APR 3 2009

Subject: Label Notification(s) for Pesticide Registration Notices 2007-4

Dear Registrant:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated February 18, 2009 for:

**EPA Registration 1021-1773 Evercide® Residual Ant & Roach Spray 27523**

The Registration Division (RD) has conducted a review of this request for applicability under PRN 2007-4 and finds that the label change(s) requested falls within the scope of PRN-2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Banza Djapao of my staff at 703-305-7269.

Sincerely,

A handwritten signature in black ink, appearing to be "Linda Arrington".

Subject: EVERCIDE® Residual Ant & Roach Spray 27523  
EPA Reg. No. 1021-1773  
Notification Per PR-Notice 2007-4

Dear Sir or Madam:

By Notification we are changing the storage and disposal language to comply with the Final Rule "Pesticide Management and Disposal; Standards for Pesticide Containers and Containment".

Enclosed are 2 copies of the label. One copy has changes highlighted.

Notification of label change per PR Notice 2007-4. This notification is consistent with the guidance in PR Notice 2007-4 and the requirements of EPA's regulations at 40 CFR §§ 156.10, 156.140, 156.144, 156.146, and 156.156. No other changes have been made to the labeling or the Confidential Statement of Formula for this product. I understand that it is a violation of 18 U.S.C Sec. 1001 to willfully make any false statement to EPA. I further understand that if the amended label is not consistent with the requirements of 40 CFR §§ 156.10, 156.140, 156.144, 156.146, and 156.156, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

If there are any questions or you need anything further, please contact this office.

Sincerely,

McLAUGHLIN GORMLEY KING COMPANY

Steven K. Ditto

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**CAUTION**

Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and other wildlife. Do not apply directly to water. Do not contaminate water when disposing of equipment wash waters or rinsate.

PHYSICAL OR CHEMICAL HAZARDS

**Extremely Flammable. Contents under pressure.** Keep away from fire, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

EVERCIDE® Residual Ant & Roach Spray 27523 is intended for use in and around residential structures and their immediate surroundings. Permitted areas of use include Apartments, Atriums, Attics, Automobiles, Basements, Bathrooms, Boats, Cabins, Campers, Carports, Clothes Storage Areas, Condominiums, Decks,

Dens, Driveways, Garages, Gazebos, Homes, Kitchens, Lanais, Living Rooms, Parlors, Patios, Pet Sleeping Areas, Play Rooms, Porches, Recreational Vehicles, Rooms, Solariums, Storage Areas, Sun Rooms, Utility Rooms, and Verandas.

This product may stain or adversely affect vinyl, painted, and plastic surfaces. Avoid application to asphalt shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

Do not allow children or pets to contact treated surfaces until dry.

#### **For Crack and Crevice Treatment:**

Apply insecticide directly into cracks and crevices or voids using the injection tube. Place injector tip one half (1/2) inch into cracks and crevices, holes, and other small openings. Release approximately one-second spray per spot. For serious infestation, place spots approximately 12 inches apart. For light infestation or for preventative treatment, place spots approximately three feet apart. In long running cracks, move injector tip along the crack while spraying at the rate of three linear feet per second. For heavy infestations, move the injector tip along at one linear foot per second. For inaccessible, closed voids, calculate the void's cubic area and treat at rate of 5 – 10 seconds per cubic foot. Several holes may be required in long-running voids.

**Crawling Insects:** Ants, Booklice, Boxelder Bugs, Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Spiders, Ticks, Earwigs, Sowbugs, Scorpion, and Waterbugs. Inject into cracks, crevices, and void spaces where insects may harbor. These may include openings around pipes and sinks, under refrigerators, behind baseboards, washing machines, stoves, cabinets, meter boxes, and in manholes.

**Booklice and Silverfish:** Inject into cracks and crevices associated with baseboards, doorframes, bookcases, and other harborage sites.

**Ants:** Inject into cracks, crevices, and voids where ants may travel and/or harbor, including around doors and window frames, behind electrical switches and outlets, and other structural cracks and crevices.

**Stored Product Pests:** Inject cracks, crevices, and/or voids where these insects may harbor or hibernate. Infested areas include cracks and crevices in cabinets and pantries, wall voids, around window and door frames, under siding, and in machinery.

**Localized Treatment of Wood-infesting insects:** Beetles\*\*\*\* and Borers\*\*\*\* (such as the following families: Anobiidae\*\*\*\*, Bostrichidae\*\*\*\*, Buprestidae\*\*\*\*, Cerambycidae\*\*\*\*, Lyctidae\*\*\*\*, Oedemeridae\*\*\*\*, Sesiidae\*\*\*\*), Carpenter Ants, Carpenter Bees, Termites, and Wood Wasps. Locate suspected infestation and/or insect tunnels and cavities. Inject 5 – 10 seconds of spray into insect tunnels, galleries, and inaccessible closed voids. In infested sites, drill pilot holes 8 – 10 inches apart to ensure thorough insecticide gallery treatment. Make sure to not contact electrical wiring, plumbing, etc. when drilling. For Carpenter Bees, seal entrance openings with small pieces of stainless steel wool after application.

\*\*\*\*Not registered for control in California

\*\*\*The purpose of such applications of EVERCIDE® Residual Ant & Roach Spray 27523 for termites is to kill workers or winged reproductive forms which may be present in treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration or soil or foundation treatment but are merely a supplement. This product is not recommended as sole protection against termites. For active termite infestations, obtain a professional inspection.

**APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS:** Places other than private residences where food is held, processed, prepared, or served.

Do not apply directly to food. Do not apply when food-processing facility is in operation or food is exposed. Do not apply this product to surfaces or utensils that may come in contact with food. Cover or remove all food and food-processing equipment before application. Thoroughly clean food contact surfaces and equipment with an effective cleaning compound following treatment and rinse with potable water before use. Do not spray plants to be used for food or feed.

**FOOD AREAS:** Includes areas for Receiving, Storage, Packing (Canning, Bottling, Wrapping, Boxing), Preparing, Edible Waste Storage (Edible Oils and Syrups), and Enclosed Processing Systems (Mills and Dairies). Serving areas (when food is exposed and facility is in operation) are also considered food areas. Apply prescribed amount of insecticide directly into cracks and crevices or voids using injection tubes in points between different elements of construction, between equipment and door openings, into voids and hollow spaces in walls, and on equipment legs and bases where insects hide. Repeat application as needed but do not exceed more than one (1) application every seven (7) days in restaurants and similar food service establishments or more than one (1) application every fourteen (14) days in all types of food handling establishments.

**NON-FOOD AREAS:** Includes areas such as Garbage Rooms, Lavatories, Floor Drains (to sewers), Entries and Vestibules, Offices, Locker Rooms, Machine Rooms, Boiler Rooms, Garages, Mop Closets, and Storage (after canning or bottling).

#### **FOR PREMISE PESTS:**

Application Within Non-Residential Buildings Including Non-Food Areas of Industrial, Institutional and Commercial Buildings, Hotels, Warehouses, Truck Trailers, Theaters, and Office Buildings.

#### **For GENERAL USE: (Without Injection Tube)**

Apply as a coarse wet spray to thoroughly treat insect hiding places such as cracks, crevices, moist areas around pipes and utility service boxes, under refrigerators, and along baseboards to control insect pests listed below. Whenever possible, spray insects directly. Keep people and domestic animals off treated areas until dry. Do not spray on livestock feed. Do not apply to institutions (including libraries, hospitals, nursing homes, sport facilities, etc.) in the immediate area when occupants are present.

**Fleas and Ticks on Surfaces:** Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Do not spray animals directly. For best results, treat pets with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are severe. Test for staining on an inconspicuous area before use.

**To Kill Ants, Centipedes, Crickets, Cockroaches, Earwigs, Millipedes, Psocids, Pillbugs, Sowbugs, Spiders, and Waterbugs:** Apply to areas where these pests are found or may hide, including dark corners of rooms, storage rooms and closets, cracks and crevices in floors and walls, between building construction elements, along baseboards, door, and window frames, behind and beneath sinks, stoves, refrigerators and cabinets, and around garbage cans, bins, dumpsters, plumbing,

6096

and other utility service installations. Directly spray pests flushed from hiding. For Ants, spray ant trails, door thresholds, door and window frames (outdoors and indoors), and wherever these pests may find access into the building.

Spiders and Waterbugs: Apply as a coarse wet spray to floors, under sinks, areas behind and around pipes and utility service boxes, and in all areas where these insects seek harborage. Contact as many insects as possible.

Pantry Pests: To treat exposed stages of Grain Beetles (Rusty, Merchant, and Saw-toothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elm Leaf Beetles and Tobacco Moths. Remove all foodstuffs, utensils, and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry before installing fresh shelf paper and replacing food and utensils. Wash any exposed food handling surfaces and utensils before use.

Carpet Beetles (Black, Furniture, and varied): Spray on and under edges of floor coverings, under rugs and furniture, and in closets or other localities where these insects are found.

Webbing Clothes Moths: Spray in closets and other storage areas where these pests are found. Do not apply to clothing.

Ants: Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is slightly wet.

Fire Ants: To quiet active surface ants, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

For the Control of Garden Insects: For use on Roses, Dahlias, Asters, and other ornamentals to kill Japanese Beetles, Whiteflies, Aphids, Exposed Thrips, Spiders, Red Mites, Army Worms, and Leafminers. Not for use on plants being grown for sale or other commercial use.

To Kill Houseflies, Mosquitoes, Gnats, and Small Flying Moths: Close room and turn off air conditioning or ventilating equipment or fans. First, direct spray into all cracks and crevices, behind all equipment, appliances, cupboards, or in any dark harborage areas. Next use as a space spray, directing the spray towards the ceiling and upper corners of the room. Keep areas closed for at least 1/2 hour. Do not remain in treated area. Ventilate area thoroughly before re-entry. Do not repeat application more than once every three (3) days.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage ~~or~~ disposal.

~~STORAGE:~~ Store in a cool, dry place. Keep container tightly closed. **Pesticide Storage**

Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

~~PESTICIDE DISPOSAL:~~ Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

~~CONTAINER DISPOSAL:~~ **Pesticide Disposal and Container Handling**

Do Not Puncture or Incinerate!

Nonrefillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions.
