MCLAUGHLIN GORMLEY KING COMPANY, D/B/A MGK

Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Adding State Specific Language to the label
Product Name: MGK FORMULA 3402
Admin Number: 1021-2885
EPA Receipt Date: 07/23/2025
Action Case Number: 00662527

Dear Amy McNeilly:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Jasmin Jackson via email at jackson.jasmin@epa.gov.

Sincerely,

Jasmin Jackson, Biologist/Risk Manager

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic invertebrates, fish and wildlife. **DO NOT** apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. **DO NOT** contaminate water when cleaning equipment or disposing of equipment washwaters. **DO NOT** apply where runoff is likely to occur. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas.

PHYSICAL OR CHEMICAL HAZARDS

DO NOT apply this product in or around electrical equipment due to the possibility of shock hazard.

<p style="text-align: center;">DIRECTIONS FOR USE It is a violation of Federal law to use this product in a manner inconsistent with its labeling.</p>	
USE RESTRICTIONS:	<ul style="list-style-type: none"> • <u>Not registered for use on trees in the State of California.</u> • DO NOT apply to humans, animals, clothing or bedding. • DO NOT contaminate feed or food products, food preparation surfaces, dishes, kitchen utensils or food containers. • DO NOT APPLY ANY BAIT IN COCKPIT AREAS OF AIRCRAFT. • Use only in areas inaccessible to children, pets and other non-target organisms. • Only for spot and crack and crevice application. • DO NOT apply gel bait in areas where repellent insecticides have recently been used. • DO NOT place gel bait in locations that are routinely washed, as bait will be removed by washing. • DO NOT deposit gel bait onto exposed surfaces. If bait contacts exposed surface, remove bait and wash exposed surfaces. • DO NOT apply to surfaces where the temperature exceeds 120-130°F because this could cause the gel bait to liquefy. • DO NOT apply gel bait to food preparation surfaces or to areas where food utensils may become contaminated.
INSECTS KILLED:	Ants. Includes: acrobat, Argentine, bigheaded, carpenter, cornfield, tawny crazy, field, fire, ghost, harvester, honey, little black, odorous house, pavement, pharaoh, pyramid, rover, thief and white-footed ants.
WHERE TO USE [APPLY]:	FOR USE IN RESIDENTIAL, INSTITUTIONAL, COMMERCIAL AND INDUSTRIAL AREAS AND TRANSPORTATION EQUIPMENT: Use sites include single- and multi-family residential buildings, schools, commercial and industrial establishments, aircraft, trains, ships, boats, and buses.
BEFORE YOU USE / APPLY	Inspect infested areas carefully to determine overall infestation levels, locations of foraging, nesting areas and most appropriate application points. Removing food and water sources helps with bait acceptance.
Station Specifications	<ul style="list-style-type: none"> • Bait stations should be a minimum of 4 1/16" long and 3 1/4" wide • Openings in the station should be a minimum of 7/8" wide and 7/16" high • The station should contain a minimum of 1.0 g of bait
PESTICIDE RESISTANCE MANAGEMENT	<p>MGK® Formula 3402 contains a Group 4 insecticide. Insect biotypes with acquired resistance to Group 4 may eventually dominate the insect population if Group 4 insecticides are used repeatedly or in successive years as the primary method of control for targeted species. This may result in partial or total loss of kill of those species by MGK Formula 3402 or other Group 4 insecticides.</p> <p>To delay insecticide resistance, consider:</p> <ul style="list-style-type: none"> • Avoiding the consecutive use of MGK Formula 3402 or other Group 4 insecticides that have a similar target site of action, on the same insect species. • Basing insecticide use on a comprehensive IPM program. • Monitoring treated insect population for loss of field efficacy. <p>Contact your local extension specialist, and/or manufacturer for insecticide resistance management and or IPM recommendations for the specific site and resistance pest problems.</p>
USE INSTRUCTIONS [HOW TO USE / APPLY]	<p>MGK Formula 3402 is only for the control of ants as a spot or crack and crevice treatment in areas inaccessible to children or pets.</p> <p>Syringe Application:</p> <ol style="list-style-type: none"> 1. Remove the cap from the nozzle, attach tip, touch the tip to the surface to be treated, and push down on the plunger. Apply bait as a 1 gram dot. Recap the dispenser after treatment is completed. 2. Place bait in cracks, crevices, corners and locations where ant traffic is observed and nesting areas are suspected. 3. Inspect bait placements periodically and apply fresh MGK Formula 3402 as needed. <p>Maxforce Refillable Bait Stations or Equivalent Station Design:</p> <ol style="list-style-type: none"> 1. Fill reservoir of commercially available bait station with a minimum of 1 gram of MGK Formula 3402 not to exceed the capacity of the reservoir. 2. Affix content identification sticker on exterior of the station. 3. Place filled and sealed bait station near ant foraging trails or other areas where ants are known to forage or nest. 4. Inspect bait station placements periodically and refill MGK Formula 3402 stations as needed. [It is best to replace bait stations before they are completely consumed]. <p>DO NOT apply to areas that are routinely washed (such as countertops) as bait may be removed or diluted and spread onto the surface.</p> <p>If the area to be treated has been recently treated with repellent insecticide, thoroughly clean the area before applying bait. DO NOT spray repellent insecticide over gel as this may cause the bait to become repellent.</p>
INDOOR HOW TO USE / APPLY	<p><u>Commercial, Institutional and Industrial:</u></p> <p>Indoor applications in areas inaccessible to children and pets include cracks and crevices along walls or floors, behind or under equipment or appliances, under tables, within framing of tables or furniture, around sinks, within or near garbage collection areas.</p>

	<p>Applications in Nonfood Areas of Food Handling Establishments: MGK Formula 3402 is designed for use as a spot or crack and crevice treatment to control ants in areas inaccessible to children and pets in the nonfood areas of commercial, industrial, public and institutional buildings/structures, including restaurants, warehouses, food processing plants, supermarkets, hospitals, nursing homes, motels, hotels, schools, laboratories, computer facilities, aircraft, buses, boats/ships, trains, pet shops and zoos.</p> <p>Nonfood areas include areas such as garbage rooms, lavatories, floor drains (to sewers), entries, vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after bottling or canning). Refer to next section for use directions and restrictions when making applications in food areas of food handling establishments.</p> <p>Applications in Food Handling Areas: Apply only as a crack and crevice treatment to food areas inaccessible to children and pets of food handling establishments. Apply MGK Formula 3402 by placing the bait dispenser tip directly into cracks, crevices, holes and similar openings where ants are found or are entering. Food handling areas include areas for receiving, storage, packing (canning, bottling, wrapping, boxing), preparing, edible waste storage, and enclosed processing systems (mills, dairies, edible oils, syrups). Serving areas are also considered a food area when food is exposed and facility is in operation. DO NOT apply bait to areas where food utensils or processing surfaces may become contaminated.</p> <p>Residential: MGK Formula 3402 is designed for use as a spot or crack and crevice treatment to control ants in residential structures in areas that are inaccessible to children and pets. Indoor applications include cracks and crevices along walls or floors, behind or under equipment or kitchen appliances, under tables, around sinks, within or near garbage collection areas, attics, crawl spaces and cracks and crevices in cabinets. DO NOT apply gel bait to areas where food utensils or processing surfaces may become contaminated.</p>
OUTDOOR (Adjacent to home or structure) HOW TO USE / APPLY	<p>Commercial, Institutional, Industrial and Residential:</p> <ul style="list-style-type: none"> • A thorough inspection around a structure may reveal areas where ants are gaining access to the structure. • Place gel bait on, into or adjacent to structures where ants are observed, adjacent to ant trails and to areas where ant activity is suspected. • Apply MGK Formula 3402 as 1 gram dots to pest entry sites adjacent to homes or structures, such as along windows, doors, between construction elements, sewer areas, adjacent trees* which harbor ants, along walls, garbage holding areas or suitable placement sites acting as an ant harborage. • <u>Not Registered in the State of California for use on trees.</u>
HOW MUCH TO USE / APPLY [APPLICATION RATE]	<p>Syringe Applications</p> <ul style="list-style-type: none"> • Apply MGK Formula 3402 as 1 gram dots near active foraging trails, nest sites or to areas known to be active without disrupting the ants to ensure the ants take the bait back to the nest. • Inspect MGK Formula 3402 placements periodically and apply fresh bait as needed. <p style="text-align: center;">Figure 1 Dot of gel approx. 1 gram</p>  <p>Station Applications</p> <ul style="list-style-type: none"> • Place up to 5 stations per room for light to moderate infestations. For heavier infestations, additional stations may be added. Stations should be checked and refilled with MGK Formula 3402 if fully consumed and ant activity persists.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

STORAGE:

Store in a cool, dry place. Always store pesticides in the original container. Store away from food and pet food.

PESTICIDE DISPOSAL AND CONTAINER HANDLING:

{Note to reviewer: Storage was conducted Polypropylene syringes, HDPE and PET}

Non-refillable container. **DO NOT** reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

STORAGE AND DISPOSAL

DO NOT contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Keep this product in its tightly closed original container when not in use. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Non-refillable container. **DO NOT** reuse or refill this container. Triple rinse (or equivalent) and offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other approved state and local procedures.

MARKETING CLAIMS

1. Kills ants (including carpenter, fire, harvester and pharaoh)
2. Kills ants
3. Kills ants. Includes: Acrobat, Argentine, bigheaded, carpenter, cornfield, tawny crazy, field, fire, ghost, harvester, honey, little black, odorous house, pavement, pharaoh, pyramid, rover, thief and white-footed
4. Kills a variety of ants
5. Kills ants where they breed (excluding carpenter, fire and harvester)
6. Mode of action: The bait is taken by the worker ants into the colony where it is fed to other worker ants, and the queen ant so that the entire ant nest/population is killed within 2 weeks (excluding carpenter, fire, and harvester)
7. For use [indoors] [and] [outdoors]
8. Kills entire colony (excluding carpenter, fire and harvester)
9. Kills the colony within two weeks (excluding carpenter, fire and harvester)
10. Kills the queen (excluding carpenter, fire and harvester)
11. Kills the colony and queen (excluding carpenter, fire and harvester)
12. Ants carry bait back to the colony (excluding carpenter, fire and harvester)
13. Place where ants are present
14. For best results, place out of direct sunlight
15. Place near ant infestations
16. Use where ants are entering home
17. Place where ants are entering
18. Place around house near where ants are entering
19. Easy to use
20. Attractive bait matrix
21. Bait is attractive to ants (including carpenter, fire, harvester and pharaoh)
22. Bait remains palatable for up to 30 days indoors
23. Kills ants for up to 30 days
24. Contains three nutritional sources: sugar, oil and protein
25. Multi-nutritional bait matrix
26. Triple attractant bait matrix
27. Triple bait technology, contains 3 food sources for ants.
28. Satisfies most nutritional needs of ants in one bait
29. Satisfies the main nutritional needs of most ant species in one bait
30. Satisfies multiple nutritional needs of ants in one bait
31. Nutrilure Matrix
32. Triguard Technology
33. Triple Strike Technology
34. Nutri System Technology
35. Nutri Source Technology
