U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs  
Registration Division (7504P)  
1200 Pennsylvania Ave., N.W.  
Washington, D.C. 20460-0001

EPA Reg. Number:

1021-2582

Date of Issuance:

MAY 24 2012

NOTICE OF PESTICIDE:

Registration  
 Reregistration  
(under FIFRA, as amended)

Term of Issuance:

Unconditional

Name of Pesticide Product:

MGK® Formula 29663

Name and Address of Registrant (include ZIP Code):

McLaughlin Gormley King Company  
8810 Tenth Avenue North  
Minneapolis, MN 55427-4319

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with section 3(c)(5) of FIFRA provided that you:

1. Submit and/or cite all data required for registration of your product under section 3(c)(5) of FIFRA when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under section 4 of FIFRA.

(continued on page 2)

Signature of Approving Official:

Refer to Page #2.

Richard J. Gebken, Product Manager (10)  
Insecticide Branch, Registration Division (7504P)

Date:

MAY 24 2012

EPA Form 8570-6

2. Make the following change(s) to the subject label:

- a. Change the product registration number to "EPA Reg. No. 1021-2582"
- b. Make the following label revisions:

General Comments:

- 1. The word "New" is permitted for a period not to exceed six (6) months from the original date of registration for the subject product. For more detail regarding the basis for this label review comment, please refer to Chapter 12, Section VII.7 of the Agency's Label Review Manual (LRM). **As such, the word "New" must be deleted from this label by no later than November 24, 2012.**

Efficacy Review comment(s):

- 2. Based upon review of the cited efficacy (product performance) data, the efficacy claims on the proposed label are adequately supported, and thus acceptable, with the following two (2) exceptions:
  - Revise the optional marketing claim at the top of page 2 of 6 which reads "To prevent future infestations for 7 months." to read "To prevent future flea infestations for 7 months."
  - Delete the optional text "[Crawling insects]" in the CARPET BEETLES claim on page 5 of 6, as it could imply a general crawling insect claim, which is not adequately supported.

Directions for Use, USE RESTRICTIONS subsection comment(s):

- 3. Revise the 3<sup>rd</sup> bulleted use restriction to read "THIS PRODUCT IS FOR INDOOR USE ONLY."

Directions for Use, NON-FOOD LIVESTOCK HOUSING STRUCTURES subsection comment(s):

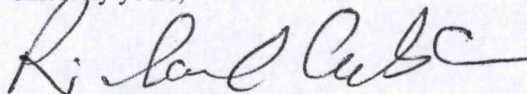

- 4. The proposed label includes use sites within this subsection that could possibly be interpreted as outdoor uses. In addition, since MGK submitted a technical use deletion request for MGK-264 insecticide synergist which deleted most outdoor uses, and residential outdoor use is now limited to building surfaces/spot treatments on structures only, you must make the following changes to be consistent with MGK's outdoor use deletion request:
  - Revise the words "(Premise Spray)" to read "(Indoor Premise Spray)."
  - Insert the following new text immediately following the words "... and Zoos" within this subsection: "Do not apply this product to non-food livestock housing structures while occupied by animals."

Conditional Data Requirements:

- 5. Within one (1) year from the date of this registration, MGK Company must submit a One Year Storage Stability (830.6317) study and a Corrosion Characteristics (830.6320) study on this product in support of this registration. MGK Company must conduct these studies in commercial containers, and it is recommended that the observations be made at 0, 6, 9, and 12 month intervals.
- 3. You must submit two (2) copies of the revised final printed labeling, incorporating the above changes, before releasing the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with section 6(e) of FIFRA. Your release for shipment of the product bearing amended labeling constitutes accepting of these conditions.

Copies of your label stamped "Accepted with Comments" as well as the acute toxicology, product chemistry, and efficacy reviews completed for this product are enclosed for your records. If you have any questions about this label review, please contact Mr. Carmen J. Rodia, Jr. at (703) 306-0327 or via e-mail at [Rodia.Carmen@epa.gov](mailto:Rodia.Carmen@epa.gov).

Sincerely yours,

Richard J. Gebken  
Product Manager (10)  
Insecticide Branch  
Registration Division (7504P)

Enclosures: Copy of label stamped "Accepted with Comments"

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS:

- Apply this product only as specified on this label.
- Do not contaminate food or feedstuffs.
- THIS PRODUCT IS INTENDED FOR INDOOR USE ONLY
- Do not use in aircraft cabins
- Do not apply this product directly to companion animals (pets).
- Do not apply this product when food, feed and/or drinking water is present.
- Do not allow adults, children, or pets to enter the treated area until sprays have dried.
- Do not apply this product in a way that will contact adults, children or pets, either directly or through drift.
- Do not use if food areas of food handling establishments, restaurant, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where foods are served, such as dining rooms, but excluding areas where foods may be prepared or held. In the home, cover all food processing surfaces and utensils during treatment, or thoroughly wash utensils before use. Cover exposed food and drinking water, and remove utensils before use.
- Do not apply directly into sewers or drains, or to any area like a gutter where drainage to storm sewers, water bodies, or aquatic habitat can occur. Do not allow the product to enter any drain during or after application
- Remove pets, birds and cover fish aquariums and ornamental fish ponds before spraying, and turn aquarium systems off.

USE INFORMATION:

For indoor use in homes, apartments, schools, dorms, [and] residential living areas, [hotels and other commercial buildings].

For best results before any carpet/surface treatment, vacuum thoroughly before spraying and immediately dispose of vacuum bag in outside trash.

*[Thoroughly vacuum all carpeting, upholstered furniture, drapes, along baseboards, under furniture and in closets. Seal vacuum bag and dispose of in outdoor trash.]*

Before treatment, SHAKE WELL and make a test application to surfaces to be treated in an inconspicuous place.

**FLEAS & TICKS:** [Turn container upside down and point valve toward surface to be sprayed]. Hold can upright 2 or 3 feet from surfaces to be treated. [Be sure to apply uniformly using a sweeping motion to carpets, rugs, flooring, drapes and all surfaces of upholstered furniture including under cushions. Avoid over wetting furniture and carpeting. A fine mist or spray applied uniformly is all that is necessary to kill fleas and ticks. Be sure to treat pet bedding, as this is a primary hiding place for fleas, ticks, and their eggs. No need to remove pet bedding after treatment. **DO NOT TREAT PETS WITH THIS PRODUCT.** Use a registered flea control product on your pets in conjunction with this treatment. Allow all surfaces to dry before use.

*[ALTERNATE Flea USE INSTRUCTIONS No. 2]:*

*Fleas:*

*Use [Brand Name] Flea & Tick Home Spray in homes, garages, attics, apartments and other residential living areas. [A single can] [One], [4 oz] [8 oz] can will treat a surface area equivalent to approximately [five 10' x 10'] [ten 10' x 10'] rooms. A fine spray applied uniformly is all that is necessary to kill fleas. Remove birds and cover aquariums before spraying.*

*For maximum effectiveness treat entire carpeted area. Treat carpets, rugs, drapes and all surfaces of upholstered furniture. Retreat as necessary.*

To kill ticks, roaches, silverfish, earwigs and ants(excluding fire ants and pharaoh ants) in the environment, apply directly to pests.

[ALTERNATE Flea & Tick USE INSTRUCTIONS No. 3]:

**FLEAS (Adults and Larvae) AND TICKS (Adults):**

**FOR USE IN HOME**

For best results, pay special attention to area your pets frequent. Avoid thoroughly wetting the area that needs treating. To kill adult fleas, flea larvae, and adult ticks in your home, hold container [upside down] 2 to 3 feet from surface, point actuator toward the surface, and push button.

**For Surface/Carpet Spray:** Vacuum thoroughly before spraying. A test application should be made to upholstery or drapery fabrics in an inconspicuous place before use. Apply uniformly with a sweeping motion to rugs, carpets, drapes, and all surfaces of upholstered furniture. Treat surfaces uniformly from one end to the other. Only complete coverage of carpets, upholstery, drapes, and other fabrics will provide thorough flea/tick elimination.

**For Use in Pet Areas:** Pay special attention to areas where pets frequent, such as in and around sleeping and resting areas.. Treat pet bedding and other pet resting areas as these are primary hiding areas for fleas/ticks. For best results, pets should be treated before they return to the treated areas.

**On Pet Bedding:** Treat pet bedding and resting places. Apply a uniform application of [this product] to nearby cracks and crevices, along and behind baseboards, window and door sills, and localized area of floors where fleas or ticks may be present as these are primary hiding places for fleas. Pet bedding does not need to be removed after treatment. [For best results, treat pets before they return to treated areas.]

**Indoor Kennels:**

**REMOVE PETS BEFORE SPRAYING**

Spray [this product] from 2 feet to 3 feet away from surface being treated. Apply with a smooth back-and-forth motion. A fine mist spray that is evenly applied will do the job properly. Repeat treatment as necessary to control fleas and ticks. [For best results, treat pets before they return to the treated areas.]

**BED BUGS:** Thoroughly inspect area of suspected bed bug infestation and note potential harborage sites or actual infestations. Remove and /or pick up clothing and other obstacles that may prevent thorough inspection or treatment. Remove and sanitize infested bedding (pillows and linens), clothing, or other items. Apply on mattresses as a spot treatment to mattress seams, edges, buttons, and tufts of bed only. Do not use directly on pillows, bed linens, or clothes. Do not saturate the mattress and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillow and/or bed linens.

Bed Bugs may also harbor in areas of the room away from the bed. Hold can 2 to 3 feet from surface to be treated. [Turn container upside down and point valve toward surface to be sprayed.] Apply as a crack-and-crevice or spot application where evidence of bed bugs occurs. This includes bed frames, box springs, inside empty drawers and clothes closets, night stands and other furniture in the room, carpet edges, high and low wall moldings (such as floor molding or window casings), wall voids, behind wall hangings and mirrors, wall paper edges and popcorn ceilings. Remove all clothes and other articles from dressers or closets before application. Take bed apart. Treat joints and channels if hollow, such as square or round tubing and see that interior framework is treated. Allow all treated areas to dry thoroughly before use.

**DUST MITES:** Spray with a sweeping motion to surfaces where mites congregate such as mattresses, box springs, headboard, floors, carpeting, and baseboard. Spray surfaces until damp. Apply on mattresses as a spot treatment to mattress seams, edges, buttons, and tufts of bed only. Do not use directly on pillows, bed linens, or cloths. Do not saturate the mattress and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and/or bed linens.

[ALTERNATE Dust Mite APPLICATION INSTRUCTIONS]:

**HOUSE DUST MITES: Do Not use on humans or animals.** Treat an inconspicuous area to test for possible staining or discoloration. Inspect this area after drying, then treat infested areas only if staining or discoloration has not occurred. Hold container upright with actuator opening directed away from you and apply from a distance of 18". Spray until surfaces are damp. Treat all mattresses, box springs, upholstery, carpet, rugs or other infested objects that cannot be laundered or dry-cleaned. Do not use article until treated area is dry. Repeat treatment as necessary. Apply on mattresses as a spot treatment to mattress seams, edges, buttons, and tufts of bed only. Do not use directly on pillows,

bed linens, or cloths. Do not saturate the mattress and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and/or bed linens.

Vacuum: the entire room 24 – 48 hours after treating, including box springs, mattresses, carpeting, drapes, furnace and air vents to remove all dust from treated area.

~~[Crawling Insects]~~ **CARPET BEETLES (Black, Furniture, Varied):** Apply with a sweeping motion as a surface spray to carpet, rugs, closets, baseboards, upholstered furniture, and around edges of carpet. Contact as many insects as possible. Spray into cracks and crevices where insects harbor, live and breed. Apply around cartons, containers, and furniture where these insects tend to congregate. Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

**Apply directly to exposed insects – roaches, ants(excluding fire and pharaoh ants), spiders(excluding black widow and brown recluse), crickets, waterbugs, silverfish, sowbugs and carpet beetles:** Spray areas where these pests are found or may hide, including dark corners of rooms and closets, storage localities, attics, crawlspaces, cracks and crevices, along baseboards and door sills and frames, behind sinks, stoves, refrigerators, and cabinets, and around garbage cans, pipes and plumbing and other utility installations. Directly spray pests driven out of hiding places. Spray ant trails, nests, and points of entry. Repeat if necessary.

**LICE:** Spray only surfaces that cannot be laundered or dry-cleaned including mattresses and upholstered furniture. Do not use on sheets or pillowcases. Apply on mattresses as a spot treatment to mattress seams, edges, buttons, and tufts of bed only. Do not use directly on pillows, bed linens, or clothes. Do not saturate the mattress and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and or bed linens.

**TO KILL LICE AND LICE EGGS:** Do Not use on humans or animals. Treat an inconspicuous area to test for possible staining or discoloration. Inspect after drying. Then treat entire area. Hold container upright with actuator opening directed away from you and apply from a distance of 18". Treat at the rate of 1 – 2 sec/2 ft<sup>2</sup>. Treat all mattresses, furniture or similar objects that cannot be laundered or dry-cleaned. Apply on mattresses as a spot treatment to mattress seams, edges, buttons, and tufts of bed only. Do not use directly on pillows, bed linens, or clothes. Do not saturate the mattress and do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and or bed linens. Do not use article until treated area is dry. Repeat as necessary.

**NON-FOOD LIVESTOCK HOUSING STRUCTURES (Premise Spray) :** [Only] for use in Horse Barns, Pony Barns, Colt Barns, Mule Barns, Donkey Barns, Goat Pens, Sheep Pens and shelters, Corrals, Paddocks, Holding pens, Stables, Horse Trailers, Kennels, Animal Research Facilities, Show Animal Quarters, Race Horse Quarters, Livestock Loafing Areas and Sheds, and Zoos  
DO NOT USE ON ANIMALS.  
USE ONLY AS A SPOT TREATMENT OR CRACK AND CREVICE SPRAY to kill listed pests.  
SPRAY FOR 3 – 9 seconds/ 6 ft<sup>2</sup>

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

#### **Pesticide Storage**

Keep this product in its tightly closed original container, when not in use. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals.

#### **Pesticide Disposal and Container Handling**

**Do Not Puncture or Incinerate!**

Nonrefillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions.
