Minneapolis, MN 55427-4319

**Subject: Revised Reregistration Labeling
MGK® Pressurized Insect Spray 2850, EPA Reg. No. 1021-1825
Your Submission Dated December 18, 2007**

Dear Ms. Schlekau:

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable with the following provision(s):

First Aid statement comment(s), right-hand side of page 1 of 2:

1. Delete the statement in the 3rd text row starting with "IF YOU SUSPECT A REACTION TO THIS PRODUCT:" Per PR Notice 2001-1, this statement should appear as revised in the Directions for Use section (as included in Point #5 below) rather than as part of the First Aid statement.
2. Insert the following text as a new row at the end of the existing First Aid statement as follows: "**Note to Physician:** Probable mucosal damage may contraindicate the use of gastric lavage."

Directions for Use section comment(s), right-hand side of page 1 of 2:

3. In the 10th sentence of the 2nd paragraph, replace the misspelled word "yees" with the word "eyes."

Directions for Use section comment(s), left-hand side of page 2 of 2:

4. Replace the last 5 sentences of the 2nd paragraph with: "When using on children, apply to your own hands and then put it on the child. Instruct older children in the proper use of this product. Apply this product second if used in conjunction with a sunscreen product. After returning indoors, wash treated skin with soap and water or bathe. This is particularly important when repellents are used repeatedly in a day or on consecutive days. Do not use under clothing. For Chiggers and Ticks, apply to shirt and pant cuffs or socks."
5. Replace the 4th paragraph with: "Never use repellents over cuts, wounds or irritated skin. Causes substantial but temporary eye injury. Do not get in eyes. Do not apply to children's hands. Do not use on infants. Repellents should be applied only to exposed skin and/or clothing such as shirt, pants, hat and socks. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash treated clothing before wearing it again. Use of this product may cause skin reactions in rare cases. If you suspect a reaction to this product, discontinue use, wash treated skin and call your local poison control center. If you go to a doctor, take this repellent product with you."

The product must be packaged in containers utilizing a **concave trigger to help aim product** or other comparable mechanism that will ensure that the product will not be inadvertently sprayed in the eyes.

McLaughlin Gormley King Company should note that the Agency is in the process of developing and improving the current Efficacy Assessment Guidelines for repellent products. The Agency intends to defer the determination of any related efficacy data requirements supporting the claims that may appear on this label until these Efficacy Assessment Guidelines are complete. When the guidelines are finalized, the Agency expects to issue a Data Call-In to address the revised guidelines to all registrants with registrations for personal repellent products that have not previously submitted efficacy data sufficiently consistent with the revised guidelines.

Please submit two (2) copies of the final printed labeling, incorporating the above changes, before releasing the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing amended labeling constitutes accepting of these conditions. A stamped copy of the label is attached for your records. If you have any questions about this label review, please contact Carmen Rodia at (703) 306-0327 or via e-mail at Rodia.Carmen@epa.gov.

Sincerely yours,

For

Richard J. Gebken,
Product Manager (10)
Insecticide Branch,
Registration Division (7505P)

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes substantial but temporary eye injury. Harmful if swallowed. Do not get in eyes. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS

Flammable. Contents under pressure. Keep away from heat, sparks, and open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

MGK® Pressurized Repellent Spray 2850 provides protection against Mosquitoes, Black Flies, Stable Flies, Sand Flies, Gnats, Chiggers, Fleas, and Ticks. Convenient, easy to use aerosol spray allows quick and thorough application to skin, hair, and clothing for maximum protection.

[STOP] Read and follow all directions and precautions on this product label. Hold container upright about 4 to 6 inches from skin or clothing. Do not use as a face spray. Do not spray in enclosed areas. Avoid breathing a spray product and do not use it near food. Spray and spread evenly with your hand to moisten all exposed skin. Use just enough repellent to cover exposed skin and/or clothing. Heavy application and saturation is unnecessary for effectiveness. If biting insects do not respond to a thin film of repellent, apply a bit more. Do not apply near eyes and mouth, and apply sparingly around ears. When using sprays, do not spray directly into face, spray on hands first and then apply to face. Do not allow children to

handle this product, and do not apply to children's hands. When using on children, apply to your own hands and then put it on the child. Never use repellents over cuts, wounds, or irritated skin. Repellents should be applied only to exposed skin and/or clothing such as shirt, pants, hat and socks. Do not use under clothing. For Chiggers and Ticks, apply to shirt and pant cuffs or socks.

NOTE: Will not damage cotton, wool, or nylon. Do not apply on or near acetate, rayon, Spandex or synthetics other than nylon, furniture, plastics, watch crystals, leather, and painted or varnished surfaces (including automobiles).

After returning indoors, wash treated skin with soap and water or bathe. This is particularly important when repellents are used repeatedly in a day or on consecutive days. Also, wash treated clothing before wearing it again. Use of this product may cause skin reactions in rare cases. If you suspect a reaction to this product, discontinue use, wash treated skin and call your local Poison Control Center. If you go to a doctor, take this repellent product with you.
