Minneapolis, MN 55427-4372

Subject: Label Amendment to Update First Aid Statements (PR Notice 2001-1)

EPA Registration No. 1021-1773  
Evercide® Residual Ant & Roach Spray 27523  
Your submission dated May 28, 2004

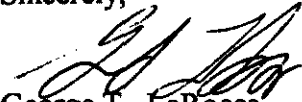

Dear Ms Zielinski:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable subject to the comments listed below. Two (2) copies of the finished labeling must be submitted prior to releasing the product for shipment. A stamped copy of the label is enclosed for your records.

- Separate the statements beginning with "*Have the product container with you ...*" from the Note to Physician statements, and place under the heading "*Hot Line Number*". Please refer to the boxed format example provided with PR Notice 2001-1.

If you have any questions regarding this action, please contact Olga Odiott of my team at (703) 308-9369.

Sincerely,

  
George I. LaRocca  
Product Manager 13  
Insecticide Branch  
Registration Division (7505C)

KEEP OUT OF REACH OF CHILDREN

## CAUTION

### FIRST AID

IF SWALLOWED	<ul style="list-style-type: none"> <li>▪ Immediately call poison control center or doctor.</li> <li>▪ Do not induce vomiting unless told to do so by the poison control center or doctor.</li> <li>▪ Do not give any liquid to the person.</li> <li>▪ Do not give anything by mouth to an unconscious person.</li> </ul>
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> <li>▪ Take off contaminated clothing.</li> <li>▪ Rinse skin immediately with plenty of water for 15-20 minutes.</li> <li>▪ Call a poison control center or doctor for treatment advice.</li> </ul>
IF IN EYES:	<ul style="list-style-type: none"> <li>▪ Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>▪ Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>▪ Call a poison control center or doctor for treatment advice.</li> </ul>

**NOTE TO PHYSICIAN:** Contains petroleum distillate – vomiting may cause aspiration pneumonia. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information regarding medical emergencies or pesticide incidents, call the International Poison Center at 1-888-740-8712.

### PRECAUTIONARY STATEMENTS

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

## CAUTION

Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

#### ENVIRONMENTAL HAZARDS

This product is toxic to fish and other wildlife. Do not apply directly to any body of water. Do not contaminate water by cleaning equipment or when disposing of equipment wash waters.

#### PHYSICAL OR CHEMICAL HAZARDS

**Flammable.** Contents under pressure. Keep away from heat, spark, and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

### DIRECTIONS FOR USE

It is a violation of Federal Law to use this product  
in a manner inconsistent with its labeling.

EVERCIDE® Residual Ant & Roach Spray 27523 is intended for use in and around residential structures and their immediate surroundings. Permitted areas of use include: Apartments, Atriums, Attics, Automobiles, Basements, Bathrooms, Boats, Cabins, Campers, Carports, Clothes Storage, Condominiums, Decks, Dens, Driveways, Garages, Gazebos, Homes, Kitchens, Lanais, Living Rooms, Parlors, Patios, Pet Sleeping Areas, Play Rooms, Porches, Recreational Vehicles, Rooms, Solariums, Storage Areas, Sun Rooms, Utility Rooms, and Verandahs.

This product may stain or adversely affect vinyl, painted, and plastic surfaces. Avoid application to asphalt shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

Do not allow children or pets to contact treated surfaces until dry.

**For Crack and Crevice Treatment:**

Apply insecticide directly into cracks and crevices or voids using the injection tube. Place injector tip one half (1/2) inch into cracks and crevices, holes, and other small openings. Release approximately one-second spray per spot. For serious infestation, place spots approximately 12 inches apart. For light infestation or for preventative treatment, place spots approximately three feet apart. In long running cracks, move injector tip along the crack while spraying at the rate of three linear feet per second. For heavy infestations, move the injector tip along at one linear foot per second. For inaccessible, closed voids, calculate the void's cubic area and treat at rate of 5 – 10 seconds per cubic foot. Several holes may be required in long-running voids.

Crawling Insects: Ants, Booklice, Boxelder Bugs, Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Spiders, Ticks, Earwigs, Sowbugs, Scorpion, and Waterbugs. Inject into cracks, crevices, and void spaces where insects may be harboring. These may include openings around pipes and sinks, under refrigerators, behind baseboards, washing machines, stoves, cabinets, meter boxes, and manholes.

Booklice and Silverfish: Inject into cracks and crevices associated with baseboards, doorframes, bookcases, and other harborage sites.

Ants: Inject into cracks, crevices, and voids where ants may be traveling and/or harboring, including around doors and window frames, and behind electrical switches and outlets, and other structural cracks and crevices.

Stored Product Pests: Inject cracks, crevices, and/or voids where these insects may be harboring or hibernating. Infested areas include cracks and crevices in cabinets and pantries, wall voids, around window and door frames, under siding, and in machinery.

Localized Treatment of Wood-infesting insects: Beetles\* and Borers\* (such as the following families: Anobiidae\*, Bostrichidae\*, Buprestidae\*, Cerambycidae\*, Lyctidae\*, Oedemeridae\*, Sesiidae\*), Carpenter Ants, Carpenter Bees, Termites and Wood Wasps. Locate suspected infestation and/or insect tunnels and cavities. Inject 5 – 10 seconds of spray into insect tunnels, galleries, and inaccessible closed voids. In infested sites, pilot holes should be drilled 8 – 10 inches apart to insure thorough insecticide gallery treatment. Make sure not to contact electrical wiring, plumbing, etc. when drilling. For Carpenter Bees, seal entrance openings with small pieces of stainless steel wool after application.

\*Not registered for control in California.

\*\*\*The purpose of such applications of EVERCIDE® Residual Ant & Roach Spray 27523 for termites is to kill workers or winged reproductive forms which may be present in treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration or soil or foundation treatment but are merely a supplement. This product is not recommended as sole protection against termites. For active termite infestations, obtain a professional inspection.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS: Places other than private residences in which food is held, processed, prepared or served.

Do not apply directly to food. Do not apply when food-processing facility is in operation or food is exposed. Do not apply this product to surfaces or utensils that may come in contact with food. Cover or remove all food and food-processing equipment during application. Food contact surfaces and equipment must be thoroughly cleaned with an effective cleaning compound and rinsed with potable water before use. Do not spray plants to be used for food or feed.

FOOD AREAS: Includes areas for Receiving, Storage, Packing (Canning, Bottling, Wrapping, Boxing), Preparing, Edible Waste Storage (Edible Oils and Syrups), and Enclosed Processing Systems (Mills and Dairies). Serving areas (when food is exposed and facility is in operation) are also considered food areas. Apply prescribed amounts of insecticide directly into cracks and crevices or voids using injection tubes in points between different elements of construction, between equipment and door openings, leading to voids and hollow spaces in walls, and equipment legs and bases where insects hide. Repeat applications as needed but do not exceed more than one (1) application every seven (7) days in restaurants and similar food service establishments or more than one (1) application every fourteen (14) days in all types of food handling establishments.

NON-FOOD AREAS: Includes areas such as Garbage Rooms, Lavatories, Floor Drains (to sewers), Entries and Vestibules, Offices, Locker Rooms, Machine Rooms, Boiler Rooms, Garages, Mop Closets, and Storage (after canning or bottling).

**FOR PREMISE PESTS:**

Application Within Non-Residential Buildings Including Non-Food Areas of Industrial, Institutional and Commercial Buildings, Hotels, Warehouses, Truck Trailers, Theaters, and Office Buildings.

**For GENERAL USE: (Without Injection Tube)**

Apply as a coarse wet spray to thoroughly treat insect hiding places such as cracks, crevices, moist areas around pipes and utility service boxes, under refrigerators, and along baseboards to control the insect pests listed below. Whenever possible, spray insects directly. Keep people and domestic animals off treated areas until dry. Do not spray on livestock feed. Do not apply to institutions (including libraries, hospitals, nursing homes, sport facilities, etc.), in the immediate area when occupants are present.

Fleas and Ticks on Surfaces: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Do not spray animals directly. For best results, pets should be treated with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are severe. Test first for staining on an inconspicuous piece prior to use.

To Kill Ants, Centipedes, Crickets, Cockroaches, Earwigs, Millipedes, Psocids, Pillbugs, Sowbugs, Spiders, and Waterbugs: Apply to areas where these pests are found or may hide, including dark corners of rooms; storage rooms, and closets; cracks and crevices in floors and walls; between building construction elements; along baseboards, door and window frames; behind and beneath sinks, stoves, refrigerators and cabinets; and around garbage cans, bins, dumpsters, plumbing and other utility service installations. Pests flushed from hiding should be sprayed directly. For Ants, spray ant trails, door thresholds, door and window frames (outdoors and indoors), and wherever these pests may find access into the building.

Spiders and Waterbugs: Apply as a coarse wet spray to floors, under sinks, areas behind pipes, utility service boxes, and in all areas where these insects seek harborage. Contact as many insects as possible.

Pantry Pests: To treat exposed stages of Grain Beetles (Rusty, Merchant and Saw-toothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elm Leaf Beetles and Tobacco Moths. Remove all foodstuffs, utensils, and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of shelf paper, food, and utensils. Wash any exposed food handling surfaces and utensils before use.

Carpet Beetles (Black, Furniture, and varied): Spray on and under edges of floor coverings, under rugs and furniture, and in closets or other localities where these insects are found.

Webbing Clothes Moths: Spray in closets and other storage areas where these pests are found. Do not apply to clothing.

Ants: Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is slightly wet.

Fire Ants: To quiet active ants on the surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

For the Control of Garden Insects: For use on Roses, Dahlias, Asters, and other ornamentals to kill Japanese Beetles hit by spray, as well as Whiteflies, Aphids, Exposed Thrips, Spiders, Red Mites, Army Worms, and Leafminers. Not for use in plants being grown for sale or other commercial use.

To Kill Houseflies, Mosquitoes, Gnats, and Small Flying Moths: Close room and turn off air conditioning or ventilating equipment or fans. First direct spray into all cracks and crevices, behind all equipment, appliances, cupboards, or any dark harborage areas. Next use as a space spray, directing the spray towards the ceiling and upper corners of the room. Keep areas closed for at least 1/2 hour. Do not remain in treated area after treatment. Ventilate area thoroughly before re-entry. Do not repeat application more than once every three (3) days.

STORAGE AND DISPOSAL	
Do not contaminate water, food, or feed by storage or disposal.	
<u>STORAGE:</u> Store in a cool, dry place. Keep container tightly closed.	
<u>PESTICIDE DISPOSAL:</u> Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.	
<u>CONTAINER DISPOSAL:</u>	
Do Not Puncture or Incinerate!	
<u>If empty:</u>	Place in trash or offer for recycling if available.
<u>If partly filled:</u>	Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.
