Minneapolis, MN 55428

Subject: Label Amendment - Registration Review Mitigation for Esfenvalerate
Product Name: EVERCIDE RESIDUAL ANT & ROACH SPRAY 27523
EPA Registration Number: 1021-1773
Case Number: 479136
Application Dates: 11/4/2020

Dear Thomas Lennan:

The Agency, in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, has completed reviewing all the information submitted with your application to support the Registration Review of the above referenced product in connection with the Esfenvalerate Interim Decision and has concluded that your submission is acceptable. The label referred to above, submitted in connection with registration under FIFRA, as amended, is acceptable.

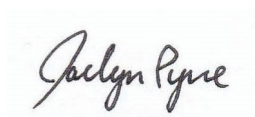

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling and must be used at your next label printing. You must submit one copy of the final printed labeling before you release the product for

shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

If you have any questions about this letter, please contact Carolyn Smith by phone at (202) 566-2273, or via email at smith.carolyn@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Jaclyn Pyne". The signature is written in a cursive, flowing style.

Jaclyn Pyne, Team Leader
Risk Management and Implementation Branch 3
Pesticide Re-Evaluation Division
Office of Pesticide Programs

ENCLOSURE: Stamped label

EVERCIDE® Residual Ant & Roach Spray 27523

Pressurized Crack & Crevice Insecticide

For both indoor and outdoor use

For Use in and Around the Home and Food and Non-Food Areas of Schools, Warehouses, Apartment Buildings, Cabins, Kennels, Theatres, Hospitals, Hotels, Motels, Meat Packing and Food Processing Plants, Nursing Homes, Recreational Vehicles, Restaurants, Supermarkets, Food Service Establishments, Tents, Transportation Equipment (Truck Trailers, Railroad Cars, Buses, Boats, Ships, Trains), Food Manufacturing and Warehousing Establishments, and Utilities

KILLS: Carpenter Ants, Carpenter Bees, Centipedes, House Flies, Cockroaches, Crickets, Earwigs, Fleas, Stored Product Pests, Silverfish, Sowbugs, Scorpions, Spiders, Termites**, Ticks, Wood Infesting Borers and Beetles, and Wood Wasps

ACTIVE INGREDIENTS:

*Esfenvalerate, (S)-cyano(3-phenoxyphenyl)methyl-(S)-4-chloro-alpha-(1-methylethyl)benzeneacetate	0.10%
**OTHER INGREDIENTS	99.90%
	100.00%

* CAS #66230-04-4

** Contains petroleum distillates

EVERCIDE® - Registered trademark of McLaughlin Gormley King Company

KEEP OUT OF REACH OF CHILDREN
CAUTION

ACCEPTED
01/21/2026
Under the Federal Insecticide, Fungicide
and Rodenticide Act as amended, for the
pesticide registered under
EPA Reg. No. 1021-1773

FIRST AID	
IF SWALLOWED:	<ul style="list-style-type: none">Immediately call poison control center or doctor.Do not induce vomiting unless told to do so by the poison control center or doctor.Do not give any liquid to the person.Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none">Take off contaminated clothing.Rinse skin immediately with plenty of water for 15-20 minutes.Call a poison control center or doctor for treatment advice.
IF IN EYES:	<ul style="list-style-type: none">Hold eye open and rinse slowly and gently with water for 15-20 minutes.Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.Call a poison control center or doctor for treatment advice.
NOTE TO PHYSICIAN: Contains petroleum distillate – vomiting may cause aspiration pneumonia.	
HOTLINE NUMBER: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-888-740-8712.	

Manufactured by

7325 Aspen Lane North
Minneapolis, MN 55428

EPA Reg. No. 1021-1773

EPA Est. No. 1021-MN-2

Net Weight: _____ Ounces (_____ Grams)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and other wildlife. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

PHYSICAL OR CHEMICAL HAZARDS

Extremely Flammable. Contents under pressure. Keep away from fire, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product
in a manner inconsistent with its labeling.

EVERCIDE® Residual Ant & Roach Spray 27523 is intended for use in and around residential structures and their immediate surroundings. Permitted areas of use include Apartments, Atriums, Attics, Automobiles, Basements, Bathrooms, Boats, Cabins, Campers, Carports, Clothes Storage Areas, Condominiums, Decks, Dens, Driveways, Garages, Gazebos, Homes, Kitchens, Lanais, Living Rooms, Parlors, Patios, Pet Sleeping Areas, Play Rooms, Porches, Recreational Vehicles, Rooms, Solariums, Storage Areas, Sun Rooms, Utility Rooms, and Verandas.

This product may stain or adversely affect vinyl, painted, and plastic surfaces. Avoid application to asphalt shingles as staining may occur. Before using in areas where spray may contact these surfaces, test in an inconspicuous area and recheck in a few hours.

USE RESTRICTIONS:

- Do not water the treated area to the point of runoff.
- Do not allow children or pets to contact treated surfaces until dry.
- Do not allow to enter indoor or outdoor drains. *No permita la entrada a desagües internos o externos.*

- {Note to reviewer: Pictogram must be no smaller than 1.5 cm² or 0.25 sq. in. unless size is greater than 10% of label size}
- Do not apply the product into fish pools, ponds, streams, or lakes. Do not apply directly to sewers or storm drains, or to any area like a drain or gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur.
- Do not apply or irrigate to the point of runoff.
- Do not make applications during rain. Avoid making applications when rainfall is expected before the product has sufficient time to dry (minimum 4 hours). Rainfall within 24 hours after application may cause unintended runoff of pesticide application.
- Do not allow the product to enter any drain during or after application.
- Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack-and-crevice treatment.
- Do not apply when the wind speed is greater than 15 mph.

All outdoor spray applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:

1. Application to pervious surfaces such as soil, lawn, turf, and other vegetation;
2. Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure;
3. Applications around potential exterior pest entry points into man-made structures such as doorways and windows, when limited to a band not to exceed one inch;
4. Applications to vertical surfaces (such as the side of a man-made structure) directly above impervious surfaces (e.g., driveways, sidewalks, etc.), up to 2 feet above ground level;
5. Applications to vertical surfaces directly above pervious surfaces, such as soil, lawn, turf, mulch or other vegetation) only if the pervious surface does not drain into ditches, storm drains, gutters, or surface waters.

SPRAY DRIFT ADVISORIES

- Take precautions to minimize spray drift.

For Crack and Crevice Treatment:

Apply insecticide directly into cracks and crevices or voids using the injection tube. Place injector tip one half (½) inch into cracks and crevices, holes, and other small openings. Release approximately one-second spray per spot. For serious infestation, place spots approximately 12 inches apart. For light infestation or for preventive treatment, place spots approximately three feet apart. In long running cracks, move injector tip along the crack while spraying at the rate of three linear feet per second. For heavy infestations, move the injector tip along at one linear foot per second. For inaccessible, closed voids, calculate the void's cubic area and treat at rate of 5 to 10 seconds per cubic foot. Several holes may be required in long-running voids. Spot treatments must not exceed two square feet in size (for example 2 ft. by 1 ft. or 4 ft. by 0.5 ft.). Treat surfaces to ensure thorough coverage but avoid runoff. To treat insects harbored in voids and cracks-and-crevices, applications must be made in such a manner to limit dripping and avoid runoff onto untreated structural surfaces and plants.

Crawling Insects: Ants, Booklice, Boxelder Bugs, Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), Centipedes, Crickets, Dermestids, Firebrats, Fleas, Palmetto Bugs, Silverfish, Spiders, Ticks, Earwigs, Sowbugs, Scorpions, and Waterbugs. Inject into cracks, crevices, and void spaces where insects may harbor. These may include openings around pipes and sinks, under refrigerators, behind baseboards, washing machines, stoves, cabinets, meter boxes, and in manholes.

Booklice and Silverfish: Inject into cracks and crevices associated with baseboards, doorframes, bookcases, and other harborage sites.

Ants: Inject into cracks, crevices, and voids where ants may travel and/or harbor, including around doors and window frames, behind electrical switches and outlets, and other structural cracks and crevices.

Stored Product Pests: Inject cracks, crevices, and/or voids where these insects may harbor or hibernate. Infested areas include cracks and crevices in cabinets and pantries, wall voids, around window and door frames, under siding, and in machinery.

Localized Treatment of Wood-infesting insects: Beetles**** and Borers**** (such as the following families: Anobiidae****, Bostrichidae****, Buprestidae****, Cerambycidae****, Lyctidae****, Oedemeridae****, Sesiidae****), Carpenter Ants, Carpenter Bees, Termites, and Wood Wasps. Locate suspected infestation and/or insect tunnels and cavities. Inject 5–10 seconds of spray into insect tunnels, galleries, and inaccessible closed voids. In infested sites, drill pilot holes 8 to 10 inches apart to ensure thorough insecticide gallery treatment. Make sure to not contact electrical wiring, plumbing, etc. when drilling. For Carpenter Bees, seal entrance openings with small pieces of stainless steel wool after application.

****Not registered for control in California

***The purpose of such applications of EVERCIDE Residual Ant & Roach Spray 27523 for termites is to kill workers or winged reproductive forms which may be present in treated channels at the time of treatment. Such applications are not a substitute for mechanical alteration or soil or foundation treatment but are merely a supplement. This product is not recommended as sole protection against termites. For active termite infestations, obtain a professional inspection.

APPLICATIONS IN FOOD HANDLING ESTABLISHMENTS: Places other than private residences where food is held, processed, prepared, or served.

Do not apply directly to food. Do not apply when food-processing facility is in operation or food is exposed. Do not apply this product to surfaces or utensils that may come in contact with food. Cover or remove all food and food-processing equipment before application. Thoroughly clean food contact surfaces and equipment with an effective cleaning compound following treatment and rinse with potable water before use. Do not spray plants to be used for food or feed.

FOOD AREAS: Includes areas for Receiving, Storage, Packing (Canning, Bottling, Wrapping, Boxing), Preparing, Edible Waste Storage (Edible Oils and Syrups), and Enclosed Processing Systems (Mills and Dairies). Serving areas (when food is exposed and facility is in operation) are also considered food areas. Apply prescribed amount of insecticide directly into cracks and crevices or voids using injection tubes in points between different elements of construction, between equipment and door openings, into voids and hollow spaces in walls, and on equipment legs and bases where insects hide. Repeat application as needed but do not exceed more than one (1) application every seven (7) days in restaurants and similar food service establishments or more than one (1) application every fourteen (14) days in all types of food handling establishments.

NON-FOOD AREAS: Includes areas such as Garbage Rooms, Lavatories, Floor Drains (to sewers), Entries and Vestibules, Offices, Locker Rooms, Machine Rooms, Boiler Rooms, Garages, Mop Closets, and Storage (after canning or bottling).

FOR PREMISE PESTS:

Application within non-residential buildings including non-food areas of Industrial, Institutional and Commercial Buildings, Hotels, Warehouses, Truck Trailers, Theaters, and Office Buildings.

For GENERAL USE: (without Injection Tube)

Apply as a coarse wet spray to thoroughly treat insect hiding places such as cracks, crevices, moist areas around pipes and utility service boxes, under refrigerators, and along baseboards to control insect pests listed below. Whenever possible, spray insects directly. Keep people and domestic animals off treated areas until dry. Do not spray on livestock feed. Do not apply to institutions (including libraries, hospitals, nursing homes, sport facilities, etc.) in the immediate area when occupants are present.

Fleas and Ticks on Surfaces: Remove pet bedding and destroy or clean thoroughly. Spray pet resting quarters. Do not spray animals directly. For best results, treat pets with an appropriate flea and/or tick control product registered for use on pets before allowing them to return to the treated area. Spray rugs and carpets where infestations are severe. Test for staining on an inconspicuous area before use.

To kill Ants, Centipedes, Crickets, Cockroaches, Earwigs, Millipedes, Psocids, Pillbugs, Sowbugs, Spiders, and Waterbugs: Apply to areas where these pests are found or may hide, including dark corners of rooms, storage rooms and closets, cracks and crevices in floors and walls, between building construction elements, along baseboards, door, and window frames, behind and beneath sinks, stoves, refrigerators and cabinets, and around garbage cans, bins, dumpsters, plumbing, and other utility service installations. Directly spray pests flushed from hiding. For Ants, spray ant trails, door thresholds, door and window frames (outdoors and indoors), and wherever these pests may find access into the building.

Spiders and Waterbugs: Apply as a coarse wet spray to floors, under sinks, areas behind and around pipes and utility service boxes, and in all areas where these insects seek harborage. Contact as many insects as possible.

Pantry Pests: To treat exposed stages of Grain Beetles (Rusty, Merchant, and Sawtoothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elm Leaf Beetles and Tobacco Moths. Remove all foodstuffs, utensils, and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry before installing fresh shelf paper and replacing food and utensils. Wash any exposed food handling surfaces and utensils before use.

Carpet Beetles (Black, Furniture, and varied): Spray on and under edges of floor coverings, under rugs and furniture, and in closets or other localities where these insects are found.

Webbing Clothes Moths: Spray in closets and other storage areas where these pests are found. Do not apply to clothing.

Ants: Spray around ant trails and hills. Spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris until surface is slightly wet.

Fire Ants: To quiet active surface ants, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

For the Control of Garden Insects: For use on Roses, Dahlias, Asters, and other ornamentals to kill Japanese Beetles, Whiteflies, Aphids, Exposed Thrips, Spiders, Red Mites, Army Worms, and Leafminers. Not for use on plants being grown for sale or other commercial use.

To kill House Flies, Mosquitoes, Gnats, and Small Flying Moths: Close room and turn off air conditioning or ventilating equipment or fans. First, direct spray into all cracks and crevices, behind all equipment, appliances, cupboards, or in any dark harborage areas. Next use as a space spray, directing the spray towards the ceiling and upper corners of the room. Keep areas closed for at least ½ hour. Do not remain in treated area. Ventilate area thoroughly before re-entry. Do not repeat application more than once every three (3) days.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Follow proper disposal procedures on this label. Siga las indicaciones del etiquetado para el desecho apropiado del producto.

PESTICIDE STORAGE

Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING

Do Not Puncture or Incinerate!

Non-refillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Do not pour or dispose down-the-drain or sewer. Call your local solid waste agency for disposal instructions.

Federal regulations prohibit
CFC propellants in aerosols
