

GENERAL INFORMATION

500 Weed Killer is a selective herbicide which kills crab grass, quack grass, and certain other undesirable grasses and weeds such as Johnsongrass, water grass, goose grass and crabgrass while not harming desirable lawn and garden plants. Application should be made when the undesirable grasses and weeds are young and actively growing. Good soil moisture will give best results. If used in hot weather on dry soil, undesirable grasses may be temporarily affected. This product should not be used on St. Augustine and Centipede grasses.

DIRECTIONS

For lawn use, mix half gallon with ten gallons of water in a conventional pump-up type garden sprayer. The ten gallons will treat an area of 10,000 square feet (100 feet x 100 feet). Application should be uniformly over 10,000 square

feet. For garden use, mix a quart of 500 Weed Killer placed in the jar is enough to treat over 5,000 square feet.
