

U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
 Registration Division (7505C)
 1200 Pennsylvania Ave., N.W.
 Washington, D.C. 20460

EPA Reg. Number:

1021-2568

Date of Issuance:

NOV 10 2011

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Term of Issuance:

Unconditional

Name of Pesticide Product:

MGK 2960

Name and Address of Registrant (include ZIP Code):

MGK
 8810 Tenth Avenue North
 Minneapolis, MN 55427

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA section 3(c)(5) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product when the Agency requires all registrants of similar products to submit such data.
2. Make the following label change before you release the product for shipment:
 - Revise the EPA Registration Number to read, "EPA Reg. No 1021-2568."
 - On page 2, revise the use restriction listed under the directions for use for "Gel Bait" to read "Apply gel bait in areas inaccessible to children, domestic animals, and pets"

EPA Reg. No. 1021-2568

3. Storage stability (830.6317) and corrosion characteristics (830.6320) data must be submitted within 18 months from the date of this registration notice.

4. Submit one copy of the revised final printed label for the record before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. If you have any questions, please contact Autumn Metzger at 703-305-5314 or metzger.autumn@epa.gov.

A stamped copy of the label is enclosed for your records.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product
In a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use restrictions. Use only for the sites, pests and application methods described on this label.

RESTRICTIONS FOR ALL USES:

- Do not treat areas that are easily accessible to children and pets
- Do not apply in or on electrical equipment due to the possibility of shock
- Do not apply to surfaces that food contacts
- Do not allow open foods to contact gel material
- Do not contaminate feed, food products, food preparation surfaces, dishes, kitchen utensils or food containers

PRODUCT FACTS:

Kills	Ants (Acrobat, Argentine, Big-headed, Cornfield, Crazy, Field Ghost, Grease, Honey, Little Black, Odorous House, Pavement, Pyramid, Rover, Sweet Eating, Thief, and White-footed). Except Fire, Harvester, Carpenter and Pharaoh Ants.
Where to use	In and around homes and other buildings/structures Where listed ants have infested or where they travel to seek food, water or shelter.
When to use	When ants are observed or there is evidence of ants In/around a home, building or structure.

How it works:

- Ants carry food back to nest where the colony feeds and dies
- Kills the Queen to Stop the Reproduction Cycle
- A reduction in activity should be noticeable within one week after gel application

WHERE TO USE:

Indoors:

- Kitchens/Bathrooms/Basements/Garages/Laundry Rooms
- May be used indoors applied as a crack and crevice or spot treatment in and around single and multi-family residential buildings.
- Apply to areas frequented by listed ants such as along baseboards and shelves, openings leading into voids and hollow spaces in floors, walls and ceilings, equipment legs and bases, around plumbing pipes (sinks, basins, water pipes and drains), doors and window frames, behind and under appliances (refrigerators, stoves, dishwashers, washing machines, etc.), cabinets, and in cracks and crevices where ants/ant trails are typically seen.

Outdoors:

- Ant Nests/Sidewalks/Patios/Doorsills/Windows/Foundation Cracks/Utility Entry Points
- May be used outdoors applied as a spot or thin bead where ants are seen entering the building, in cracks and crevices on windows, doorsills and openings in the foundations, and directly on ant nests.

HOW MUCH TO USE [APPLY]:

- A typical ant infestation may require as little as 1 to 20 grams of bait per 100 square feet.
- A heavy ant infestation may require between 20 and 30 grams of bait per 100 square feet.

[(Directions For Use For Filling Bait Stations:)

Use Restrictions

- Place bait trap in areas inaccessible to children, domestic animals, and pets

Application Instructions

- Place bait stations 10 to 20 feet apart on a horizontal surface.
- Do not interfere with the ants or bait stations during use
- Replace bait stations if ants return or after 1 month [to keep ants from returning]
- Do not use insecticide sprays or strong cleaners around the bait station placements. The use of these products will repel the ants and keep them from approaching the bait station.]

[(Directions For Use For Gel Bait :)

Use Restrictions

- Apply gel bait and bait trays in areas inaccessible to children, domestic animals, and pets

HOW TO USE:

- 1) Depending on the size of the infestation, use 1 to 30 grams of gel for every 100 square feet.
- 2) Apply gel in pea-sized droplets or in a thin bead [See Figures 1, 2, 3] in Examples of Ant Gel Amounts Section]
- 3) Use paper towel to remove unwanted bait placements and then discard in trash
- 4) Do not use insecticide sprays or strong cleaners around surfaces that this product is applied to. The use of these products will repel the ants and keep them from approaching the gel bait.
- 5) Inspect gel regularly and replace as needed
- 6) Excess gel deposit may be cleaned up by using damp paper towel or rag while still wet or, if dried, use putty knife to scrape and discard in trash.
- 7) Spot Treatments: Apply approximately 0.1 to 1.0 grams or 1/8 to ¼ inch in diameter spots [Figures 1 and 2]
- 8) Crack and Crevice: Apply beads [lines] of ant gel bait that are approximately 1/8 inch wide and approximately 2 inches long [Figure 3]

Examples of Ant Gel Amounts:

Figure 1: Spot of gel approximately 0.1 grams

Figure 2: Spot of gel approximately 1.0 grams

Figure 3: Line of gel approximately 1/8 inch x 2 inches]

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry place. Keep container closed.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying and offer for recycling, if available or reconditioning, if appropriate or dispose of in a sanitary landfill or by other procedures approved by State and Local authorities.
