PREVENTION, PESTICIDES AND  
TOXIC SUBSTANCES

MAY 14 2009

Mr. Steven K. Ditto  
Registration Specialist  
McLaughlin Gormley King Company  
8810 Tenth Avenue North  
Minneapolis, MN 55427-4319

Subject: Label Notification for Pesticide Registration Notices 98-10 and 2007-4

Dear Mr. Ditto,

The Agency is in receipt of your Applications for Pesticide Notification under Pesticide Registration Notices (PRN) 98-10 and 2007-4 dated February 26, 2009 for the following products:

**EVERCIDE® Roach & Ant Spray 2639 (EPA Registration Number 1021-1698)**  
**EVERCIDE® RTU Spray (F-27785) (EPA Registration Number 1021-1861)**

The Registration Division (RD) has conducted its review of these requests for their applicability under PRNs 98-10 and 2007-4 and finds that the label changes requested fall within the scope of PRNs 98-10 and 2007-4. The labels submitted with the applications have been stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please call me directly at 703-305-6249 or Steve Schaible of my staff at 703-308-9362.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

Linda Arrington

EVERCIDE® Roach and Ant Spray 2639 with NyLar® contains a unique combination of ingredients to provide rapid [quick] knockdown and kill of the listed pests as well as an insect growth regulator which prevents immature cockroaches and fleas that are sprayed or that contact the spray residue from becoming adults. By preventing the development of adult cockroaches and fleas, the life cycle is broken and reproduction will not occur. In the case of fleas, biting adult fleas will not result from treated immature fleas and the reproductive life cycle is broken. Treatment will last for 210 days [30 weeks] [7 months] for fleas and 120 days [17 weeks] [4 months] for cockroaches.

**SHAKE WELL BEFORE USE**

Avoid contamination of food and feedstuffs.

Read entire label and follow all label directions. Use this product as a spot or crack and crevice treatment to localized areas where pests are seen or suspected. Spray surfaces until visibly wet. Spray pests directly, whenever possible. Keep children and domestic animals out of treated areas until the spray is dry.

**ANTS, COCKROACHES, CRICKETS, CENTIPEDES, FIREBRATS, PILLBUGS, SILVERFISH, SPIDERS, AND SOWBUGS:** Spray pests when they are seen and spray areas suspected of harboring these pests. Spray ant trails and spray cracks and crevices and points of entry into the house. Pay special attention to areas behind and beneath sinks, stoves, refrigerators, garbage containers, inside cabinets, along baseboards, in cracks and crevices in walls and floors, door and window sills and frames, around drains, pipes, plumbing, bookcases, storage and utility areas, and utility installation areas. Retreatment for roaches should not be needed for 120 days. For other pests, reapply as needed.

**CARPET BEETLES:** Thoroughly vacuum rugs and carpets before treatment. Remove the vacuum bag and place it in a separate bag and dispose of in outside trash. This helps prevent reinfestation from eggs and larvae vacuumed up. Spray backing of carpet and rugs, focusing on low traffic areas and areas under furniture. When dry, replace on floor and spray surface of carpet and rug, focusing on low traffic areas and areas under furniture and corners of rooms. Also spray baseboards.

**FLEAS AND TICKS:** Thoroughly vacuum all carpeting and fabric covered furniture, along baseboards, under furniture, low traffic areas, and areas where pets normally rest. Pet bedding should be removed and laundered. Replace pet bedding after treatment dries. Put vacuum bag in a separate bag and dispose of in outside trash. Apply as a spot treatment to cracks and crevices, along baseboards, pet resting areas, and localized areas of floors and floor coverings where the pests are suspected. Do not treat pets with this product.

If flea and tick infested animals are transported in vehicles, use as a spot treatment to carpets and upholstered areas, paying attention to cracks and crevices.

To further protect your pet and your home from continuing reinfestation by fleas, you should use an EPA registered (labeled) product to treat the animal(s), such as a dip product, a dust product or spray-on product, before the animal is allowed back into the house. You should also treat the area in the yard where the pet typically spends time with an EPA registered (labeled) product for yard flea control. The pet, home, and yard should be treated at the same time.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage and disposal.

STORAGE: Store in a cool, dry place. Keep container closed. **Pesticide Storage**

Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

DISPOSAL-Pesticide Disposal and Container Handling

Do Not Puncture or Incinerate!

Nonrefillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions.
