Minneapolis, MN 55427

Subject: Nylar® Fire Ant Bait 2711
EPA Reg. No. 1021-1671
Notification Per PR-Notice 2001-6

Dear Mr. Lennan:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2001-6 dated July 31, 2007 for the above mentioned product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 2001-6 and finds that the action requested falls within the scope of PRN 2001-6 regarding updated disposal statements. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249.

Sincerely,

Linda Arrington

Subject:

Nylar® Fire Ant Bait 2711
EPA Reg. No. 1021-1671
Notification Per PR-Notice 2001-6

Dear Sir or Madam:

By Notification updating the disposal statements per PR-Notice 2001-6

Enclosed are 2 copies of the label. 1 copy with changes highlihgted in yellow

I certify that no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, then this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

If there are any questions or you need anything further, please contact this office.

Sincerely,

McLAUGHLIN GORMLEY KING COMPANY

[] OR () indicates alternate or optional wording

[NYLAR®] [brand name] is an insect growth regulator similar to the naturally occurring insect growth hormones which interferes with [stops] their growth or development

[NYLAR®] [brand name] inhibits worker replacement in fire ant colonies

[NYLAR®] [brand name] kills [controls] developing immature fire ants and degenerates the reproductive organs of the queen

[NYLAR®] [brand name] provides a shift in caste differentiation from worker fire ants to sexual forms

[NYLAR®] [brand name] reduces the quantity of the worker brood within two weeks

[NYLAR®] [brand name] reduces the colony size by 85% in one month and by 96% in two months

[NYLAR®] [brand name] causes total colony death within six months

Effective in the control of The Red Imported Fire Ant [Solenopsis invicta] [and other Solenopsis species] and the Big-Headed Ant

Easy to use granular formulation

Fire ants seek out the [NYLAR® bait] [brand name] and take it back to the colony

[NYLAR®] [brand name] breaks the reproductive life cycle of the fire ant causing starvation of the colony

Worker fire ants bring the bait into the mound, feed it to the queens, reducing egg production leading to colony death]

ACTIVE INGREDIENT:

2-[1-Methyl-2-(4-phenoxyphenoxy) ethoxy] pyridine 0.50%

OTHER INGREDIENTS 99.50%

100.00%

NYLAR® - Registered trademark of McLaughlin Gormley King Company

FOR USE IN residential/domestic sites, defined as areas associated with the household or home life, including, but not limited to apartment complexes, condominiums, homes in areas such as foundation plantings, driveway edges, curbs, flower beds, along foundations and sidewalks, lawns, mulch, landscapes, yards, gardens, potted plants, side yards and other areas where Fire Ants may be found.

[Nylar® fire ant bait] [brand name] is a slow acting, highly effective fire ant control product. Fire ant workers pick up the bait granules and take it back to the colony. Within 3 to 4 weeks there is substantial colony mortality and within eight weeks the majority of the colony population has been eliminated.

Worker fire ants bring the [Nylar® fire ant bait] [brand name] into the mound and feed it to both the queen and the immature fire ants thereby preventing worker replacement. Due to degeneration of reproductive organs, the fire ant queen cannot replace workers. The lack of worker replacement results in colony death as the existing worker ants age and die.

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

CAUTION

ENVIRONMENTAL HAZARDS

For terrestrial use: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters or rinsate.

For information regarding medical emergencies or pesticide incidents, call 1-888-740-8712.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ALL DIRECTIONS COMPLETELY BEFORE USE

For best results, follow directions for specific use areas. Do not apply directly to animals.

WHEN TO APPLY:

[Nylar® fire ant bait] [brand name] should be applied in the early Spring or Summer at the first sign of fire ant activity. Application may be made any time of day but is more effective when ants are actively foraging, usually when the soil temperature is above 60° F. Avoid application if rain is expected within 4 to 6 hours. Do not water treated area for 24 hours after application. In the event of prolonged rains after initial treatment, reapplication may be necessary.

Handwritten mark

In areas where large mounds remain active, areas of heavy infestation or reinfestation occurs, a second application of [Nylar® fire ant bait] [brand name] may be advisable after 12 to 16 weeks to maintain sufficient levels of active ingredient. In very large mounds, some worker fire ants may persist for a while after the queen is dead. For 7-10 days after treatment, do not apply any other fire ant pesticide. This is to allow sufficient time for the worker ants to seek out the bait and take it back to the mound. After 14 days, it may be desirable to apply a registered Fire Ant pesticide to kill remaining foraging ants.

INDIVIDUAL MOUND TREATMENT:

Do not disturb the mound. Do not apply to top of mounds. Apply 1 to 4 level tablespoons of [Nylar® fire ant bait] [brand name] per mound, uniformly distributing material 3 to 4 feet around the mound. Re-treat after 12 to 16 weeks if needed.

BROADCAST APPLICATION:

Apply product thinly and uniformly over yard using shaker side of top. The contents of this container will treat [4 ounces will treat 11,000 square feet] [8 ounces will cover 22,000 square feet] [10 ounces will cover 27,000 square feet] [12 ounces will cover 32,000 square feet] [16

ounces will cover 43,000 square feet] when used as a broadcast yard treatment. Broadcast application of the entire yard area is recommended since it eliminates fire ant nests which have yet to mound. Re-treat after 12 to 16 weeks if needed.

BIG-HEADED ANT (*Pheidole megacephala*) CONTROL

Apply uniformly as above. Treat surrounding areas, adjacent borders, and fence lines to help prevent ant migration into the treated areas. Re-treat after 12 to 16 weeks if needed.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry place. Keep container closed.

DISPOSAL:

If empty: Do not reuse this container. Place in trash or offer for recycling if available.
If partly filled: Call your local solid waste agency for disposal instructions. Never place any unused product down any indoor or outdoor drain.
