SHAKE WELL BEFORE USING

Remove protective cap, hold container upright, with nozzle away from you. With nozzle 10 to 12 inches away, direct spray over the cat or dog beginning at the tail, spray over the dog or cat until the entire coat is damp up to the back of the neck. On longhaired dogs and cats, ruffle the coat and spray against the lay of hair, spraying directly behind hand so that spray reaches skin. Wear disposable gloves when applying product in this manner. For best results in controlling Tick infestations, locate ticks and spray directly on them. Avoid spraying face and genitals. An application of 30 to 45 seconds is usually sufficient for an average size dog, for cats about 10 seconds is adequate or 1 second per lb. of body weight of the cat or dog. Repeat application weekly if necessary.

To control infestation in kennels or sleeping quarters, after treating animals as directed, spray bedding, walls, cracks, crevices, and flooring. Always remove infested bedding before spraying in kennels or sleeping quarters.
