[] OR () indicates alternate or optional wording

Nylar® is an insect growth regulator similar to the naturally occurring insect growth hormones which interferes [stops] their growth and development
Nylar® stops [prevents] the fleas from developing into egg laying adults
Nylar® can be used as part of an integrated pest management [IPM] program
Nylar® can be a biorational approach to insect control
Nylar® keeps working in areas exposed to the sun

Inhibits reinfestation of fleas for up to 100 days [14 weeks] [3 months]
Kills adult fleas
Kills preadult fleas, including flea eggs for 100 days [14 weeks] [3 months]
If adult fleas are introduced from untreated areas, their offspring will not become biting [reproductive] adults
Prevents larval fleas from developing into the biting adult stage
Prevents [stops] hatching fleas [preadult [larval] fleas] [eggs (hatching eggs) (larvae)] from becoming full grown [developing into] biting adults
One treatment works for 100 days [14 weeks] [3 months] against hatching fleas [preadult [larval] fleas] [eggs (hatching eggs) (larvae)]
Kills present [today's] fleas and prevents new [tomorrow's] fleas from developing into the biting adult stage
Nylar® activity keeps working for 100 days [14 weeks] [3 months]
Controls [stops (kills) (prevents)] stages of fleas that don't look like fleas
Prevents [stops] the emergence of adult fleas
Flea eggs deposited on the dog [puppy] [cat] [kitten] [pet] will not develop into adult fleas
Nylar® acts on the immature life stage of the flea, preventing it from developing into biting a adult

Kills [controls] and Repels: Fleas, Ticks, Lice, Flies, Mosquitoes and Gnats
Also kills [controls] Deer Ticks and other tick [Ixodid] species that may carry and transmit Lyme disease
Kills, on contact, Ticks, Spiders, Ants, and other listed insects
Effective long-term control

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

EVERCIDE® PRESSURIZED PET SPRAY 2642 kills [controls] insect contact] [such as]:
 Fleas [adults (larvae) (eggs) (preadult)] Millipedes
 Ticks [that may carry and transmit Lyme Disease] Pillbugs
 Brown Dog Ticks Centipedes
 Lone Star Ticks Spiders
 Deer Tick Scorpions
 Other Ixodid Species Ants
 American Dog Ticks Flies
 Gulf Coast Ticks Mosquitoes
 Lice Crickets
 Sowbugs

For use in: Animal Runs, Animal Holding Areas, Animal Quarters, Apartments, Attics, Automobiles, Basements, Bedrooms, Boarding Kennels, Campers, Cat Beds, Closets, Condominiums, Decks, Dens, Dog Beds, Dog Houses, Dormitories, Floors, Garages, Gazebos, Homes, Hotels, Kennels, Kitchens, Lanais, Living Rooms, Motels, Patios, Pet Bedding, Pet Carriers, Pet Grooming Parlors, Pet Sleeping Areas, Pet Stores, Play Rooms, Porches, Recreational Vehicles, Rooms, Scratching Posts, Utility Rooms, Verandas, and Veterinary Clinics/Hospitals.

EVERCIDE® PRESSURIZED PET SPRAY 2642 for dogs [puppies] [cats] [kittens] [pets] contains a combination of ingredients that stops [blocks (interrupts) (terminates)] the flea life cycle and controls [kills] other listed insects. The first active ingredient is NYLAR®, an insect growth regulator that inhibits the development of the immature stages of the flea for 100 days [14 weeks] [3 months], preventing them from reaching the adult stage. NYLAR® is similar to naturally occurring insect growth hormones. The second active ingredient is the botanical Pyrethrum [an extract of a Chrysanthemum flower] that provides effective quick-kill of insects upon direct contact and an added benefit of flushing these insects from their hiding place to aid in more complete control [kill]. Permethrin, the third active ingredient, provides residual activity.

The combination of ingredients in EVERCIDE® PRESSURIZED PET SPRAY 2642 for dogs [puppies] [cats] [kittens] [pets] kills adult fleas and hatching fleas [preadult (larval) fleas] [eggs (hatching eggs (larvae) for 100 days [14 weeks] [3 months] before they grow up to bite. NYLAR®, the insect growth regulator, continues to kill [control] hatching fleas [preadult (larval) fleas] [eggs (hatching eggs) (larvae)] for 100 days [14 weeks] [3 months] by preventing their development into the adult biting stage.

EVERCIDE® PRESSURIZED PET SPRAY 2642 can also be used to control [kill (interrupt) (terminate) (block)] fleas hidden in carpets, rugs, draperies, upholstery, pet bedding, floor cracks, and cabinets. Occasionally adult fleas may be present in treated areas when reintroduced from infested animals.

As part of a complete flea control program, use EPA registered outdoor [lawn] [home and garden] spray and [pressurized] [Ready-to Use] [RTU] flea and tick [indoor] [premise] spray.

This product may be applied as a direct contact spray to control fleas, ticks, and other listed premise insect pests.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL BEFORE EACH USE. USE ONLY ON DOGS AND/OR CATS.

DO NOT TREAT PETS UNDER 6 MONTHS OF AGE WITH THIS PRODUCT.

DO NOT TREAT CATS UNDER 7 MONTHS OF AGE WITH THIS PRODUCT.

Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

SHAKE WELL BEFORE USE

FOR TREATMENT OF LICE, FLEAS AND TICKS:

ON DOGS AND CATS [PETS]: Cover animal's eyes with hands. Spray ears and chest until damp. Use fingertips to rub into face and around mouth, nose, and eyes. Then spray neck, middle, and hindquarters, finishing legs last. For best penetration of spray to skin, direct spray against the natural lay of the hair; using hands to ruffle the hair, spray ruffled hair directly behind the hand. Make sure the spray thoroughly wets ticks. [When used on miniature and toy breeds of dogs or on cats, towel dry the animal after 1/2 hour (30 minutes) if not totally dry.] Avoid contact with genitalia. Do not reapply for 3 months.

Consult a veterinarian before using this product on debilitated, aged, pregnant, or nursing animals. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated animals.

FOR PUPPIES OVER 6 MONTHS OF AGE AND KITTENS OVER 7 MONTHS OF AGE: Wrap the animal in a towel which has been sprayed lightly with this product. Leave eyes, nose, and mouth exposed. Put some spray on fingers and gently rub around eyes, nose, and mouth area. Keep the animal wrapped for 5 to 10 minutes. Fleas may then be removed from the coat by picking or combing. For best results, all older dogs and cats should be treated with a similar flea control product [such as] to prevent infestation of puppies and kittens. Do not spray directly on puppies and kittens. Avoid contact with genitalia.

FOR USE IN PET [DOG] [PUPPY] [CAT] [KITTEN] AREAS AND OTHER AREAS WHERE PETS [DOGS] [PUPPIES] [CATS] [KITTENS] FREQUENT: Treat pet [dog] [puppy] [cat] [kitten] bedding and other pet [dog] [puppy] [cat] [kitten] resting areas as these are primary hiding areas for fleas and ticks. To reduce infestation, spray around sleeping area, baseboards, window and door frames, into wall cracks, and on local areas of floors and other resting places until the surface is slightly moist. Also spray the entire inside surface of dog houses [animal holding areas]. For best results, treat pet bedding, animal quarters, and other resting areas [other listed pet areas] before returning pet to treated areas. No need to remove pet bedding after treatment. Do not allow pets to use treated areas until completely dry.

TO CONTROL OTHER LISTED PESTS: Apply as a direct spray to control accessible stages of listed insects. Spray to thoroughly wet exposed insects. Direct spray into hiding places, cracks and crevices, along baseboards, and around door and window frames.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry place. Keep container closed.

DISPOSAL:

Do Not Puncture or Incinerate!

If empty: Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal

Instructions.
