***Non-food / non-feed areas only

EVERCIDE® CARPET & SURFACE SPRAY 28011 contains a combination of two active ingredients that stop fleas in two ways and controls [kills] other listed insects. The first active ingredient is ETOC™, a highly active non-residual insecticide that provides effective, quick kill and rapid knockdown of insects upon direct contact. Permethrin, the second active ingredient, provides residual activity.

EVERCIDE® CARPET & SURFACE SPRAY 28011 can be used to control [kill] fleas hidden in carpets, rugs, draperies, upholstery, pet bedding, floors, cracks, crevices, and cabinets. Occasionally, adult fleas may be present in treated areas when reintroduced from infested animals.

To protect your pet against and to minimize reintroduction of adult fleas from outdoors, use EPA registered flea and tick products, ([such as] flea or flea and tick collar, pet powder, pet spray, pet dip, pet shampoo, flea shampoo or flea and tick pet shampoo), in conjunction with this application and prior to re-entry. As part of a complete flea control program use EPA registered outdoor [lawn] spray.

COCKROACH CONTROL WITH EVERCIDE® CARPET & SURFACE SPRAY 28011 is a powerful [effective] formula that reaches cockroaches through cracks and crevices to kill them where they hide.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ALL DIRECTIONS COMPLETELY BEFORE USE

Do not use in food/feed areas of food/feed handling establishments, restaurants or other areas where food/feed is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms, but excluding areas where foods may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Non-food/feed areas of food/feed handling establishments where the product can be used include areas such as (but not limited to) garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage areas (after canning or bottling).

Do not apply this product in patient rooms or in any rooms while occupied by the elderly or infirm.

Do not apply in classrooms when in use.

Do not apply in institutions such as libraries, sports facilities, etc. when occupants are present in the immediate area.

Do not use on animals. Avoid contamination of food and animal feed.

SHAKE WELL BEFORE USE. Hold container upright and spray as directed.

DIRECTIONS:

To operate sprayer, turn spray tip to proper setting (broad) (fine) for surfaces or pin stream for cracks and crevices, and pump trigger to spray as directed. [Do not operate in OFF position.] [After use, turn tip to OFF to avoid accidental spraying.]

For best results, follow directions for specific use areas. Avoid excessively wetting furniture and carpeting. Always test in an inconspicuous [hidden] area prior to use as some natural and synthetic fibers may be adversely affected by any liquid product.

DO NOT CONTAMINATE FOOD AREAS.

FLEA AND TICK CONTROL:

FOR SURFACE AND CARPET SPRAY: Prior to application, thoroughly vacuum all carpeting and upholstered furniture, along baseboards, under furniture, and in closets. Put vacuum bag into a sack and dispose of in outside trash. Apply uniformly at the rate of 1 quart [32 fluid ounces] per 1,000 square feet [1 fluid ounce per 31 square feet] to rugs, carpets, draperies and all surfaces of upholstered furniture. Treat under and around furniture if pets frequently rest in these areas. Avoid excessively wetting of upholstered furniture and draperies; a fine spray applied uniformly is all that is necessary. To kill ticks and other labeled insects, apply directly to pests. Do not allow children or pets to contact treated surfaces until completely dry. Do not spray on pets or humans.

FOR USE IN VEHICLES: If flea infested animals are transported in vehicles, use as directed above to control infestation.

Use EVERCIDE® CARPET AND SURFACE SPRAY 28011 with an EPA registered room fogger labeled for fleas for particularly heavy flea infestation. As part of a complete flea control program use EPA registered [brand name] outdoor [lawn] spray.

FOR USE IN PET AREA: Treat pet bedding and other pet resting places as these are primary hiding areas for fleas and ticks. No need to remove pet bedding after treatment. To reduce infestation, spray around sleeping areas, baseboards, window and door frames, wall cracks, local areas of floors, and other resting places until the surface is slightly moist. Also, spray the entire inside surface of doghouses and kennels. Do not allow pets to enter treated areas until completely dry.

For best results, to protect your pet against and to minimize reintroduction of adult fleas from outdoors, use EPA registered flea and tick products such as: flea or flea and tick collar, pet powder, pet spray, pet dip, pet shampoo, flea shampoo or flea and tick pet shampoo, in conjunction with this application and prior to re-entry.

FOR COCKROACH CONTROL:

Cockroaches [adults (nymphs)], [Brown-banded Cockroach, Asian Cockroach, German Cockroach, American Cockroach, Australian Cockroach, Oriental Cockroach] Waterbugs, and Palmetto Bugs.

CRACK AND CREVICE SPRAY: (Use a pin stream spray). Pay special attention to the following areas: behind baseboards, connection areas around drains, pipes and plumbing areas, behind and beneath sinks and stoves, and other visible cracks and crevices. Spray these areas thoroughly, being certain that spray penetrates well.

CONTACT APPLICATION: (Use a [broad] [fine] spray pattern on all surfaces). Spray at the rate of 1 gallon [128 fluid ounces] per 1,000 square feet [1 fluid ounce per 8 square feet] and contact as many insects as possible with this spray. Also, thoroughly spray all parts of the room suspected of harboring these pests. Pay special attention to the following hiding places: beneath sinks, behind and beneath stoves and refrigerators, around garbage cans, cabinets, along the outside of baseboards, door sills, frames and floors, around and on drains, pipes, plumbing, behind bookcases, storage and other utility installation areas. Contact insects with spray whenever possible.

FOR CONTROL OF Crickets, Firebrats, Silverfish, Booklice, Scorpions, Spiders, Centipedes, Sowbugs, Pillbugs, Earwigs, Clover Mites and Millipedes: Contact as many insects as possible with this spray and thoroughly spray all parts of the room suspected of harboring these pests. Pay special attention to the following hiding places: beneath sinks, behind and beneath stoves and refrigerators, around garbage cans, in cabinets, along the outside of baseboards, door sills, and frames, on floors, around and on drains, pipes, and plumbing, and behind bookcases, storage areas, and other utility installation areas. Contact insects with spray whenever possible.

EXPOSED STAGES OF Flour Beetles, Cadellies, Rice Weevils, Flat Grain Beetles, Cigarette Beetles, Confused Flour Beetles, Drugstore Beetles, Lesser Grain Borers, Merchant Grain Beetles, Saw-toothed Grain Beetles, Grain Weevils, Warehouse Beetles, Red Flour Beetles, Grain Mites, and Cheese Mites. Find and dispose of infested packaged goods. Remove all

other items from pantries, shelves, and drawers and clean thoroughly. Spray into cracks, crevices, shelves, drawers, cabinets, and other areas where these insects congregate. Place fresh paper on the shelves and return packages after the spray has dried.

ANTS, Foraging Fire Ants, Pharaoh Ants: Treat around doors and window frames, ant trails, and other areas of entry. Spray on ants where possible.

CARPET BEETLES [Dermeestids (Trogoderma)]: Directly spray as many insects as possible. Spray all surfaces of upholstered furniture. Where possible, both top and bottom of rugs and carpets should be sprayed thoroughly. Also treat shelves, closets, and areas under furniture, floors, walls, windowsills, baseboards and wherever these insects are seen or suspected. Backing of carpets and rugs should be allowed to dry before re-laying on floor. Keep children and pets off treated surfaces until completely dry.

CLOTHES MOTHS: Remove any infested articles from storage, brush thoroughly, and air for several hours in sunlight, if possible. Apply liberally to empty chests, closets, bureaus and other storage areas where these pests are suspected, directing the spray into cracks, joints, and crevices. Return clean articles after spray has thoroughly dried.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store product with spray nozzle closed. Store in a cool, dry storage area, preferably one that can be locked. Store container upright and in the original container.

DISPOSAL:

If empty: Do not reuse this container. Place in trash or offer for recycling if available.
If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
