Barrier Lamine, Neoprene Rubber, Nitrile Rubber, or Viton. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

## ENVIRONMENTAL HAZARDS

This pesticide is highly toxic to fish. To protect the environment, do not allow pesticide to enter or runoff into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid runoff to water bodies or drainage systems. Do not contaminate ornamental fish ponds. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated sites.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area. **Protect pollinating insects by following label directions intended to minimize drift and to reduce risk to these organisms."**

## PHYSICAL OR CHEMICAL HAZARDS

**Combustible.** Do not use or store near heat or open flame.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product  
in a manner inconsistent with its labeling.

All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Application to pervious surfaces such as soil, lawn, turf, and other vegetation;
2. Perimeter band treatments of 7 feet wide or less from the base of a man-made structure to pervious surfaces (e.g., soil, mulch, or lawn);
3. Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure;
4. Applications around potential exterior pest entry points into man-made structures such as doorways and windows, when limited to a band not to exceed one inch;
5. Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 feet above ground level;
6. Applications to vertical surfaces directly above pervious surfaces, such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters.

**FOR USE ON ORNAMENTAL PLANTS (Annuals and Perennials), SHRUBS & ROSES:** Mix EVERCIDE Emulsifiable Concentrate 2668 in a tank type or hose end sprayer at the rate of 1 fl. oz. per gallon of water. Apply to cover upper and lower leaf surfaces. Repeat as needed to maintain control or weekly.

**TO CONTROL THE FOLLOWING INSECTS:** Alfalfa Caterpillars, Alfalfa Loopers, Aphids, Armyworms, Artichoke Plume Moths, Beet Armyworms, Buckhorn Aphids, Cabbage Loopers, Carrot Weevils, Celery Loopers, Chinch Bugs, Colorado Potato Beetles, Corn Earworms, Corn Rootworms (adults), Cowpea Curculios, Cucumber Beetles (adults) - spotted and striped, Cutworms, Diamondback Moths, European Corn Borers, Flea Beetles, Grasshoppers, Green Cloverworms, Imported Cabbageworms, Leafhoppers, Loopers, Lygus Bugs, Mexican Bean Beetles, Painted Lady Caterpillars, Pea Aphids, Pea Weevils, Pepper Weevils, Pickleworms, Potato Leafhoppers, Potato Psyllids, Potato Tuberworms, Rindworms, Saltmarsh Caterpillars, Sap Beetles, Southwestern Corn Borers, Squash Bugs, Squash Vine Borers, Stalk Borers, Stink Bugs, Tarnished Plant Bugs, Tobacco Hornworms, Tomato Fruitworms, Tomato Hornworms, Tomato Pinworms, Vegetable Leafminers, Velvetbean Caterpillars, Western Bean Cutworms, Whiteflies, Japanese Beetles, Spittlebugs, Redheaded Pine Sawflies, Balsam Woolly Adelgids, Pine Chafers, Red Pine Sawflies, Pine Coreid Bugs, European Pine Sawflies, and Northern Pine Weevils.

#### LAWN FLEA AND TICK CONTROL:

To kill fleas and ticks harboring in lawns and backyards, use this concentrate in a hose-end sprayer. Place required amount of concentrate in sprayer jar (see chart below) and fill with water to the recommended level. Mix well. Attach to sprayer and spray as recommended. For best results, lawn should be mowed one to two (1 to 2) days before spraying. Spray using a slow, even sweeping motion, being sure to cover the entire lawn surface where the pests will normally frequent. Spray under ornamentals and trees, but avoid soaking young or flowering plants. Repeat treatments may be necessary at 7 to 14-day intervals. Kills the *Ixodes dammini* (deer tick), which transmits Lyme disease, on contact. Also kills foraging fire ants upon direct contact. A registered fire ant mound treatment should also be used in conjunction with this product.

Keep pets and children out of treated areas until after the spray has dried. Do not spray animals. Dogs, cats, their kennel or bedding area should also be treated with a registered flea and tick control product in conjunction with this application.

#### **HOSE END SPRAY APPLICATION**

Amount of Product to Use Fluid Ounces*	Amount of Water to Use	Area to be Treated
1 fl. oz.	3 gallons	500 sq. ft. (50' x 10')
2 fl. oz.	6 gallons	1,000 sq. ft. (50' x 20')
4 fl. oz.	12 gallons	2,000 sq. ft. (50' x 40')

**FOR OUTDOOR PESTS:** Mix EVERCIDE Emulsifiable Concentrate 2668 in a tank-type or hose end sprayer or watering can at the rate of 2 fl. oz. per gallon of water for on-contact control of ants, cockroaches (including German and Asian cockroaches), crickets, palmetto bugs, pillbugs, sowbugs, spiders, and ticks. Use at the rate of 1 gallon (diluted spray) per 1,000 sq. ft. for outside surfaces of buildings, porches, patios, garages, and other areas where these pests have been seen or are found. Do not spray in or near fish ponds or other bodies of water. Do not allow spray to contact ornamental plants or shrubs because of possible injury. For crack and crevice treatments, treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

**Building Perimeter Treatment:** To help prevent infestations of buildings by ants, centipedes, crickets, sowbugs, pillbugs, and spiders, treat a 12 to 18 inch band of soil or other substrate adjacent to buildings and the building foundation to a height of 2 to 3 feet where these pests are active and may find entrance. Use 16 fl. oz. of concentrate per gallon of water and apply as a coarse wet spray at the rate of 1 gallon per 1,000 square feet.
