Subject: Label Notification for Pesticide Registration Notices 98-10 and 2007-4

Dear Mr. Ditto,

The Agency is in receipt of your Applications for Pesticide Notification under Pesticide Registration Notices (PRN) 98-10 and 2007-4 dated January 21, 2009 for the following products:

EVERCIDE® O.B. RTU 28101	(EPA Registration Number 1021-1787)
EVERCIDE® Esfenvalerate RTU 28062	(EPA Registration Number 1021-1779)
EVERCIDE® Microemulsion Pet Pump Spray 2649	(EPA Registration Number 1021-1726)

The Registration Division (RD) has conducted its review of these requests for their applicability under PRNs 98-10 and 2007-4 and finds that the label changes requested fall within the scope of PRNs 98-10 and 2007-4. The labels submitted with the applications have been stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please call me directly at 703-305-6249 or Steve Schaible of my staff at 703-308-9362.

Sincerely,

EVERCIDE® Microemulsion Pump Spray 2649 contains a combination of ingredients that provide rapid knockdown and kill of the listed insects. This highly effective water-based formula can be used on dogs and cats.

The combination of ingredients in EVERCIDE® Microemulsion Pet Pump Spray 2649 kills adult fleas and ticks on contact. The first active ingredient is the botanical, Pyrethrum [an extract of a Chrysanthemum flower], which provides effective knockdown and quick-kill of listed insects. The second active ingredient is Permethrin, a synthetic pyrethroid, which gives residual [long term] control of fleas. The third active ingredient is Nylar®, the insect growth regulator which inhibits the development of the immature stages of the flea for 100 days [14 weeks] [3 months] preventing them from reaching the adult stage. Nylar® is similar to insect growth hormones that occur naturally in insects.
