For best results, lawn should be mowed a day or two before spraying. Spray using a slow, even sweeping motion, being sure to cover the entire lawn surface where pets will normally frequent. Spray under ornamentals and trees, but avoid soaking young or flowering plants. Repeat treatments may be necessary at 7 to 14 day intervals. Kills on contact the *Ixodes dammini* tick (Deer Tick), which transmits Lyme disease. Also kills foraging Fire Ants upon direct contact. Use a registered fire ant mound treatment in conjunction with this product.

Keep pets and children out of treated areas until after the spray has dried. Do not spray animals. Treat dogs, cats, and their kennel or bedding area with a registered flea and tick control product in conjunction with this application.
