some Precautionary Statements
Product Name: PYROCIDE FLEA & TICK SPRAY 30203
EPA Registration Number: 1021-2678
Application Date: 26 January 2018
Decision Number: 537939

Dear Mr. Lennan:

The amended label and CSF referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, are acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. “To distribute or sell” is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Please note that the record for this product currently contains the following CSF(s):

- Basic CSF dated 08/04/2010
- Alternate CSF 1 dated 08/04/2010
- Alternate CSF C dated 01/22/2018

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the

website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Helen Hull-Sanders by phone at 703-347-0243, or via email at hull-sanders.helen@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Elizabeth Fertich". The signature is cursive and somewhat stylized.

SHAKE WELL BEFORE USE

FOR DIRECT APPLICATION TO CATS AND DOGS (OVER 12 WEEKS OF AGE):

Hold the container upright. Spray at a distance of 8-12 inches. Starting at the tail, spray over entire hair coat while moving the dispenser rapidly; making sure the coat is thoroughly wetted to the skin. While spraying, fluff the hair so the spray will penetrate to the skin. Make sure spray wets ticks thoroughly. Spray against the lay of the hair, roughing the hair on long-haired cats or dogs. Do not spray into the eyes, face or genitalia. For best results in killing ticks, spray directly on the tick. Allow cat or dog to air dry or blow dry. Do not towel dry. Do not reapply more than once every 14 days.

FOR DIRECT APPLICATION TO NON-DOMESTIC ANIMALS/LIVESTOCK:

To protect cattle, horses and hogs from **Horn Flies, House Flies, Mosquitoes and Gnats** apply a light mist sufficient to wet the surface of the hair. To kill **Stable Flies, Horse Flies** and **Deer Flies**, apply at a rate of 2 ounces per adult animal sufficient to wet the hair thoroughly.

To kill **Blood Sucking Lice**, apply to the infested areas of the animal, using a stiff brush to get the spray to the base of the hair. Repeat every 2 to 3 weeks if required.

To kill **Poultry Lice**, spray roosts, walls and nests or cages thoroughly. This should be followed by spraying over the birds with a fine mist.

For killing **Bed Bugs and Mites** in poultry houses, spray crevices of roost poles, cracks in walls, and cracks in nests where the **Bed Bugs and Mites** hide.

FOR DIRECT APPLICATION TO RESIDENTIAL DWELLINGS, INDOOR SITES AND PET PREMISES:

To kill **Fleas and Brown Dog Ticks** on premises: Thoroughly spray infested areas, pet beds, resting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames, and localized areas of floor and floor covering. Place fresh bedding in animal quarters following treatment. Concurrent treatment of animals is recommended.
