MCLAUGHLIN GORMLEY KING COMPANY, D/B/A MGK

Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Added referral statement an optional images to label
Product Name: EVERCIDE ANT AND ROACH SPRAY 21322
Admin Number: 1021-1808
EPA Receipt Date: 08/18/2025
Action Case Number: 00664960

Dear Chantha Coursolle:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Robert Mitchell via email at mitchell.robert@epa.gov.

Sincerely,

Elizabeth Fertich, Product Manager 04

EVERCIDE® Ant and Roach Spray 21322

[] OR () indicates alternate or optional wording

[Kills and Repels Ants including Carpenter Ants]
[Barrier Spray]
Easy to spray into hard to reach places]
[Odorless]
[Keeps Ants from entering home]
[Kills ants trailing around the outside of your home]
[Kills and repels invading ants]
[Precision Spray Tube directs spray where it is needed most]
[Extra Spray Tube included]
[Also kills Cockroaches, crickets, Carpenter bees, Spiders,
Boxelder bugs and other home invaders]

[Repels ant invasions]

FOR OUTDOOR USE ONLY

[Effective [long term] control]
[Sprays 10 to 15 feet]
[Water-based]
[Non-staining]
[Kills Carpenter ants]
[Expanding foam]
[Provides rapid knock-down and kill]

NOTIFICATION

1021-1808

The applicant has certified that no changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

09/04/2025

ACTIVE INGREDIENTS:

* Permethrin	0.200%
Related reaction products	0.017%
Tetramethrin	0.200%

OTHER INGREDIENTS	99.583%
	100.000%

* Cis-trans isomers ratio: Min. 35% (+ or -) cis and Max. 65% (+ or -) trans

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to aquatic organisms, including fish and invertebrates. Do not apply directly to or near water. Drift and runoff may be hazardous to fish in water adjacent to treated areas. Do not contaminate water when disposing of equipment washwater, or rinsate. See Directions for Use for additional precautions and requirements.

This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do not use this product in or on electrical equipment due to possibility of shock hazard.

DIRECTIONS FOR USE

It is a violation of Federal law to use
this product in a manner inconsistent with its labeling.

READ ALL DIRECTIONS COMPLETELY BEFORE USE

EVERCIDE® Ant and Roach Spray 21322 [brand name] is intended to use around residential structures to keep ants from entering the structure. The product will deliver a stream of product 10 to 15 feet long to help you treat hard to reach areas around the house. Direct your application to areas that ants and other insects use as common entry points and foraging trails. This product is especially useful outside in early spring when ants emerge and attempt to enter the house. Use it again in the fall when ants may attempt to come inside for the winter.

SHAKE WELL BEFORE EACH USE. HOLD CONTAINER UPRIGHT. APPLY IN SHORT BURSTS and always use the enclosed red extension tube to direct the application. A spare red extension tube is included with each can.

For best results, follow directions for specific insects and use areas. **This product is designed for outdoor use.** Do not use on animals. Any liquid product may adversely affect some building materials. Always test in an inconspicuous [hidden] area prior to widespread use.

DO NOT CONTAMINATE FOOD AREAS.

Do not allow adults, children or pets to enter the treated area until sprays have dried.

Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift.

Do not water the treated area to the point of runoff.

Do not make applications during rain.

All outdoor applications must be limited to spot or crack and crevice treatments only, except for the following permitted uses:

- (1) Treatment to soil or vegetation around structures;
- (2) Applications to lawns, turfs, and other vegetation;
- (3) Applications to building foundations, up to a maximum height of 3 feet.

Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack and crevice applications, only.

Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

OUTDOOR USE: (Graphic – Picture of the side of a house and the can and the area to treat)

Spray with caution when wind conditions may create a mist that may blow back to applicator. Always attempt [try] to use the attached red extension tube or spare. When engaged, spray will shoot out a stream 10 to 15 feet long. The liquid will expand upon hitting a target surface, and then leave an invisible residual deposit to kill ants. Look for ant activity around the outside of the house and spray outdoor surface areas, contacting as many insects as possible. Do not apply this product in or around bodies of water.

ANTS: Focus your treatment in key areas outside the house where you suspect ants are entering the structure, such as around downspouts and gutters and near windowsills and door openings. Spray ants directly where possible. Seal up any visible exterior cracks where ants can be seen entering the home. Spray ant trails, hills, and mounds and other areas of entry and infestation.

CARPENTER ANTS: Carpenter ants usually come from an outside colony and enter your house looking to establish a satellite colony in an area containing water-damaged wood. Carpenter Ants are easy to identify because they are larger than all other pest ants. Often you will find them living in wood that has been in contact with water, such as around downspouts and gutters, near windowsills and door openings, close to leaking water pipes, or around decks. Carpenter ants are most active between dusk and dawn. Locate their outside trails during this time. Carpenter ants follow distinct trails such as edges of landscape timbers, along the ground close to outside walls, near downspouts, or along the edge of an outside wall. After a careful inspection around the outside of the house, apply EVERCIDE Ant and Roach Spray 21322 [brand name] to all areas where you suspect ants are entering the home. Seal any visible exterior cracks where ants can be seen entering the home. If ants are discovered inside the home, use a suitable indoor ant control product [name brand] to treat indoors. If you find the main colony outside in the yard, treat areas where ants are seen entering the main colony.

SPIDERS: Spray directly on spiders and webs.

CRAWLING INSECTS: Cockroaches, Boxelder Bugs, Lady Bugs (Multicolored Asian Lady Beetles), Crickets, and Sowbugs. Focus your treatment in key areas outside the house where you suspect these insects are entering the structure, such as around downspouts and gutters and near windowsills and door openings. Spray insects directly where possible. Seal up any visible exterior cracks where crawling insects can be seen entering the home.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE

Store in a cool, dry area. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING

Do Not Puncture or Incinerate!

Non-refillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions.
