DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

The MGK® Roach Trap has a house-like shape and comes with an attractant which lures the cockroach inside the trap where they are caught by a special adhesive surface. Once trapped, the cockroach will not escape due to the strong adhesive. Under opened condition, the adhesive remains sticky for approximately one month.

The MGK® Roach Trap can be used both as a monitoring device and as a control treatment when used at sufficiently high densities.

FOR MONITORING: Place traps at a density of 1-2 per 100 sq. ft.

FOR COCKROACH CONTROL: Place traps at a density of 3-5 per 100 sq. ft.
