Do not apply when food is present. Remove or cover dishes, utensils, food processing equipment, and food preparation surfaces, or wash them before use.

Remove or cover exposed food and drinking water before application.

INDOOR USE:

Spray surface areas and contact as many insects as possible.

Not for broadcast use on indoor residential surfaces.

FLIES, GNATS, MOSQUITOES, FRUIT FLIES, WASPS, HORNETS, BEES, SMALL FLYING MOTHS, and other flying insects: Close all doors and windows and direct spray upward into center of room with a slow sweeping motion. Spray 5 – 10 seconds for average size room. Direct spray to all parts of the room, especially at windows and other light sources that attract these insects. When spraying, keep nozzle in constant motion. Keep room closed for 15 minutes after spraying. Do not allow adults, children, or pets to enter until vapors, mists, and aerosols have dispersed, and the treated area has been thoroughly ventilated. Sweep up and discard fallen insects.

FLEAS AND TICKS: Before use, vacuum all infested areas thoroughly and dispose of vacuum bag in outside trash. Apply spray uniformly to rugs, carpets, draperies, and all surfaces of upholstered furniture. Treat under and around furniture if pets frequently rest in these areas. Avoid excessively wetting upholstered furniture and draperies. A fine spray applied uniformly is all that is necessary to kill Fleas. To kill Ticks and other labeled insects, apply directly to the pests. Spray thoroughly into hiding places such as cracks and crevices, on walls and floors, and along baseboards, and window and door frames. Spray at the rate of one (1) linear foot per second with a slow sweeping motion. Do not allow adults, children, or pets to enter the treated area until sprays have dried. Do not spray on pets or humans.

FLEAS AND TICKS IN PET BEDDING AND PET AREAS: Remove and destroy or wash pet's old bedding. To reduce infestation, thoroughly spray animal's bedding and sleeping quarters, and around baseboards and window and door frames, wall cracks, local areas of floors, and other resting places until the surface is slightly moist. Treat these areas at the rate of two seconds per linear foot at a distance of 12 – 18 inches. Also, spray the entire inside surface of doghouses. Put fresh bedding in pet's quarters after spray has dried. Do not allow adults, children, or pets to enter the treated area until sprays have dried.

For best results, treat pets with EPA registered flea and tick control products, ([such as] [brand name] flea or flea and tick collar, [brand name] pet powder, [brand name] pet spray, [brand name] pet dip, [brand name] pet shampoo, flea shampoo or flea and tick shampoo), in conjunction with this application before allowing pets to re-enter treated areas.

Do not use on edible crops. Take precautions to avoid spraying when wind conditions could create a mist that may blow back to applicator. Do not apply this product in or around bodies of water.

FLIES, GNATS, MOSQUITOES, SMALL FLYING MOTHS, Midges, Small Flying Insects, Sand Flies, Black Flies, Biting Flies, Deer Flies, Face Flies, Horse Flies, Houseflies, Stable Flies, Vinegar Flies, Fruit Flies, and other flying insects: Hold container 18 – 24 inches from shrubs, bushes, grassy areas, and other areas infested with these pests. Spray with a slow sweeping motion. To reduce annoyance from these pests, treat surfaces of open porches, patio areas, screens, window frames, doors, and other areas where these pests may alight or congregate in a similar manner. Allow spray to dry before occupying treated area.

WASPS, HORNETS, BEES, YELLOW JACKETS, AND PAPER NEST WASPS: Hold container 18 – 24 inches away from these insects and spray them directly. Do not spray into nests or hives. Only use an EPA registered product [EPA registered product such as] [brand name] designed for use on nests and hives.
